PREFACE.

Of the two original works forming the subject of the present volume, and of which an English translation is now for the first time submitted to the public, the MIUT AMIL or that comprising the text, contains a brief but comprehensive view of the first division of Arabic Syntax, or of that part, which treats of the government exercised by nouns, verbs and particles. The second, or Shurh, is a commentary on the former, and illustrates by a more minute and detailed analysis, the various rules recorded in the text, and the general acceptations of the several governing powers.

The first Book is entitled MIUT AMIL, or the HUNDRED GOVERNING Powers, because the Author has contrived to reduce to that precise number, the whole of those powers in Arabic construction, which are found to affect the terminations of nouns and verbs. A synopsis of this system may be seen in the commencement of the work, and a brief explanation of its leading divisions will be found in the concluding remarks to the translation; it is unnecessary therefore to enter into any further detail, and I shall merely observe of the title, that although it appears in some degree affected, and is not I imagine altogether strictly correct, yet the general design of the treatise, displays so much skill and ingenuity, and combines at the same time so many excellencies of brevity, order, perspicuity and precision, that it may be fairly considered, on the whole, as the most judicious compendium of Arabic regimen, that has yet appeared in the language.

Those indeed who are fond of simple abstracts of science, will have no reason to complain of the length or difficulty of the Miut Amil. It contains in something less than five quarto pages, the most important department of Arabic Syntax, and is almost entirely free from those little verbal quibbles and philological fopperies, which tend more or less to disgrace almost every work on Arabic grammar. The title to be sure carries with it an appearance of superfluous exactness, and some little grammatical finesse will no doubt be discovered in the author's mode of supporting it,* but this is too petty an objection to merit any remark, it is in truth a mere systematic capriccio: a solitary particle out of the great arabian desert of metaphysical refinement, where subtilties,

Swarm populous, un-numbered as the sands, Of Barca or Cyrene's torrid soil.

His method is as follows. He divides regimen into two general classes or departments, termed verbal and absolute. By the first is simply understood the effect that one word has upon the termination of another. By the second is meant that specific mark of case assumed by a noun when used absolutely as the nominative to a sentence. The government in the first instance is termed verbal, because, the change of termination is occasioned by some word either expressed or understood. In the second it is called absolute, because the word thus governed is considered independent of all verbal agency, and acquires this peculiar form of construction from its nominative situation alone. Verbal government he then subdivides into two distinct classes. The first, comprehends ninety-one specific words, which are termed from their nature, Prescriptive governors. The second, contains seven distinct classes of words, such as verbs, adjectives, participles, infinitives &c. &c. each of which necessarily includes all the words of its own species, and each of these classes he considers numerically as one, and terms the whole Analogous governors; here then are all the verbal governors in the language reduced to ninety-eight, viz. ninety-one in the prescriptive, and seven in the analogous class, to which if we add two in the absolute, we shall have an exact centenary of governing powers.

I know not well what the votaries of the eastern oracles will say to this comparison. I fear they will rise indignant against me for venturing an expression that may tend to degrade the literary eminence of the Arabs: but this is not my intention: I would rather support than lessen their importance. I consider myself in some measure as one of their disciples, and certainly feel respect for their language and literature. But although I freely acknowledge their merits, I will not acknowledge the infallibility of their doctrines, nor voluntarily subscribe to all their grammatical dogmas; their superlunar speculations; their metaphysical distinctions 'twixt south and south-west side;' and the whole host of fallacies and fictions, with which they perplex and embarrass the most simple subjects of literature. Undoubtedly their works discover both genius and learning, and in the minute cultivation of many sciences, particularly grammar and rhetoric, it may be doubted whether they have been surpassed by the learned of any other nation, but their literary affectation by disfiguring their works, diminishes in a considerable degree the real merit of their labours, and throws so many unnecessary impediments in the way of the student, that it is not very surprising we should find them almost entirely neglected.

One specimen of their solemn mode of triffing in literary works may be worth inserting. The Author of the grammatical treatise termed the Kafeea, for some reason best known to himself, neglected to prefix to his grammar the usual auspicatory formula of praise to the deity, the omission of which is considered by the sober Moosulmans as a serious mark of impiety. It was therefore necessary to defend this omission, and accordingly his commentator Moolla Jamee, in the true spirit of casuistical sophistry, settles the point of conscience as follows: "It is observable, 'says he' that the Author

Shuekh Ibnool Hajib, has not commenced his work with the prescribed ceremonial of praise to the deity. This omission however must not be attributed to negligence or contumely—'then to what must it be attributed?' why, to a proper sense of modest humility to be sure, which led him to depreciate his own merit as a grammarian, in comparison with those who preceded him, (the grace of God be upon them!) and consequently he thought himself unworthy to imitate their works in any respect! but although, continues the commentator, he has omitted the actual insertion of the words, it cannot therefore be inferred, that in direct opposition to the positive injunction of the sacred ritual, he has neglected the ceremony altogether. 'Oh no!—that would be an unreasonable and unnecessary supposition,' particularly as we know 'adds he,' that it is not restricted to verbal forms alone, but may be virtually discharged in secret, mental aspirations!' Now this is considered a very conclusive piece of reasoning, and completely exculpates the grammarian from all manner of censure.*

In speculations of this nature the Arabian grammarians seem to take peculiar delight. One third of the commentary on the Kafeea by Moolla Jamee, consists of subtilties and sophisms, which have very often no more connexion with the science of grammar, than with the science of palmistry. Every trifle gives occasion for an episode, and every episode is 'conglutinated or made up' + of as much recondite erudition, as the learned commentator can well muster together. After defining a word, he ascends synthetically to language as a compound, which comprises he says the language of God, of man, of angels, and

of Genii.* Lest any one however should be puzzled to find out the true nature of this latter dialect, a learned scholiast comes forward with a specimen,† and another gravely adds, as an infallible proof of its demoniac originality, that no human being can pronounce it three times successively at one breathing.

Through this commentary however, this xáspa μέγα of syntax, or some other, of equally 'crude consistence,' every student is obliged to 'swim, or sink, or wade, or creep, or fly,' who would aspire to any thing

Words so debas'd and hard, no stone, Is hard enough to touch them on.'

Which the reader may compare with the well known line in Homer,

Πολλὰ δἄνανία, κάτανία, πάςανία τε δοχιμά τ', ἦλθον.

So happily paraphrased by Pope,

O'er hills, o'er dales, o'er crags, o'er rocks, they go; Jumping, high o'er the shrubs of the rough ground, Rattle the clatt'ring cars, and the shockt axles bound.

^{*} An analogous division of language prevails among the Hindoos—" The gods speak Sanscrita; benevolent genii Pracrita; wicked demons Pisachi, and men of low tribes and the rest Magad'hi." Colebrooke on Sans. and Pracrit. A. R. 7. 199.

[†] It is also given in the *Tulkhees-ool-Miftah*, a treatise on Arabic Rhetoric, as a specimen of verbal harshness, and is supposed to have been uttered by a Jin after having killed a traveller in the Arabian desert, whose name was HURB. It turns out however to be very intelligible Arabic, though in—

like literary distinction. Moolla Jamee is indeed the Priscian of the East, and his comment is considered the very ne plus ultrà of grammatical knowledge. Not to have read it, argues absolute ignorance; read it, and you are dubbed at once a Moolla, and a man of learning: such is the wonder-working efficacy of Arabic grammar. It supercedes in a great degree the knowledge of every other art, and every other science, being in fact, if we may credit some of the learned Arabian doctors, the very essence of all the arts and sciences.

But grammar after all in its obvious and natural sense, is truly a simple art, the art of teaching the rules of inflexion and syntax, or the various relations of words to one another in discourse. The rules necessary for this knowledge are neither very numerous nor difficult, and perhaps not more so in Arabic than in other languages, but the Arabian philologists by blending them with the abstract speculations of logic, have effected a new and complex system of grammar, a system which comprises not merely the various relations, but the exact significations and definitions of words; their divisions into genera or classes; their combinations into propositions, and these again into reasoning or dicourse. Now all this is the proper business of logic, which is surely a distinct science, yet all this they have in some measure confounded with the simple rules of government and concord, so that a student looking into their works for a plain rule of syntax, finds himself entangled in all the mysteries of metaphysics.

There are some men, says Johnson, who seem to think nothing so much the characteristic of genius, as to do common things in an uncommon manner, like *Hudibras*, to tell the clock by algebra, or like the lady in Dr. Young's Satires, to drink tea by stratagem; to quit the beaten track only because it is known, and take a new path, however crooked

for rough, because the straight was found out before: this is precisely the case with the Arabian grammarians: they are always employed in raising straws with levers, in illustrating what cannot be misunderstood, in devising difficulties where none ever existed, and in perplexing the simplest rules of regimen and concord with useless subtilties and logical definitions: but if grammar be a particular art, what has it to do with general and abstract speculations? A disquisition on symbols and conventional signs, or the origin of general terms,* will not facilitate a student's progress in the laws-of syntax. These may be important enquiries, but they are not the more so, because conducted in Arabic: they have in truth no more connexion with the language of the Arabs, than with the language of the Troglodytes.

It is indeed amusing to observe the very opposite opinions of learned men on the subject of grammar. Some will have it a science, which views language only as significant of thought, and this is philosophical or general grammar. Others consider it as a simple art, which teaches the inflexion of words, and their due disposition into sentences and phrases, and this is particular grammar. A third race of philologists will neither allow it to be general nor particular, but a mixture of both, and this may be properly called mixed, or Arabic grammar.

The modern grammarians of Europe consider grammar and etymology as synonymous terms, and with them all languages go upon wheels,+ but those of Arabia who have no acquaintance with verbal antiquities, reject etymology altogether, and substitute in its place a dash of dialectics, with

^{*} See the Shurhoo Moolla and Shurhoo Ruzer.

which they are acquainted. Here then, are two opposite roads to the same end, and the student may take his choice. Either to adopt the plan of Horne Tooke and his followers, and set about digging for grammar through some dozen or fifteen collateral dialects, or getting boldly on the back of Synthesis with Mr. Harris and the Arabian grammarians, gallop circuitously to it, through the whole region of science.*

In order to learn any language with accuracy and facility, we must first endeavour to learn its rules, or the customary application of its words; these in their simple state, disencumbered of all technical formalities, are seldom difficult and may be easily acquired, but when once perplexed with obscure etymologies and logical definitions, and when every Dyche and Dilworth, who writes a twopenny-halfpenny guide to the eight parts of speech, deems it his duty to work them up into what he calls a new grammatical system, then indeed they assume a different character, or rather a variety of different characters, and are not easily acquired at all; the student, finding himself bewildered in the wordy labyrinth, abandons the study altogether, and willingly consigns to the Fates, the whole race of miserable grammarians with their miserable canons.

Felix grammaticus non est, sed nec fuit unquam,
Nec quisquam est felix nomine grammaticus:
Aut siquis felix præter fatum exstitit unquam,
Is demum excessit grammaticos canones.

As far however as relates to the present system of Arabic grammar, at least to the technical and speculative part of it, as distinct from the practical, my own opinion is, that it is chiefly, if not entirely derived from

^{*} Hermes p. 3.

⁺ Ausonius Ep. 126.

the philosophical writings of the Greeks, and particularly from those of Aristotle, with which the Arabs had been long and familiarly acquainted. They have certainly adopted his analysis of language,* his definition of the parts of speech,† his reasoning on substance and accident, or Mode,‡ which they have applied to words, under the grammatical denominations of Nouns and Infinitives, and his whole theory of the elements of language as significant of ideas. These are some of the principal topics, which the Arabian grammarians take delight in discussing, and to which, they not improperly attach a high degree of importance, but the merit of originality must be transfered to the Stagyrite, whose dialectics, if I am not much mistaken, will be found to contain the most remarkable facts that distinguish the philosophical grammar of the Arabs.

[‡] Accidents vero sive Modus est rei proprietas, quæ in aliqua substantia inhæret, nec sine ipsa potest existere. Element. Logicæ. By Accident here, and in Arabic grammar, as applied to an Infinitive, or is not meant as has been erroneously supposed, any thing casual or fortuitous: but as this is a point of some importance to the true understanding of an Arabic Musdur, (for an explanation of which I refer the student to my Annotations on the Commentary, p. 195.) I shall lay before him Dr. Gillies' note on the subject, which will certainly corroborate one material point of my argument. "The Greek word συμεσεργικός is, as far as I know universally translated, "accident;" συμεσεργικός in the plural, "accidents," from which, "Accidence," denoting the little book, that explains the properties of the eight parts of speech, is generally held to be a corruption. But accident, in its proper sense of what is casual or fortuitous, has nothing to do with the one or the other, and Aristotle's meaning of συμεσεργικός ought to be expressed by a Latin or English word derived, not from 'accide,' but from, 'accēdo.' See p. 65.

Indeed the whole philosophy of the Arabs may be traced to the Greeks,* whose language and literature they seem to have studied with uncommon ardour, for upwards of five centuries, that is, from A. D. 754 to the taking of Bagdad in 1258. Rhetoric and logic were their favorite pursuits. Averröes, the great commentator, as he is generally called, is known to have paraphrased Aristotle's rhetoric, and Alfarabius is said to have written no less than sixty distinct treatises on the Aristotelian philosophy, which was publicly taught in Bagdad, Bussurah, Koofah, Bocharia, Alexandria, Cairo, Morocco and Fez, as well as in sereval parts of Spain and Italy; but

^{* &}quot;See Abulfarag. per Pocock, Dynast. p. 160. Greek was a familiar language to the Arabians. The accompts of the Caliph's treasury were always written in Greek till the year of Christ 715. They were then ordered to be drawn in Arabic. Many proofs of this might be mentioned. Greek was a familiar language in Mahomet's houshold. particularly in the celebrated Schola Salernitana?* For a detailed account however of the origin and progress of Grecian literature among the Arabs, I refer the student to Warton's 2d Dissertation on the History of English poetry, and Enfield's History of philosophy, from Brucker's Historia Critica Philosophiæ, a work of considerable merit, though Dr. Gillies is of opinion, that his account of Aristotle's philosophy, is in many parts erroneous, and in some even unintelligible; while others go still farther, and hint that he did not understand Greek! It will there be seen, that the acroatic works of the Stagyrite, were translated, studied and taught by the learned of Arabia, and that to these works in particular, the Arabians seem indebted for all their notions of the philosophical sciences.

^{* &}quot;Their learning, but especially their medical knowledge, flourished most in Salerno, a city of Italy, where it formed the famous Schola Salernitana."

It must not be forgot, that they translated Aristotle's Poetics. There is extant " Averroys Summa in Aristotelis poetriam ex Arabico sermone in Latinum traducta ab " Hermano Alemanno; Præmittitur determinatio Ibinrosdin in poetria Aristotelis Venet, " 1515." There is a translation of the Poetics into Arabic by Abou Muscharmetta, entitled, ABOTIKA. See Herbel. Bibl. Oriental. p. 18. col. a. p. 971. b. p. 40. col. 2. p. 337. col. 2. Farabi, who studied at Bagdad about the year 930, one of the translator's of Aristotle's Analytics, wrote sixty books on that philosopher's Rhetoric; declaring that he had read it over two hundred times, and yet was equally desirous of reading it again, Fabric Bibl. Gr. xiii. 265. D'Herbelot mentions Aristotle's Monals, translated by Honain Bibl. Oriental. p. 963. a. See also p. 971. a. 973. p. 974. b. Compare Mosheim. Hist. ch. i. p. 217. 288. Note-C. p. 2, ch. l. Averroys also paraphrased Aristotle's RHE-TORIC. There are also translations into Arabic of Aristotle's ANALYTICS, and his treatise of Interpretation. The first they called Analuthica, and the second, Bari Armenias. But Aristotle's logic, metaphysics, and physics pleased them most; particularly the eight books of his physics, which exhibits a general view of that science. Some of our countrymen were translators of these Arabic books into Latin. Athelard, a monk of Bath, translated the Arabic Euclid into Latin, about 1000." Leland Script. Brit. p. 200. There

It must not indeed be denied, that there are many subjects connected with the arts and sciences, for which the modern nations of Europe are supposed to be indebted to the Arabs. Bossut attributes to them our present system of arithmetical numeration, as well as the first notions of Algebra which are found in Diophantus.* He gives them the credit of several important discoveries on trigonometrical calculation, and many ingenious improvements and alterations in astronomy.† An Arab in Spain was the first who attempted a theory of refraction and the twilight, which doctrine Malbranch is said to have enlarged upon, but as he does not quote the author, Bossut presumes he was unacquainted with his works. In truth the Arabs seem to have arrived at eminence in almost every science, and even in mechanics, the clepsydra or water clock sent by Haroon Al Rusheed in 799 to Charlemagne, is said to have astonished by its ingenuity the whole of Europe.‡

- * "Cardan considers the Arabs as the real inventors of Algebra. Practical geometry and astronomy owe the Arabs eternal gratitude, for having given to trigonometrical calculation the simple and commodious form which it has at present. Bossut, p. 157.
- † Of all the mathematical siences astronomy is that which the Arabs have most cultivated, and in which they have made the most remarkable discoveries. p. 159.
- † In the dial of this Clepsydra, were twelve small doors, forming the divisions of the hours, and each of these doors opened in succession at the hour it marked, and let out little balls, which, falling on a brazen bell, struck the hour. The doors continued open till twelve o'clock, when twelve little knights mounted on horseback, came out together, paraded round the dial, and shut all the doors. This machine astonished all Europe, when men's minds were employed chiefly on futile questions of Theology and Grammar."

 Bossut. p. 161.

All this must indeed be granted to the Arabs, but it appears from the united testimony of the learned,* that their philosophy was entirely Grecian. 'They did not form, says Brucker, a new system, but merely revived the Peripatetic doctrine.' Their logic was the logic of Aristotle, and the common introduction to that science, which is now current in Arabia and India, is a simple translation of the Isagoge of Porphyry. Aristotle's rhetoric probably led the way to their own, and his logic, when applied to the rudiments of their language, produced that ingenious but intricate and elaborate elementary system, which has perhaps not improperly, been termed philosophical or transcendental grammar.

This then is the origin of the philosophical sciences among the Arabs. Grammar, Rhetoric and Logic or Dialectics, formed the basis, to which if we add Arithmetic, Geometry and Astronomy, which they also

cultivated with success, we shall find them pursue (with the exception perhaps of music,)* the exact course of studies, as practiced by the Christian philosophers in the middle age.

* I say with the exception of Music, because I am inclined to think that Music as a science, was not regularly cultivated in Arabia, though some examples may be produced to prove the contrary. The learned Farabi already mentioned as the translator of Aristotle's Analytics, and who was styled the Coryphaus of Philosophers, deserves perhaps to be recorded as the Timotheus of Arabian Musicians, for his performance on the Lute before Sooltan Syf-ood-Doula, was not inferior to that of the Theban before Alexander. "Il tira, says D'Herbelot,' de sa poche une piece avec toutes ses parties qu'il distribua aux Musiciens, & continuant à soûtenir leur voix de son luth, il mit toute l'assemblée en si belle humeur, qu'ils se mirent tous à rire à gorge deployée; aprés quoy faisant chanter une autre de ses pieces, il les fit tous pleurer; & en dernier lieu changeant de registre, il endormit agreablement tous les assistans." vid. Art. Farabi. Bibliotheque. Farabi is said also to have written an introduction to the science of Music, which is mentioned in the BILIOTECHE DE! Turchi of Toderini. " Nell' accennata classe di Scienze, che contiene cento e venti due " polume, l'ottantesimo secondo scritto nell' Indice è un Trattato di Musica del Farabi inti-" tolato Medchalul Musiki, ossia Introduzione alla Musica." This valuable work of Toderini's, which seems very little known in India, contains a full account of the Arts and Sciences as known to, or cultivated by the Turks and Arabians, including, their Grammar, Logic, Rhetoric, Moral Philosophy, Arithmetic, Algebra, Geometry, Physics and Natural History, Medicine, Chemistry, Astronomy, Navigation, (Nautica, e Nuova Accademia di Marina.) Astrology, Poetry and Music. The work is entitled, Letteratura Turches ca, Studj, Accademie, Biblioteche e Tipografia in Costantinopli. Opera, dell' Ab. Gio. Battista Toderini. Tomo I, II, e III, in Venezia, 1786. The following extract from this work, relating to the Logic of the Arabs, as copied from the Greeks, will corroborate what I have before stated regarding that science.

La Logica, che studiano i Turchi è opera di Aristotele, il quale, come notò Gezalt nel suo libro Monked presso Herbelot, e l'inventore, dell'arte del ragionare, ed il prime, ch' abbia ridotto a metodo questa scienza. Oltre il Ketab Alvias le Aristothelu, ossia trattato del Sillogismo d'Aristotele, tradotto nell'Arabo, e diviso in due libri annoverati nel Catalogo

I have now to offer a few words on the grammatical works here translated, but of their authors unfortunately I know little or nothing. The commentator indeed attributes the Mijut Amil to Abdoolqahiribno Abdirrihman of Goorgan,* whom he styles the most excellent of the learned, but he does not say in what age he lived, nor in what his excellence consisted, and we are left to form our own opinion of his merits, from five pages of Arabic syntax! I find his name however in the Mirat-ool-Junan, with a few particulars, which as we have nothing better, we must substitute for a biographical memoir.

Abdoolqahir, surnamed from eminence, Alnuhwee, or the grammarian, was of the sect of Shafei, and one of the followers of Abool Hussun al Asharce. Besides the Miut Amil and Joomul, (another introduction to Arabic Syntax,) he wrote a learned commentary termed Almooghnee, in three volumes, upon the Eezah, besides several other celebrated works on grammar and rhetoric, and died in the four hundred and seventy-fourth year of the Hejira, or about the middle of the eleventh century of the Christian era. These facts though a little mutilated, and with some addi-

tions, are given in the Preface to Meninski,* on the authority of Shumsood-Deen, the author of a commentary on the Joomul, and both these works (the former with a Latin translation,) are said to be deposited in the Escurial in Spain.

Abdoolqahir appears to be the first grammarian, who reduced the governing powers of the Arabic language to a definite number,† and as he lived at a time when Grecian literature of every kind was ardently cultivated in Arabia, and when in fact almost every learned Arab made a merit of studying and copying the philosophical writings of the Greeks, it is not very improbable that the Centiloquium of Ptolemy,‡ a work, on Astrology, which must have been popular at that period in Arabia, gave him the first hint for the title of his treatise on regimen, and produced the Miut Amil, or Hundred governing powers.

The extreme brevity of the text has occasioned many commentaries on the Mijut Amil, but that which usually accompanies it in this country, and which I have here translated, is generally supposed I believe to be written by a native of India. D'Herbelot mentions but one commentary

^{*} Abu Bekr Abdelkaher, gente Persa, domo Georgianus, grammaticus, et orator eruditus, præclara edidit opera, ex quorum numero sunt, Commentarius in Rhetoricam Dilucidatio nuncupatam; Expositio particularum (why alone particularum?) quæ cenetum Regentes dicuntur; Commentarius in Alcoranum, et alia poetica opera! by Enn Hescham, whose name as a grammarian, he probably confounds with Hoosam-ood-Deen, who is stated in the Kushf-ooz-Zoonoon, to be one of the commentators on the Mi ut Amil;* it is possible however, that D'Herbelot alludes to Shuekh Jumal-ood-Deen Aboo-Moohummud Yoosoof, who was also known by the name of Ibn Hisham, but as no such commentary is attributed to him, in either of the Biographical works above alluded to, I feel some hesitation in allowing him to be the author of the Shurhoo Mi ut Amil. D'Herbelot however was certainly but very little acquainted

with Abdoolqahir and his writings, and the account he gives of the Miut Amil in particular, is a demonstrative proof that he was ignorant of the simplest principles of Arabic grammar.

This is all the information I have been able to collect of the author of the Miut Amil and his commentators. Something more might perhaps have been found had I been more industrious, but I confess I did not think it necessary to toss over half the manuscripts in the College Library, for the purpose of adding one or two obscure anneedotes to the life of Shuekh Abdoolqahir. Neither would the search have rewarded my pains, for Biography is a very different thing in Asia from what it is in Europe. There are no Pater Noster Rows, nor Cadell and Davies's in Arabia, and consequently there are no Boswells nor Piozzis. A grammarian may write five pages of Syntax there, without having five quarto volumes of Memorabilia recorded of him: for who could copy them, or who would read them? The life of an Arabian worthy indeed, is frequently dispatched in a line, and is seldom more entertaining or instructive, than a hic jacet, or a village epitaph. 'His name, his years,' with a ruzeeullaho anho,* or a 'holy text' from the Qooran, supply the place, "of fame and elegy," and constitute the brief memorials of a literary career. +

^{*} رَضَيَ اللَّهُ عَنْهُ May God be satisfied with him, a pious petition, which almost invaria-

[†] I ought perhaps to apologize for venturing this opinion of Arabian biography, for Sir Wm. Jones, whose authority will doubtless be considered decisive, has given a very different account of the matter. He prefers the biography of Ibn Khalikán, not only to that of Nepos and Laertius, but even to that of Plutarch himself; nay he seems inclined to rank the historian above all the biographers of ancient and modern times. 'Nescio an hic omnibus vitarum scriptoribus sit anteponendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior, and so on.—To all of which I can only answer, consult the Biography of Ibn Khalika'n.

Such is the life of Abdoolqahir, as handed down to us by two very popular historians, and the amount of the whole is simply this, that he was an eminent grammarian, that he wrote the Mooghnee, the Joomul, and the Mi ut Amil, and that he died in the year 474 of the Hejira.

There is no date to the Commentary, nor can I pretend to settle one, I suspect however that it is comparatively modern. The author, at the conclusion of it, speaks of Ibn Malik the grammarian, who died A. H. 672, but if D'Herbelot's information be correct, it will probably give an antiquity of 500 years to the work, as Ibn Hisham is known to have died in 762.

The Mijut Amil must be considered as a mere text-book, in which the governing powers of the Arabic language are arranged into appropriate classes, their grammatical offices defined, and their primitive senses illustrated by easy familiar examples. The commentary is an enlarged exposition of the governing powers, after the precise order laid down in the text, for it preserves the same arrangement of the parts, the same definitions of the rules, and the same examples illustrative of the original force of the terms, adding however to the primitive or current senses, the more immediately consequential or secondary acceptations:—Let us explain by an example.

The Preposition which is the first, in the first class of grammatical agents, is stated simply in the text, to be a Genitive Particle, and one example is subjoined to illustrate its force. The commentator repeats the rule regarding its regimen, but adds its primitive acceptation, which he states to be Union, and this he considers as two-fold: either absolute, as denoting actual coalition or cohesion of parts, or relative, as implying proximity or contiguity of person or place. The first he exemplifies by the phrase which is sick, or sickness is inherent in him. The latter, by the

sentence '''' i passed by Zued.' He then goes on to define the collateral and accidental significations of this particle, under the various relations of instrumentality, causality or causation, concomitance or association, substitution or exchange, inclusion or comprehension, with some others, which may be seen by referring to the translation, and each of these senses he elucidates by one familiar example.

This is the general mode of analysis, as adopted in the commentary. The words are all considered either separately or in classes, their original and accidental significations defined and illustrated, and their analogous and anomalous syntactical structures pointed out and determined. The etymological formation of some words are occasionally explained, but this is but seldom, and only in particular cases, where words apparently simple, are shewn to be compound, as it formed from the particle it of similitude and the Pronoun is.

The commentary in short, is a simple introduction, comprising a distinct general view of the essential parts of Arabic regimen and nothing more. To render it however as extensively useful as possible, I have transcribed from the works of several of the most eminent Arabian grammarians, whatever appeared to me best calculated to illustrate the force and application of the several governing powers, and these with my own observations and remarks subjoined to the translation, form a perpetual commentary on the text, which I trust will be found useful.

To these annotations sometimes critical and sometimes explanatory, I have occasionally added others of a more light and miscellaneous nature. They are not indeed of much importance to the work, and might well enough have been omitted, but they amused me at the time of

writing, and may probably amuse others. To extract mirth or humour however out of Arabic grammar, must I am persuaded be looked upon as a hopeless attempt, an attempt perhaps not altogether dissimilar to that on record of certain ingenious people in the Island of Mateotechny, who are said to have employed themselves, in gathering grapes from thorns, and figs from thistles; or of others, who pitched nets to catch the wind, and caught—cock lobsters!*

The original works from which I have selected the materials for the notes are as follow: Shurhoo Wafeea, Shurhoo Moolla, Shurhoo Ruzee, Shurhoo Misbah, Shurhoo Alfeea, Qutr-oon-Nuda, Moofussuls and the Mooghnee-ool-Lubeeb. Of these, the three first are commentaries on the Kafeea; the first by Ibnool Hajib, the author of

Pococke has given the name erroneously. " شرح شراهد لغني i e. Explicatio i e. Explicatio أبر محمد عبد الله بن هاشم ab مغني لبيب conscripta afferuntur, cujus author est Jelalo'ddinus, idem qui commentarium in Alcorani partem, scripsit." p. 367.

the text; the second by Moolla Jamee the Poet, and the third by Ruzeeood-Deen Moohummud of Astrabad. The Wafeea though a very
valuable work, is perhaps but little read; the Shurhoo Moolla, as it is
generally called, is a logical and argumentative comment on the text,
and is every where studied in India, but the commentary by Ruzee (from
which indeed the greater part of Jamee's is supposed to be borrowed) is
the most voluminous and elaborate of all, and is justly considered a
chef d'œuvre of grammatical science.

Moohummud of Asferan; the Qutr-oon-Nuda, by Aboo Abdoolla Moohummud Bin Yoosoof Hisham, and the Shurhoo Alfeea, by Shuekh Aboo Moohummud Abdoolla Bin Abdoorruhman, more generally known by the name of Ibn Uqeel, I have nothing particular to offer. They are all popular works in Arabia, and the latter in particular, seems to possess the same rank in Bagdad, as the Shurhoo Moolla does in India, a fact which is certainly somewhat remarkable, as the former is as a much famed for simplicity, as the latter is for subtilty. The same may be observed of the Mooghnee-ool-Lubeeb, by far the most useful work on Arabic grammar with which I am acquainted. It has supplied me with almost every thing valuable on the particles.

In order to illustrate with greater effect, the practical applications of these most subtle parts of speech, as they are sometimes called, I have added at the conclusion of the annotations on each, an Arabic story, in which the particle will be found to occur under all the senses ascribed to it in the commentary. The natural and popular use of the word will, by this means be better understood, its lighter and more evanescent shades of meaning, rendered more obvious and determinate, and the whole series

of primitive, derivative and metaphorical acceptations exhibited at one view, in an easy and regular scheme of explication.

I have pursued this plan throughout the volume. A story is appropriated to every preposition, and afterwards to every class of governors consecutively. The words thus explained, are distinguished by figures in the original, that the student may be enabled to compare their use with the explanations given in the commentary, and the whole is accompanied with an easy English version.

The stories thus given, are partly original and partly extracted from books, either printed or in manuscript. Those at the commencement of the commentary, were prepared by Sueyid Uhmud, a learned Arab, of the College of Huneefu, who accompanied me from Bagdad in the year 1812. The sudden and unexpected death however of this most excellent scholar, a few months after his arrival in Calcutta, deprived me, at an early period, of the benefit of his services, and forced me, reluctantly to relinquish the extensive plan of illustration, which he had himself originally proposed, and by which I had hoped to diversify and enliven my commentary, with much curious and intersting matter. This pleasing scheme however was in a great measure prevented by his death. I had no choice of materials, and was frequently obliged to adopt a number of insipid stories, which under other circumstances, I should certainly have rejected. The most entertaining portion of them were supplied me by an ingenious native of Yemen in Arabia, Nathaniel Sabat,* whose literary talents and acquirements, are well known in India, and for whose useful assistance in this department of my work, I am under considerable obligations.

^{*} At present employed by the Reverend T. Thomason, on a translation of the New Testament into Arabic.

My constant guide and companion in almost every stage of this translation, was Mouluvee Umanut-Oollah, a learned native of India, formerly on the establishment of the College of Fort William, and a more able guide or skilful and judicious instructor, I know not well where I could have found.

For the poetical versions of sundry passages from the Arabian poets, which will be found occasionally interspersed through the notes, I am entirely* indebted to the kindness of my friend Mr. Wilson, the learned and elegant translator of the Megha Duta, + and to Captain Roebuck of the College, who afforded me his assistance in conducting the work through the press, I beg leave to offer my best thanks.

I have no further observations to make on the works here translated, and of the translation itself any observation on my part must be useless; I shall therefore offer none: it may speak for itself or be silent. The typographical errors are indeed rather numerous, and require some apology. I believe they were occasioned in a considerable degree, by the rapidity with which a large portion of the work was hurried through the press, for it is certain, that the greater part of the commentary, with all its appendages of extracts, stories, annotations, &c. were prepared, translated and printed off in something less than five months. I have endeavoured however to rectify these mistakes as well as I could, by a table of errata, which will be found in general to consist of little more than transpositions in the Vowel points. The errors in the English part, are not likely to embarrass the student, and I have accordingly omitted to record them.

With the exception of the paraphrase in page 48.

[†] Or CLOUD MESSENGER, a Poem in the Sanscrit language by Calldasa.

If to the two elementary works contained in this volume, be added the first and fifth Chapters of the Misbah,* or rather perhaps a portion of the Hidayut-oon-Nuho, a body of syntax will be formed sufficiently comprehensive for every practicable purpose whatever; but if the student aspires to a higher and more accurate knowledge of the subject, and would understand not only the rules, but the reasons of the rules, with all the delicacies, refinements and peculiarities of this admirable system of speech, I would recommend to him a Grammar of the Arabic Language, by Mr. Lumsden, the Persian and Arabic Professor in the College of Fort William, a work which I am persuaded will be found to exhibit, the most profound and masterly analysis of the language, that has ever been presented to the public.

MEEUT AAMIL.

BOOK I.

OF THE HUNDRED GOVERNING POWERS.

ARABIC SYNTAX comprehends AN HUNDRED GOVERNING POWERS, of which some are, نفظي or (verbal;) and some, مُعَنُوكِي or (absolute.)

Of those termed الفظي or yerbal, there are two classes: The first, مساعي, or the prescriptive government; the second, قياسي or the analogous, which with two of the معنوي or absolute, comprise the hundred governing powers.*

^{*} A summary view of the whole MEEUT AAMIL is here annexed.

There are an hundred governing powers in Arabic syntax, of which some are verbal and some Absolute. The verbal is divided in two classes, the 1st prescriptive, the 2d analogous. The prescriptive, contains 91; the analogous 7, and the absolute 2, in all 100.

The , or PRESCRIPTIVE government, is divided into thirteen CLASSES.

CLASS FIRST.

The first class contains seventeen particles, or prepositions, which govern the noun alone in the GENITIVE OF RELATIVE case. viz.

The PRESCRIPTIVE is divided into 13 CLASSES. Prepositions which govern the NOUN alone in the GEN. OF RELATIVE The 1st class contains 17 (Particles, govern the NOUN in the ACC. or OBJECTIVE and the PREDI-CATE in the NOMINATIVE (Particles, govern the noun in the nom. and the PREDICATE in the 7 Particles, govern the noun in the objective case. (Particles, prefixed to the agrist tense of verbs, change the ruffu of the final letter into musub. 5 Particles, prefixed to the agrist render the final letter quiescent. Words, prefixed to the aorist render the final letter quiescent—they possess a conditional or subjunctive meaning, like the particle. Nouns, govern an indefinite noun in the genitive or relative case, Rth when employed as the Tumers or noun of specification. (Words, called VERBAL NOUNS, of which 6 govern the OBJECTIVE 9 CASE, and have an imperative meaning; and 3 the MOMINATIVE and (have a preterite signification. (Defective verse, govern the noun in the non. and prepioate 10th in the ACCUSATIVE. 11th VERBS OF PROPINQUITY, govern the noun in the nominative case. Verbs of PRAISE AND CENSURE, govern generic nouns, with the 12th definite article, in the HOMINATIVE CASE. VERBS OF DOUBT AND CERTAINTY, govern a double accusative, or two nouns in the objective CASE, the second explaining or announ-13th cing some thing regarding the first.

The ANALOGOUS GOVERNORS, are 7, and are as follow; 1st averb whether active or neuter.

2d A derivative adjective—3d a participle active. 4th A participle passive. 5th An infinitive.

6th A noun governing another in the genitive case. 7th An isme tamm.

The Absolute is of 2 sorts. 1st The now. Absolute. 2d The Aorist.

The seventh class contains nine words, which, prefixed to the aorist, render the final letter quiescent: they possess a conditional or hypothetical signification like the particle of viz.

CLASS EIGHTH.

The eighth class contains four nouns, which govern a general or indefinite noun in the objective case, being the "" or, Noun of specification.

CLASS NINTH.

The ninth class contains nine words, termed or verbal verbal signification: of these six have an imperative sense, and govern the noun in the Accusative or objective case: viz.

The cardinal number (cleven) for instance, as exemplified in the text, is the mere name of a certain species of quantity, and therefore incapable of conveying to the mind any other idea than a certain aggregate of units. 'There came to me eleven'—eleven what?—men, horses, or dogs? Some word is evidently required to expel the obscurity, or in other words, to separate some specific object from the mass of possibles, in order to give a determinate character to the sentence: this word the Arabian Grammarians have therfore with analogical propriety termed the interior or, as it may be rendered in English, the noun of specification.

The remaining three, have a preterite signification, and govern the noun in the NOMINATIVE: viz.

CLASS TENTH.

The tenth class contains thirteen words, termed اَنْعَالَ نَا قَصَة or defective verbs, which govern the noun in the nominative, and the predicate in the objective case. viz.

CLASS ELEVENTH.

النوع الحادي عَشَرا نعالُ الْبُعَارَبِّةِ تُرْفَعُ السَّاوَ أَحِداً

The eleventh class contains four words, termed or veres of or veres of propinquity, which govern the noun in the nominative: viz.

عَسَىٰ زَيْدُانْ يَخْرُجُ كَادَنَ يَدُّانُ يَخْرُجُ كَرَبَ زَيْدُيْخُرُجُ إِذَوْشَكَ زَيْدُيْخُرُجُ

The twelfth class contains four words, termed or verbs or verbs of praise and censure, which govern generic nouns made definite by the article of the nominative case. viz,

تعمَّ الرَّجِلُ زَيْدُ Zeid is a good

Amr is a bad

Bukr is a vicious or bad

Zeid is a good

Zeid is a good

MEEUT AAMIL.

OF THE ANALOGOUS GOVERNMENT.

THE CLASS termed قياً سري or analogous, has seven governors, and consists of the following parts of speech, viz.

A VERB UNIVERSALLY, النعل على الاطلا ت

A PARTICIPLE ACTIVE.

A PARTICIPLE PASSIVE.

An infinitive.

A PERFECT or COMPLETIVE noun; viz. a noun terminating either in تنوین or, what is considered as a substitute for the tunween, namely the noon of the dual or plural number:—or, a noun followed by another in the genitive case: in all which cases it requires the Tumccz, or NOUN OF SPECIFICATION.

^{*} The government of the above parts of speech will be exemplified in the second book,

OF THE ABSOLUTE GOVERNMENT.

THE CLASS termed or ABSOLUTE, has two peculiarities of regimen. Of these, the first requires, in the absence of any verbal governor, the subject and predicate in the nominative case: the second is the Aorist tense of a verb, which, in the absence of certain governing particles, receives the vowel Zummu; or in other words, the final letter of the tense is marked

End of the Meeut Aamil.

At the conclusion of the first book, it may not be unnecessary to offer a few general observations, on the nature, divisions and peculiar distinctions of THE HUNDRED GOVERNING POWERS, a clear and comprehensive conception of which will tend to facilitate, in a considerable degree, the future progress of the student.

The subject of the MEEUT AAMIL, is grammatical regimen, or government; and is defined to be that part of Syntax, which regulates the dependency of words, and the alterations which one occasions in another,

This is divided into two general classes or divisions: the first termed VERBAL, or the relative or dependent government; in contradistinction to the second, which flows from the sense, and is therefore properly ABSOLUTE or independent.

In the VERBAL or relative, the word governed necessarily depends on, or is influenced by, some other word in construction: the ABSOLUTE is totally independent of all such influence, having the intrinsic power of assuming a certain grammatical character, or indication of case, which in the Arabic language is invariably NOMINATIVE.

For it must be remembered, that in this language, there is a state in which nouns are found to exist, before they are distinguished by any marks of annexation, or indications of case, such for instance as the word (deprived of the tunween,) which is considered the primary, or radical form of the noun, and must necessarily be connected with some other word in construction, before it can assume any grammatical character, indicative of ease. The nominative therefore, which always denotes a certain specific relation, is distinguished by a termination or mark of inflection, significant and peculiar to itself, superscribed over the final letter of the noun in its sadical form, as

Under the first species of government, namely the verbal, or relative, are included two distinct classes, or the prescriptive, and analogous. Of these, the first relates to a certain specific number of words, the government of which is settled and authorized by long usage and custom; while the latter is restricted to the government of a certain class of words, in which you reason by analogy from one to another, and consequently, determine their influence in speech to be every where regular and uniform.

The second form of government, which has been translated absolute or independent, is of a twofold nature. The first governing the subject and predicate: the second the aorist tense of a verb, which is said to resemble in sundry particulars a noun, and, in the absence of any verbal governor, assumes the vowel Zummu, viz. the final letter of the tense is marked of a verbal governor, assumes the vowel ties of regimen have been variously accounted for by grammarisms, and shall be noticed in their proper place. The government, in both instances, is said to flow from the sense, and to be totally independent of any other word in construction, and seems therefore to resemble that case, in the greek language, which certain grammarians have termed the nominative absolute.

The above remarks will perhaps be sufficient to convey a general idea of Arabic government. For a more minute and particular analysis of the subject, together with the various significations and peculiarities of the hundred governing powers, the reader is referred to the commentary on this book.

COMMENTARY

ON THE

HUNDRED GOVERNING POWERS.

BOOK II.

INTRODUCTION.

THE author of the MIUT AMIL* enumerates in Arabic syntax one hundred governing powers, of which some are is or verbal, t and some or absolute.

^{*} The grammatical treatise termed Is a Might Amil, on which the present work is a Commentary, contains agreeably to the literal meaning of the title, one hundred governing powers: these are divided into co-ordinate and subordinate classes, with reference to their general and particular offices, and the author with an ingenuity characteristic of the systematic refinement of an Arabian grammarian has reduced the whole to an exact centenary of governing powers: in this he was doubtless as much influenced by numerical symmetry, as logical or grammatical precision, but the arrangement is convenient and sufficiently accurate for all useful purposes.

عنوي and معنوي are relative nouns, from النظ utterance, or vocal expression, and معنوي are relative nouns, from فنظي eignification, meaning. The first significs literally, verbal, and denotes that the government to

The VERBAL government is subdivided into two general classes, the first named PRESCRIPTIVE the second analogous. The PRESCRIPTIVE includes ninety-one, the analogous seven, and the absolute two, forming on the whole, one hundred grammatical agents or governing powers.

OF THE GOVERNMENT TERMED OR PRESCRIPTIVE.

THE PRESCRIPTIVE GOVERNMENT IS DIVIDED INTO thirteen CLASSES.

CLASS FIRST.

The first class contains seventeen PARTICLES OF PREPOSITIONS, which simply go-

which it is applicable is influenced by words. The second on the contrary as its name imports has, no reference to words, but relates merely to sense: the one is extraneous, the other intrinsic, and both seem properly enough designated by our own grammatical terms, versal and absolute.

From the infinitives whearing, and is the former of which, as applicable to all irregular grammatical agents, may be termed PRESCRIPTIVE, or as this class of irregular governors are more literally denominated by Agapiti A Valle, audibilia, quia à magistro audienda. They may properly be considered as exceptions to the general class of regular governors, and are accordingly restricted in number to ninety-one. The analogous classes will be illustrated in their proper place, and it therefore only remains to be remarked, that the government of the particles extend to all the cases, while some of them possess the peculiar property of changing the infinitely. It is and others that of affecting the sound of the terminating letter, with the mark information. These distinctions seem to correspond with the antithesis and apocope of European languages and should therefore agreeably to our notions of grammar, be rather included in the rules of prosody than inflexion.

vern a noun in the Aorist CASE. They are called " or PARTICLES of ATTRACTION."

They are called farticies or attraction, because they are said to attract the sense of the antecedent word to the consequent, pointing out at the same time the relation subsisting between both, and for a similar reason are also termed عروف الأضافة or connexive particles. They are applied like the prepositions of other languages in a two-fold capacity; Κατὰ ακεάθιστι by way of juxta position, and Κατὰ σύθισει by way af composition; viz. some of them are seperable, and some inseper-rendered the Generius case, but what it may be asked in the genitive case? Ile file ainé du momanitif,' says Du Marsais, -the eldest son of the nominative! 'and is formed to express all relations commencing FROM it itself,' says Harris, in contradistinction to the dative, which expresses all relations tending to itself.' If this be the true character of the genitive, it is obvious it cannot be applicable to the term mujroor, as the prepositions of from and it to, govern the same case, though the relations they are formed to denote, are directly opposed to each other. If the metaphorical or rather whimsical language of the French grammarian be admissible, it must be allowed that the claims of this case to hereditary pre-eminence are much superior to those of the file afné, as it may be said to inherit a sort of trinal consanguinity, or triplicity of filiation possessing in itself a complex cognation, with its progenitor the nominative, which includes not only the rank and powers of the eldest son, the genitive, but of the two younger also, the dative and ablative.

It might perhaps be called the RELATIVE CASE, if it were not that every case is strictly speaking relative, a case being generally defined by grammarians—the special difference in a noun, according to the different relations that things bear to one another; yet the Messieurs De Port Royal who copied this definition from Sanctius, + have strangely enough, and almost in the same page restricted the term relative to the dative. On a question however merely nominal it is not necessary to be captious:—in re levi noluinus esse moroii;—the arbitrary distinctions of language have no essential connexion with the operations of words; the name is seldom found significant of the office. But although 'the equality of words to things be often neglected,' it seems necessary in technical appellations to be as precise as possible:—to the two first terminations or cases of an Arabic noun, the terms nominative and accusative are sufficiently applicable, but the compre-

hensive and indefinite character of he one in question, which comprises virtually the various powers of the genitive, dative and ablative, seems to require a name of correspondent import. I shall therefore hazard an innovation, and term it in future the Aorist Case.

From the etymology of the word case, grammarians have pretended to explain its properties. Case they say comes from casus à cadere to fall, like the Greek Hrècus from Hurre—words following (as it were) from the mind or discursive faculty.* This is fanciful enough, and worthy the ingenuity of Harris, and his friends the Peripatetics. But what authority is advanced for supposing, that words when first applied as terms of art, were applied in their primitive rather than in their consequential or metaphorical significations? There is no authority for such a supposition, but authority directly against it. The word casus in Latin is considered synonymous with eventus and exitus, and has many other senses besides ita literal one:—case in English is never used in its original import, and Aristotle+ himself applica literals one in English is never used in its original import, and Aristotle+ himself applica literary to the variations of the noun and verb, not only to what we term declension and conjugation, but even to the singular and plural number. But this is not a work for minute discussions on grammatical subtelties and verbal peculiarities, I shall therefore conclude with or serving that the

same idea is expressed in Arabic by the word $\ddot{x}(\dot{z})$, meaning familiarly state, case, &c. which a fanciful grammarian after the usual mode of etymological retrogradation might trace to the verb $\dot{y}(\dot{z})$ he turned, inverted or declined, and hence argue that the term was thus significantly applied ingrammar, to express the variations, or declensions, of a noun from its upright form $\dot{z}(\dot{z})$ through its various declining forms." $\dot{z}(\dot{z})$ This is quite as plausible a derivation as the other, but I am persuaded it never entered the mind of an Arabian Grammarian. Who would not smile to hear a physician etymologize on the word case, and inform his Patient, that it signified literally falling, implying as it were the decline or fall of his health from its upright form?—Yet the physician's etymology is every way as good as the grammarian's; or rather they are both good for nothing.

Annotation.

Grammarians have assigned various other relations to the particles رأي besides those enumerated in the text, but they seem all correlative and may be traced to the primary signification or generic idea denoted by the term,

The radical import of this particle is therefore union, whether absolute or relative.

Absolutely, it denotes possitive or immediate union or co-alescence.

Relatively, it implies simple relation of vicinity or proximity of place.

From the generic idea of union flow several specific relations, which may be translated by the following English prepositions.

- 1. With, denoting the instrument or agent, which is expressed in Latin by the ablative case as مُعَبَّثُ بِالْعَلَامِ . Scripsi calamo.
- 2. By, or on account of, denoting the efficient or final cause, the means by which any thing is performed; also in swearing.
 - 3. Along with, association, society, or connexion.
 - 4. For, in exchange of.
 - 5. In, denoting the relation between the object contained and that containing it.

It corresponds very nearly in all its relations with the English preposition by.

The various uses of this particle, together with the Cacus amor sui, or tympany of self-conceit are illustrated in the following Story.—The Figures point out their application as explained in the Text.

A silly fellow observing one morning that his house was ready to tumble about his ears from decay, and being destitute of the means of repairing it, went with a long face of rueful cogitation to his wife, and informed her of his miseries. Now the wife was just as great a noodle as himself,—so says she, why, my dear distress yourself about a trifle? You know you have got a cow worth thirty dirhums, take her to the market and sell her for that sum, I have also some thread which I will dispose of to-day, (and between us both we shall raise the wind I warrant it.)

The man instantly rose up, drove the cow to the market, and delivered her over for sale to the public appraiser of cattle. The salesman shewed her to the by standers; directed their attention to all her excellent points,—expatiated on her numerous good qualities, and in short puffed her off as a cow of inestimable

value:—to all this the wiseacre listened with delight and astonishment;—he heard her praised for qualities that he thought no other cow could possess, and determined in his own mind not to lose so rare a bargain, but purchase her himself and baulk the chapmen; he therefore called out to the appraiser, and asked him at what she was going, he replied at fifteen dirhums and upwards. By the head of our Prophet says the Cappochia, had I known before that my cow was such a prodigy of excellence, you would not have caught me in the market offering her for sale. Now it happened that he had just fifteen dirhums, and no more:—these be thrust upon the broker, exclaiming—the cow is mine—I have the best claim to her! He then seized her, and drove her home, exulting all the way, as if he had found a treasure. On reaching home he enquired eagerly after his wife to inform her of his adventure, but was told she had not returned from market. (There was no remedy but patience, which he despised, so he sat biting his nails in the last stage of the Fidgets.)—At length she appeared, and he sprung up to meet her exclaiming,—wife I have done something to-day, that I believe will astonish you!-I have performed an exploit, that would do honor to the first genius of the age. Patience says his wife; -- perhaps I have done something myself to match it:-however hear my story first and afterwards talk of genius if you please. The husband desired her to proceed. When I went to market, says she. I found a man in want of thread;—I shewed him mine, which he approved of. and having bargained for it, he agreed to pay me according to the weight. I told him it weighed so much, which he seemed to discredit, and weighed it himself:observing it fall short of the weight I had mentioned, and fearing I should lose the price I at first expected, I requested him to weigh it over again and be certain:-in the mean time taking an opportunity unobserved, I slipt off my bracelets, and put them slily into the scale with my thread.—The scale of course preponderated and I received the full price demanded. Having finished her story. she cryed out-What think you now of the genius of your wife!* (It must be

^{*} Literally the daughter of your uncle.

recollected says the historian, that the bracelets were of silver and double the value of the thread.) Amazing, amazing, says, the Booby, your capacity is truly supernatural!* and now, if you please, I will give you a specimen of mine, and he related the adventure as above.—Oh husband says the woman, the almighty has favored us in this affair—had we not possessed such consummate wisdom and address, how could we have contrived means to repair our old house? In future therefore annoy yourself no more about domestic conserns; for the Lord is merciful. On my part I shall continue to exert my abilities, and do you the same, and by our mutual talents and dexterity, it is impossible we can want for any thing-

The few liberties taken with the original will be readily pardoued by the Arabic Scholar, and to any other class of readers it would be useless to offer explanations. The extreme brevity, simplicity, and terseness of the original diction cannot I believe be preserved in our English idlems. but the selemn gravity of the dialogue defies all power of imitation.

easier to comprehend than translate. The word signifies literally flowing out enuberantly, as milk from the udder, &c. and was hence transferred to denote sounty, or liberality, as your bounty flows liberally, and laterally to signify natural capacity, indoins &c. The phrase means literally—your flow of milk is by or through God. i. c. your capacity is divine or supernatural.

OF THE PREPOSITION.

؈ٙ

is used to denote the Commencement of Interval (ابتال العاية)* as applicable to time and space.

EXAMPLES.

I travelled from Busruh to Koofuh.

I slept the whole night, lit. from the beginning نبث من أوّل اللّيل الى آخرة to the end of it.

2. It is used in the sense of partage, or participation, (تَبعينُض)

EXAMPLE.

I took some of the Dirhums.

Annotation.

* The phrase would signify literally the beginning of the end, a sort of phrase ology not likely to convey much information; but the Commentators explain this oxymoron, by asserting that the word is by a synecdoche is here synonymous with is space or interval.

The word interval which was originally applied to space, is considered by Dugald Stewart in his Philosophical Essays, as now exclusively restricted to time;—whatever may be the case now (which by the by is a very indefinite term,) it certainly was not so restricted by writers in the two last centuries. It is useless to multiply examples, but with following one from Milton, every reader is acquainted.

56 Twint host and host a narrow space was left,

A dreadful interval."

Annotation.

Besides the above applications of the particle there are a great variety of others, the whole of which the Arabian Grammarians deduce from the primitive idea Beginning.

The present work will not admit a detail of these various senses; I shall therefore merely notice those of most frequent occurrence.

The particle denotes Causation, as in the following lines of the Poet Furuzous, in praise of Zuen-ool-Abideen.

Through modesty he bends his looks on the ground; the people do the same from awe of him; and no man dares to speak but when he smiles.

It is synonymous with the particle من عمر و على يُدَ أَفْضُلُ مِن عَمْرُ و عَلَى Zued is more excellent than Umr, which agreeably to the authority of the Grammarian المن من الله IBNO-MALIK, is equivalent to the phrase وَيُدُو وَافْنِي الْفَضْلِ Zued surpasses Umr in excellence.

It is used for مَا عَلَى as نَصَرْنَا عَمَى الْقُوم ;—We assisted him against the tribe.

It is used in a peculiar sense to denote termination, bound, or limit, the very opposite of its original signification;—example,

I saw him from that place, or I saw him to that place; viz. to the very extent of vision, as we say in English, I saw him from afar. The correspondent preposition DE, in the French language is used in a similar manner to denote opposite relations, as

Approchez-vous Dz ce poele, vous vous chausserez. Eloiguez-vous Dz ce poele vous vous, bruleriez.

^{*} In the Latin translation of this example, the preposition ex has the same force as e. g. Recedite ab abminatione ex idolis.

4. It is redundant, (زِ ياً دَ عَ)

EXAMPLE.

He (God) will pardon your sins.

Annotation.

The particle as illustrated in the Text, may be translated as follows:

- 1. By the prepositon from, denoting commencement.
- 2. Some, part, &c. denoting partage and also by of;—as we say in English I took of, or from them; viz. I took some of them. In this sense it is always synonymous with
- 3. Namely, to wit, &c. in the sense of Elucidation: in such examples the relative pronoun in Arabic may be substituted for the particle. The above senses will be found illustrated in the following Story:

STORY.

The Calif Haroon Rusheed and his minister Giaffar the barmecide, intent one day on a frolic, strolled out of Bagdad together in disguise. A little way out of the city, they happened to meet an old man with sore eyes, driving along an ass, The Calif gave a wink to Giaffar to smoke him. Where are you bound, my old man says Giaffar? That is no concern of yours replied the other—What says Giaffar, not allow me to prescribe something for your eyes?—I want none of your prescriptions, rejoined the old fellow. Nay, don't say so, says Giaffar, you do require it, and this is the recipe. Take a little wind-wood, a quantity of the dust of water, and some mushroom leaves,* these having well mixed up together in a nut-shell, apply to your eyes, and you will find immediate relief. Upon this, the old man reclined backwards upon his ass, and—\$\beta_covr\tilde{a} nomediate relief. Upon this, the learned doctor, says he, for your description of the wind-wood-eye-salve; and if I find it benefit me you shall have a double fee. The Calif was so delighted with the repartee, that he was nearly falling off his horse with laughter.

^{*} This is nearly as fanciful a collection of heterogenious ingredients as those in the thunderbolts of Jupiter—" Three rays of twisted showers, three of watery clouds, three of red fire, and three of winged south winds; with terrific lightnings, sound, fear, anger, and pursuing flames, mixed up in the work."

⁺ This may perhaps he called an obscure paraphase, but I found it difficult to express the bathos of the original, without descending to the oracular language of Giacoma Rodogina, the engastrymythian prophetess. The French Nuns in the scrupulous chastity of their dialect, have prettily termed it sonnet, but our language admits of no such happy refinement, I was therefore compelled to have recourse to the words of Strepsiades in the Clouds. Vid. Aristophanis Nurses.

OF THE PREPOSITION,

عَنْ

(بغد ومجاوزة) denotes distance and transition, (ابغد ومجاوزة)

EXAMPLE.

I shot the arrow from the bow.

Annotation.

The prepositions of and which seem formed to denote i eas radically distinct and incenvertible, do notwithstanding very frequently occur as synonymous terms, and as such act reciprocally in composition without any injury to sense or idiom. Of these, the preposition is certainly represented in our language by from, which in common with its prototype is said to refer to beginning, and to nothing else; but for denoting ditance and transition, where shall we find an adequate representative? This question has already been considered by Mr. Lumsden in his Persian Grammar, and after an attentive examination of the subject, he decides with his usual judgment and discrimination in favor of the preposition off. The particle of as explained in the Text, is unquestionably represented by off, for both are said to denote distance, and separation, but the former is used in a multiplicity of relations, widely differing from the radical sense and from each other, and the latter seems restricted in its application to the two significations above mentioned, namely distance and separation, so that the parity seems merely of an etymological nature, and will it is feared tend little to illustrate the singular powers of the Arabic preposition.

in Arabic is used in a threefold capacity.

Oss seperationem significat, ut aliquando Latinorum abs, ex; ut absciado, exuo; cui opponitur on continuationem innuens, (exuo to put off, induo to put os.) Ioannis Wallisii Gram. Linguæ Anglicanæ.

Ore signifies separation and distante. Royal Eng. Gram. by Greenway.

⁺ Orv in truth appears the most useless preposition in the English Language and might perhaps be entirely dispensed with: as an Adverb indeed it is of greater importance and signifying in this character, Disjunction, absence, privation and distance, may perhaps approximate nearer to the various powers attributted to 52.

Annotaion.

- 1. It is placed before verbs in construction, and is termed عَيْ مَعِيدُ يَعُ bestowing on the verb to which it is prefixed the sense of the infinitive.
 - 2. It occurs as a noun, and in this sense is considered synonymous with جَانب side, &c.
- 3. It is a preposition, and in this character has ten different applications; at least this is the opinion of the Grammarians of Busruh, for the rival schools of Koofuh allow it no other signification, than that of قراد بالمنظور بالمنظو
- 1. The preposition of denotes distance and transition, (x) and may be then translated off, out of, from, from out.
 - 2. It denotes exchange, (J 5.) answering to _____ for, in exchange of, &c.
- 3. It denotes exaltation, (Junis) ---- on, above, over.
- 4. It denotes causation, (تَعْلَيلُ) ——— through, by, from, &e,
- 5. It is synonymous with Se, after.
- β. It denotes inclusion or comprehension, (ظرفية) ----- , in,
- 7. It is synonymous with from.
- 8. It denotes instrumentality, (zi lains) with, by.
- 9. It is synonymous with , &c.
- 10. It is redundant, (زيادة)

To the whole of these various senses, with the exception of the first, the preposition off seems totally inapplicable. The extensive character of from may render it a more general substitute in translation, but it will be found defective in several of the examples and must call in the assistance of other particles.

Annetation.

The radical distinction therefore between o, and o, with their occasional correspondence, and idiomatic peculiarity, do not appear sufficiently illustrated by any two particles in our language:

The Greek however will afford a nicer parallel, on which though a matter of mere curiosity, I may be permitted to offer a few remarks.

- * 1. έμ, like ω is synonymous with after, as έκ τῆς ῦπατέιας i. e. post consulatum.
- 2. έκ, like the 9th sense of we can with, as,
 έκ πολλε τε περιοντος i. e. cum ingenti excessu. or as the Franch say, ανες beaucoup d'avantage.
- 2. in its 4th signification, as,
 in the text i. e. propteres, ob eas causas.
- 4. έκ like وَ is frequently used adverbially, as, έκ τε Φανερε, i. e. palam—like the Arabic عَنْ قَصِد
- 5. έμ is sometimes explained by the ablative, as,
 έμ θαλάσσης i. e. per mare. έμ τετε τε λόγε hac ratione?

This sense though peculiar will be found frequently to occur in Arabic: the following example the proposed to Aboo Zued in the fifteenth Mugam of Hurerers may be sufficient.

Which would be translated by the ablative absolute in Latin, thus,—

Homo obiit relicto fratre. (A man died leaving a brother &c.)

The parallel if necessary, might be extended, but the above will doubtless be deemed sufficient.

JULIANUS de Idiotismis,

Annotacion.

It very frequently resembles hors in French and fuor in Italian and in such cases will be translated out of: Take one example out of many from the limit I IKHWAN-OOS-SUFA, where the Dolphin in enumerating his disqualifications for the office of an Embassador says to the King of the fish.

"And I have neither legs to walk with, nor tongue to speak with, nor can I live out of the water even for an hour; but I think the Tortoise is qualified for the task, for he can live out of the water."

The various applications of se as enumerated in page 34, will be found illustrated in the following Story.

An Arab presented himself one day before the Calif Mooatusim Billah, Commander of the Faithful. The Calif made trial of his abilities, and finding him in every respect intelligent and accomplished, appointed him one of his suite, and preferred his society to that of all his other counsellors. Now the Calif had a minister excessively envious whose jealousy was excited by the Arab's promotion, but dreading the anger of the Calif if he attempted any thing against him openly, he continued to keep up a shew of friendship, determing to effect his ruin by some secret wile or artifice. He continued therefore daily to encrease in civility towards him, and at length invited him to his house to dinner, and mixed up in his food a large

^{*} It is here used as a noun, and means side,

portion of Garlic. After dinner he said to the Arab,—" when you attend the Calif's assembly, take care to sit a distance from him, for the smell of the Garlie may offend him." The minister then waited on the Calif and said, - "The Arab whom you made your favorite, and whose company you prefer to ours, has spread about a report that you have a stinking breath." The Arab a little while after made his appearance, and seated himself at a distance from the Calif. The Calif desired him to come near him, which he obeyed, but covered his mouth as he approached with his sleeve. This action confirmed in the Calif's mind the truth of his minister's story and the treachery of the Arab. He thereupon wrote a letter to one of his governors to the following purport.—" On receipt of this letter, let the bearer be immediately put to death." He then sealed it, and delivered it to the Arab saying, convey this to such a one and return to me speedily with the answer. Arab took it, and in going out happened to meet the minister at the door, who enquired where he was going. He replied the Calif has employed me to carry a letter to one of his governors. The minister immediately conjectured, that the Arab would receive some very considerable present from the governor, and he determined in his own mind, to possess it himself,—" what say you, says he, if I release you from the annoyance and fatigue of the journey, and present you at the same time with two thousand Deenars? Most certainly says the Arab. you speak with judgment and in so doing will free me from a very unpleasant embassy.—" You have shot the arrow of your judgment, with the bow of unerring direction." So accept the letter. He then delivered it to the minister and received in return two thousand Deenars. The minister proceeded to the house of the governor and shewed him the Calif's letter. The governor read it, and in conformity to the injunction it contained, ordered the minister to be beheaded. After

^{*} It is evident that this example is similar to the one adduced in the text to denote distance and transition; It might therefore be naturally asked why the particle of should not have a similar interpretation; I confess I see no good reason for it, but as the Arabian Grammarians think proper to allow it both applications, I have no wish to dispute the point with them.

to some of his attendants, enquire after the Arab who was formerly with me, and desire the minister to attend. They told him, the Arab was in the city, but that the minister had gone on a message to a certain governor, and had not returned. The Calif desired the Arab to be called before him, and asked him the particulars of the matter, which be related from beginning to end. But did you not says the Calif spread a report among the people, that I had a stinking breath? God forbid says the Arab I should report that of which I am ignorant. Your minister could have only told you this from treachery and deceit towards me;—he dug a pit for my destruction, in to which God has caused him to fall himself,—do not therefore grieve for his fate, for the proverb says, "he who digs a pit for his companion, will fall into it himself." Grieve not, for in grief there is no advantage. Unable

To which may be added the two following from the Persian,

The same idea it has been observed seems common in every language; Good has produced the following examples, in his notes on Lucretius,

yourself to avoid the occurrence of contingent evils, how do you expect to ward them off others, as the Poet says,

You lament at the untimely fate of another?

But say can you extricate yourself from the power of death?

The Calif was astonished at this marve'lous adventure, and saw that the almighty from the purity of the Arab's intentions had rescued him from an untimely end—He exclaimed—Vengeance on the head of the envious man!—Envy where it originates, will surely destroy its possessor. He then bestowed a dress of honor on the Arab, appointed him to the vacant office of his minister, and seated him at the head of the assembly on his right hand.

OF THE PREPOSITION.

الی.

1. The preposition الى is used to denote the bound or termination of interval, (انتهاءالغاية) as applicable to time and space.

EXAMPLE.

I travelled to Koofuh.

Annotation.

There is nothing particular to be remarked of the preposition [1]: it is the correlate of and as applicable to time and place, is properly rendered in English by To, and Till. The senses attributed to it in the text are doubtless those of most frequent occurrence, but there are a few others, which may be probably worthy of a place.

FABLE XVL

^{[&}quot;You have shot the arrow of your judgment from (or with) the bow of uncerting direction." See page 40.] It may perhaps be worth remarking that the same idea is expressed nearly in the same words by Gay.

⁴⁶ Go child, and when your grown maturer,

^{*} You'll shoot your next opinion surer."

is sometimes though not frequently synonymous with

EXAMPLE.

Annotacion.

1. After words expressive of love, esteem, & . and their opposites hatred, aversion, and the like, serves to discriminate the agent in the sentence, which in such cases it immediately governs: as in the following example from the Quoran, where the BLOOMING HEBREW BOY in resisting the threats and blandishments of the Chaste Egyptian Dame, exclaims.

.46 O Lord, a prison is more desireable to me, than that which (these women) invite me to."

Here the first personal affix, s governed by !!! following the word more desirable, and is thereby pointed out as the a ent in the s ntence.

2. إِنَّا Is sometimes found in a sense directly opposite to its radical one, namely مَا الْمُعْمَالِ عَلَى الْمُعْمَالِ اللَّهُ عَلَى اللَّهُ اللَّهُ عَلَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَّ عَلَى اللَّهُ عَلَّ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَّهُ

EXAMPLE.

"She says, (i. e. the camel) while I am placing the saddle on her back;—has Inno-Uhmura drank of me, and is yet unsatisfied?"

The camel jided and harassed by incessant travel is supposed to exclaim as above, on seeing her master about to remount her, but whether Inno Unnura was the name of the master, who relates the occurrence, or of some other whose conduct had passed into a proverb, I confess I am unable to decide,—these detached and frequently mutilated passages from the Poets which are constantly brought forward by the Arabian Grammarians in emergency, seem as often to

3. When that which follows happens to be of the same general nature, or genus as that which precedes it, the preposition will then have an inclusive signification.

EXAMPLE

Wash your hands and your faces to the elbows inclusive.)

Annotation.

require illustration themselves as the points which they are intended to illustrate; and without the aid of comment or context the sense must be often guessed at.

It seems worthy of remark that Till, like [1], in our old authors is found some times to denote with, and from.

EXAMPLES ...

Till, denoting, with, in addition to.

The empryce than oure story sayis, Come in Ingland in tha dayis, In that land to ger be dwae, And to be mad kyng hyr swne, Henry, the quhilk oure kyng dawy. And til hym serdis rycht mony, Kend hyme nerrest ayre to be, Than, of all that reswite.

Wyntown, vii. 6. 430.

Till denoting from.

Swa til saynt marget eftgre syne, As til malcolme in ewyn lyne, All our kyngis of Scotland, Ware in-til success yowne discendand.

Wystews, vi. 19. 139.

See Jamisson's Dict.

In the latter example Jamieson remarks that till is used improperly for from, and if the impropriety consist in the infrequency of its occurrence, the same may perhaps he said of []].

They are both however found in this sense and should therefore be recorded.

4. When that which follows I happens to be of a different class or genus to that which precedes it, the preposition will then have an exclusive signification.

EXAMPLE.

Then continue the fast till-night.

Annotation.

3. Ill Is occasionally synonymous with 3

EXAMPLE.

"And do not desert me in society, under your threats, as if I were a scabby camel besmeared with pitch."

4. It is synonymous with

EXAMPLE.

"But there is no return to youth, the very remembrance of which is dearer to me, than the most delicious wine."

This preposition may therefore be occasionally translated by, to, till, with, and from. The senses enumerated by the Commentator in the text, will be found in the following little Jou d'esprit.

STORY.

I never says Furuzduq* experienced so severe a retort, as I did once from a certain Nabathæan. Are you the Furuzduq, says he, whose constant employment it is, to lampoon and flatter the people, for mercenary purposes? The same I replied. Than said he you are sunk in a privy to the very nose. But why exclude the eyes said I?—To enable you to behold, replied he, the abject state, into which your sordid passions have reduced you.

each. They say is compounted of is a friend and was; and was; and which in the current dialect signifies enough. This phrase the authour was frequently in the habit of making use of and at length it superceded his real name.

FUNUZDUQ one of the most ancient Arabian Poets celebrated alike for his extravagance of praise, and bitterness of censure. Some extracts from his writings will be found in the biography of Inno-Khilukan, a work that has been eulogized by Sir William Jones in a strain of amplification, not much inferior perhaps to that of Funuzouq himself:—The passage is so remarkable, that I think it should be laid before the reader. "Porrò scriptoris politissimi Enna Khalican, opus historicum non magis verborum elegantia et ubertate commendatur, quam illustriorum poetarum versibus, quibus conspergitur. Ac nescio an hic omnibus vitarum scriptoribus sit anteponendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundier, et dignus est profectò liber, qui in omnes Europæ linguas conversus prodeat." A very correct and elegant copy of this work which I precured at Bagdad is now in my possession; it consists of 1266 octavo pages, and 826 lives, and is considered I believe by the Arabs in general as an impartial compendium of biography, but as to copiousness, jucundity, elegance, and such other pleasing epithets ascribed to it by Sir William, I fear we must attribute them rather to the partiality than candour of the learned orientalist.

OF THE PREPOSITION,

فحسا

1. The preposition نحي denotes inclusion, (ظرفية)

EXAMPLE.

The money is in the purse.

2. It denotes exaliation, or elevation, (| | | | | | | | | | | | |

EXAMPLE.

And I will certainly crucify you on the trunks ولأصلبنكم في جذوع النّخل of palmtrees.

Annotation.

Besides the above senses, the particle is is found occasionally synonymous with and it, with some others which are detailed at large in the (مغنی اللیب Mooghners of Lubers. The example produced by the Commentator from the Quoran to illustrate the 2d use of the particle, in the sense of exaltation or elevation may perhaps be considered equivocal, the following however will doubtless be deemed satisfactory.

66 A servant informed his master that his Ass was atolen :---thank Gon says he, that I was not on his back !"

The correspondent prepositions in Latin and Italian have a similar application, as

Equitare in arundine longo, Mattere un anello in dito.

The original sense of the preposition, namely inclusion, is either real or metaphorical—the first has already been illustrated in the example in the text, the latter occurs repeatedly in the following

HUMOROUS DIALOGUE BETWEEN A RAKE AND THE DEVIL.

PARAPHRASE.

As sleepless one night I lay musing in bed,
With whims and chimeras afloat in my head,
I grew drowsy at length, and fell into a doze,
When who should appear but old Nick at my nose:
And with accent and mien prepossessing and civil,
Sitting down by my side thus address'd me the Devil.

Come Friend speak your mind, what shall I procure you? Would you like a tit-bit from the purlieus of Drury?—

I shew'd by my looks, that I relish'd the bliss,

So I smil'd approbation, and answer'd him yes.

Then he added,—perhaps it will highten your sport,

If I bring with the Doxy some mellow old Port?

Some mellow old Port, I exclaim'd with delight?

Ay, order it straight, and we'll tope it all night.

And Songsters, said he, with such notes as of old,

Made Mrs. Eurydice 'scape from my hold?

Yes, yes, bring us Songsters, said I by the score,

'Till the Welkin in rapture reecho encore!—

But, what says my Boy, to the bosom of snow,

The soft pouting lip, and the ringlets that flow,

To the heart melting glances; the sweet bashful charms

Of a maid of sixteen to enfold in your arms?—*

Mr. Devil, says I, I'm unwilling to teize ye,

But the sooner you bring her, the better you'll please me.

Then up jump'd the tempter and grin'd in my face,

Crying, sink of iniquity, lust and disgrace,

I've prov'd you a scoundrel,— and thus having spoke,

He made me a congè, and vanish'd in smoke.

OF THE PREPOSITION,

لام

1. The preposition کے, denotes appropriation, (اِثْنَصَاص)

EXAMPLE.

The covering is for the Horse.

[•] I have omitted the translation of a verse in the original as conveying an idea suitable only to Satan himself or an Eastern Debauchee.

a. It is sometimes redundant, (زیاکر چ)

EXAMPLE

Part of that which you desire to accelerate,

may perhaps follow close behind you.

3. It denotes possession, (تَلْيُكُ)

EXAMPLE.

اللَّالُ لَزِيد The property is Zued's.

4. It denotes causality or causation, (تَعْلَيْل)

EXAMPLE.

ا مِنْ الْمُورَا مِنَ I came to, or waited upon you that you might exalt or ennoble me.

5. It is used to denote swearing, (قَسَمُ)

EXAMPLE.

^{*} The sentence is imperfectly given in the text—it will be more intelligible by inserting it entire. و يَقُولُونَ مُتِي هَذَا الْوعَدَّ انْ كَاتُمْ صَادِقِينَ قَلْ عَسَى اَنْ يكونَى رَدِفَ لَكُمْ بَعْضَ الّذِي تَسْتَعْجِلُونَ • مُتِي هَذَا الْوعَدَّ انْ كَاتُمْ صَادِقِينَ قَلْ عَسَى اَنْ يكونَى رَدِفَ لَكُمْ بَعْضَ الّذِي تَسْتَعْجِلُونَ • And they say when will this threat be accomplished if you speak true? Answer, perhaps part of that (punishment) which you desire to accelerate may follow close behind you." See Chap. 27, Qooran.

6. It denotes at a end, succession or consequence.

EXAMPLE.

Evil necessarily follows depravity (i. e. of manners.)

king of Kinduh sent an ambassador to Sumuwwul, to solicit the arms of the deceased, but he refused, and said, I will not deliver up any part of what has been entrusted to me, to any but the lawful proprietor. The king repeated his demand, but he persisted in his refusal, swearing, by the Almighty Gon, I will not abuse the trust reposed in me, nor act treacherously to gratify the king. When the ambassador reported the determination of Sumuwwul to the king, he marched against him with his army; but Sumuwwul retreated into his fortress, and there secured himself. Then the king besieged it, and the son of Sumuwwul happened to be out of the fort at the time, and the king seized him and .made him prisoner, and carried him round the fortress, proclaiming to Sumuwwul: I have taken your son captive, behold he is with me—then he shewed him to him, and said, if you will deliver to me the arms and weapons, I will restore to you your son; if not, I will slay him before your face; so choose which you like.—And Sumuwwul said, do as you please. for I will not violate my faith and promise. Then the king put the son to death in the sight of his father. And the king was baffled in his attempts against the fortress, and obliged to raise the siege and retreat in disgrace; but Sumuwwur bore his misfortune with patience, conscious of having performed his duty with integrity; and when the lawful heirs of Amur-ool-Ques arrived, he delivered to them the armour and weapons in his charge, preferring the observance of his promise and good faith, to the life of his own son; and the faith of Sumuwwul became afterwards proverbial.

OF THE PREPOSITION,

و ۔ رب

1. The preposition denotes paucity, () and requires in construction an indefinite noun which it immediately governs, qualified by an adjective or epithet, and a verb in the past tense.

EXAMPLE.

I visited a few liberal or generous men:

2. It sometimes precedes a or indeterminate pronoun, and in this case governs an indefinite noun as its in the accusative or objective case.

EXAMPLE.

I visited a few men.

Annotation.

Neither the true character nor meaning of this word seems properly ascertained by Grammasians. By someit is considered a noun, by others a particle:—one will have it to signify paucity,
another abundance, and for both opinions numerous examples are produced. Moda James, the
collabrated Commentator on the Kafeeu, says the word was originally formed to denote paucity,
but the author of the Moognee-ool-Lubseb, authority still higher, contends that its proper
signification is abundance. From this 'chaos of mingled purposes,' how shall we extricate truth?
The tack would indeed belong and tedious, and provoke discussions unsuitable to the nature of
this work, I shall therefore confine myself to a few observations on its practical application
to the purposes of speech.

or رَبِّ in the following sentence from the Qooran, is adduced by the author of the Moognee-ool-Lubeeb, as an example of its use in the sense of

Sale however has adopted the opinion of other Commentators, and renders it thus. "The time may come, when the unbelievers shall wish that they had been Moslims,"—instead of,—' the unbelievers shall frequently wish,' &c. In this he seems to have followed Maracci. "Aliquando, desiderabunt, qui infideles fuerunt, ut fuissent Moslemi." Who justifies this version by the following note. Particula (برية أَنَّ عَلَيْهُ وَاللَّهُ وَ اللَّهُ وَاللَّهُ وَاللَّهُ

In the following verse from رَخْرَاتُي, the word رُخُرَاتُي, is undoubtedly used in the sense of تقليل

Annotation.

"There are few Children to whom nature has decided a father, and few parents, who never themselves had parents."

The poet in the first hemistich is supposed to allude to Christ, and in the latter to Adam.

after the particle (5 is very often understood, also frequently after and occasionally after xi.: of the two latter, the following examples will be sufficient.

*" There are few men from whose countenance the clouds can drink splendour, as they do from him who is, the proceedor of the orphan, and the support of the poor."

"There are few Cities containing men of exalted prowess and bravery.

When كا فقة or the prohibitive particle is affixed to ربيا يود الذَّ بن كَفَروا ple, إِنَّ اللَّهُ بن كَفَروا as quoted above.

This particle assumes no less than sixteen various forms, the following eight however are those of most frequent occurrence.

It may be translated occasionally, some, a few, many, frequently, often &c. it occurs in both senses, namely تقليل and تقليل in the following extract.

قيل إنّ رجلًا مِنْ طَلَبةِ العلم فَل يومًا على الفقيهِ الفا صل على

A verse of Aboo-Talib's in praise of Mohummud.

STORY.

A certain scholar called one day upon the learned lawyer ULIYU-BIN-SUEEDIN-ILKUO-KUBANEEYU, and after having paid his respects and taken his seat, said—pray benefit me by some of that knowledge, with which God has benefited you. Attend then said the lawyer to the two following useful maxims. First. There are many things in the acquisition of which men exert themselves, which when they have acquired, they will wish they had never acquired. Second. There are few stratagems more advantageous than alliance.* The man remembered the maxims, thanked him, and went about his business.

OF THE PREPOSITION.

عَلَىٰ

1. THE PREPOSITION (is used to denote exaliation or elevation, (استعلام)

EXAMPLES.

Zued is on the house top.

Zued is on the house top.

He is in debt, (or lit.) upon him is debt.

^{*} The example is by no means a good one, for the sentence will bear a very different interpretation—as,—" there are some frauds better than friends;"—or, " artifice is occasionally better than alliance."

z. It is occasionally synonymous with جَاءِ

EXAMPLE.

I passed by hima.

Annotation.

The true character of the as well as is imperfectly understood: although I believe at present, it is generally considered as a particle, yet the Grammarian something, Seens well as others of high authority, contend that it is a noun, and nothing else. I shall as usual wave the discussion as unimportant, and content myself with offering a few examples of its practical application.

مَع It is sometimes synonymous with مُعَ

EXAMPLE.

piety is of him who believes in God and the last day, and the Angels and the book (i. e. the Qooran) and the Prophets, and who gives money for the love of God, to his kindred, and to orphans, and the poor, and to travellers and beggars, &c." See Qooran. C. ii.

It must be observed however that the words with are capable of a different meaning, as remarked by some of the Commentators on the Qooran, who interpret them thus "notwithstanding his love of that money," &c.

^{*} Lit.-The son of the road.

Annotation.

It is sometimes synonymous with , &, example from the Quoran.

"That ye may glorify God for having directed you, and that ye may give thanks."

It is synonymous with

Woe to unjust measurers, who when they receive by measurement, from the people demand the full &c. See Qooran. C. lxxxiii.

It is synonymous with , i as mentioned in the Text.

EXAMPLE.

44 It is just that I speak not of God, any thing but the truth." See Qooran. C. vii.

It is evident from the above examples, that the preposition is capable of a variety of uses, besides those recorded in the Commentary, and there are several others of less importance which I have purposely omitted. The senses however in which it is most frequently found, are included in the following Story:

اللكِسا مِي عَيْظًا حِيْنَ سَبِعَ كَالامَهُ وَخَرَجَ مِنَ الدّ ارِمُسرعًا لِيَنْظُرَمَنِ الَّذِي جَعَلَهُ حَمَا رَّا فَأَنِهِ الْهُوَبِرَجُلِ طُويْلِ الْقَامَةِ عَظِيْم الْهَامَةِ فَدَنا مِنْدُو قالَ لَهُ أَيُّهَا الشَّيْخُ عِلْهُنَا بِالْكِسَائِيِّ ا نَّهُ آنَ مِنَّ فَكَيْفَ صَارَ حَيُوانًا ناهِمًا قَالَ نَعَمْ إِنِّي دَعَوْتُ رَبِّي البارِحَةَ أَنْ يَهُ سَخَهُ حِمَارًا لِيَنْجُوعَمُ وُصُ ضَرْبِ زَيْنِ فَاتِّهُ السّبِبُ فِي ذَ لِكَ وَكُنْتُ مُضْطَحِعًا على فِو اشْي ثُمَّ البِّي نَزَرْتُ مِنْ عَلَى السّرِيرُ لِأُغْلِقَ بابَ الدّ ارفَوَجَدْ تُهٰذ ١١ أَحِما رَ فِي الدِّهْ الْمَدِ فَعَلَيْتُ أَنَّ اللهِ قَد السَّجَابُ دُعائبي وَجَعَلَهُ كَمَا تَو يُ نَصْحِكَ الكِسائيني ورجَعَ إلى مَنْزله وهُو يَكُو قِلْ مِنْ كَلا مِهِ اللَّ الَّ عَلَىٰ غَبَا وَ تَهُ وَ جَهُلِهِ

STORY.

It is related, that Kisa EE was sitting one day in his house, and heard some person call out in the street;—hear O ye people a wonder! the Ass upon which I am now riding is Kisa EE the Grammarian, let those that are absent be called that they may behold him. The Grammarian ran out in a rage, to discover who it was that had made an ass of him, and saw a tall fellow with a large head, to whom he went up and said;—pray Sir, how comes it, that Kisa EE whom we know to be a man, is turned into a brute? I will tell you says the man,—last night I offered up a

prayer to God for that purpose, in order to release "UMR from the beating of Zued," and getting up sometime afterwards to shut the door, I found this very Ass at the threshold, I therefore naturally enough concluded, that my prayer was granted, and that God had transformed him as you see. Kisalee laughed heartily at the supposed stupidity of the fellow, and returned to his house exclaiming.—" La huolu wu la qoowwutu illa billahi!"*

OF THE PREPOSITION

كاف

a. The preposition کاف, is used in the sense of آتشبیکه, or Similitude.

EXAMPLE.

كَ يَكُ كَالْا سَالِ Zued is like a Lion.

Annotation.

The Grammarian Seebuwuch with several others believe this particle to be a noun, synonymous with the word the particle to be a noun, synonymous with the word the present and the reason adduced by them for this opinion is, that it occurs in this character in composition and is preceded by a preposition. Its nominal use however they say is restricted to poetry, but the author of the Moogner-ool-Lurre extends it to every sort of composition, and gives an instance of it in common conversation, and gives an instance of it in common conversation, and it is like a Lion." Those who consider it a particle give the following reason, namely that it occurs as an expletive, which is never the case with a noun.

It has some other peculiar uses besides those mentioned by the Commentator.

^{*} عَرْقَلَة or عَوْلَقة a verb in the third congugation of increased Triliterals corresponding to the Quadriliteral radicals, possessing the peculiar power termed صحى or abreviating—it signifies على ما تعرف من "There is no power, and no strength but in God."

2. It is sometimes redundant, (زبادة).

EXAMPLE.

There is nothing like him, (i. e. God)

Annotation.

1. It is used to denote ميادرة, viz. mutual celerity, or the instantaneous occurrence of two actions.

EXAMPLE.

"Pray as soon 25 the time comes." صَلَّ كَيَّا يَدْخَلُ الْوَقْتَ

It denotes causation and is synonymous with

BXAMPLES.

"For he did not know better therefore Gos pardoned him." (i. e. Because of his ignerance.) Here it is found with the ما كا في الله عنه , or prohibitive particle.

"And remember him for directing you in the right path." وَأَذَ صَرُوا حَكُمَ الْعُدُولُمُ وَالْحُمُ الْعُدُولُمُ

Some Grammarians however believe that the particle is never found in this sense, but when joined with the عنال معدوية, but the author of the Moognee offers the following example from the Qooran, to prove the contrary. وَيَكَانَدُ لاَ يُفْلَحُ لُلْكُ قُرُونَ "And therefore certainly the unbelievers shall not prosper." It is not easy to translate the وَيُ or particle of astonishment in the above example, without losing the peculiar force of the particle —Mara ci renders it—"Pape! certè non prosperabuntur infideles." Sale—"Aba! the unbelievers shall not prosper."

It is used in the sense of الكن in answer to the question هلا الله " How are you?" Ans. على ندي نه i. e. على ندي " in health." Several of the above uses are illustrated in the following Story.

جكا يَة

حُكِى ان بعض الأُه باء كُان جَالسًا فَاتَ يُومِ عَلَى فَ صَّةِ بِابِهُ فَهِرَ فَ بِهِ الْمُورُ وَجَهِ الْمُورُ وَجَهِ الْمُورُ وَجَهِ الْمُورُ وَجَهِ اللّهُ اللهُ ا

STORY.

A man of learning was sitting one day at the door of his house, and observed a damsel passing by whose extreme beauty attracted his notice. He called out to her and said,—O incomparable pearl, surpassing in beauty all the women of this world, pray stop for a moment, that I may make known to you something that has come into my mind. The damsel upon this turned round, displaying her pearly teeth in a smile, when he addressed her and said. Truly my heart inclines towards you, and dictates the following verse.

Be bounteous of thy charms for beauty's power,

Boasts but a short and transitory hour.

She answered—How do you do, good Sir?—Here I am—why make any delay? and so saying she walked off and never returned. The poor man sickened in consequence of her absence, and continued till the hour of his death in the utmost grief and anxiety.

OF THE PREPOSITIONS,

من and من

1. THE PREPOSITIONS and are used to denote the commencement of an action with reference to past time.

EXAMPLE.

"I did not see him since Friday," in other مارأيتمنذيوم الجبعة اومنذ

"The beginning of my not seeing him was Friday."

Annotation.

In the explication of these particles, or rather particle (for they are but different forms of the same word,) Grammariana are very diffuse. They are compounded as some imagine of and if and if agreably to the authority of Akfush is peculiar to the people of Hajaz, and if to the tribe of Tunken. By the tribe of Soolymer, they are pronounced if and if the grammatical character also, of if or if has given rise to much controversy; some contending that it is at all times a noun, others that it is at all times a particle; the author of the Moognee however seems inclined to favor the latter doctrine.

AS A PARTICLE.

As a particle it is employed in three different senses.

1. With reference to the past time, it is synonymous with , as exemply fied in the Text

s. They sometimes denote the whole time.

EXAMPLE.

I have not seen him these two days, in other words,

"The whole period of my not seeing him was two days."

Annotation.

R. When the present time is intended, it is equivalent to ___.

EXAMPLE.

.46 I have not met him this day, or this month, or this year."

8. When a specific or determined period of time is intended it is synonymous with and 136.

EXAMPLE.

"I have not seen him these three days, or these five days."

AS A NOUN.

and مناه considered as nouns, belong to that class of words termed اسياء ظروف or nouns of time and place, and as such have a twofold signification, that is, they sometimes denote the commencement of time, and sometimes the phole of the period specified. In the first capacity, they are invariably followed by a definite noun in the singular number, significant of time, forming the answer to the question when? En. مَنَا رَا يَعَدُ "When did you see him?" Answer.

Annotation.

will be followed by a specific period of time, forming the answer to the question عند المنافرة المناف

The Arabic preposition of or side seems to correspond in almost every respect with the English since, which Minsheu derives from the old English sithence, and Skinner from the Latin exhinc; "e et h abjectis, et x facillima mutatione in s transcunte." A process perhaps not more extraordinary than that recorded above of the like manner, the Latin preposition post, quasi pone est, and the Greek Exerta, from exi tal post hoc, as well as the French depuise which is supposed to be corruped from post. Several of the above senses will be found illustrated; in the following Story.

STORY.

A certain man had occasion once to be absent for sometime from his wife; who loved him with the most excessive tenderness and affection; on his return she said to him;—My dear you are certainly a promise-breaker, for I have not received a line from you since your departure, although you promised to write to me regularly, and correspondence they say is half an interview. Now, I have heard nothing of you during the whole month, and you promised to return in fifteen days: the month you see is finished; this is the night of the new moon.

My soul, said he, you say right.—My intention was certainly to do so, on the day of my departure, but when I set out, my mind was so occupied, with the various

concerns of the journey that I entirely forgot my promise till this instant. On hearing this she repeated the following verses.

PARAPHRASE.

Hast thou forgotten her whose faithful breast,

With fiercest flames by love enkindled, burns;

Who veil'd in Sorrow's cold and gloomy vest,

Affection scorn'd and unrequited, mourns?

Whose Passion wakes the wildness of despair,

And mad, accelerates the hand of fate:

Farewell—Eternity relieves my care;

Death breaks affection's bonds, and ends thy hate.

She then stabbed herself with a knife she had in her hand, and died on the spot!

OF THE PREPOSITION.

is used to denote the bound or termination of interval, as applicable to time and place.

EXAMPLES.

I slept last night till the morning.

I perambulated the town as far as the market
إسرت البلاد حتى السّوق place.

Annotation.

This word is considered by all the Arabian Grammarians as a particle, and in this capacity has three distinct offices: 'these, as of little importance, I shall not here comment on, but content myself with a few observations on its practical application.

2. It is used in the sense of concomitance, or companionship.

EXAMPLE.

I read my portion of the liturgy, along with the prayer.

3. It has sometimes an inclusive signification.

EXAMPLE.

I ate the fish even to the head, i. e. head and all.

Annotation.

It is used in the sense of Example from the QOORAN.

- These are the men, who say, do not bestow any thing, on those who are with the apostles of God, that they may be obliged to separate from him."
- 2 It is sometimes, though rarely, found synonymous with 3; as exemplified in the following verse.

- 66 There is no liberality in the gifts of the prodigal, but there is in you, who possessing but little, will yet part with it."
- 3. occurs as a conjunctive particle synonymous with , and as such requires to be followed by a noun apparent or expressed.

EXAMPLE.

" I beat the tribe and Zued also."

4. It invariably governs a noun apparent or expressed, (البر أَفَا هُر) in opposition to the preposition والعن ألم though we do الكيّه "to him."

Annotation.

4. When the word preceding is governed by a preposition, the preposition must be repeated with the word which follows it.

EXAMPLE.

STORY.

It is related that a certain Theologian saw the Devil one night in his sleep, and said to him, O accursed, how long will you continue to exercise your wiles on the understandings of mankind? Till the day of judgment, replied Satan, and I have so artfully arranged my plots as to secure success in all my schemes against them. But what is your opinion said the other with regard to Theologians, do you think they will be admitted into heaven unexamined? No, no, said the Devil, by no means, on the contrary, they shall be given to drink of purulent matter,* and shall taste the bitterness of the damned, after this life. He then spit in his face, and the divine roaring out, awoke in a fright.

OF THE PREPOSITION,

אב. The Preposition وأو , is used in swearing, (בَسُمُ) but is restricted in its application to a noun apparent or expressed.

EXAMPLE.

By Gon, I will never drink wine. والله لاأشربَنَّ الخمرَ

Annotation.

The Grammarians of Koofuh believe that of is occasionally synonymous with , as in the enample adduced by the Commentator in the text; but the author of the Moognee, asserts that in all such cases it is invariably a conjunctive particle, and that the government of the word immediately following it is occasioned by understood. The preposition of the word immediately following it is occasioned by is properly a particle of swearing, the latter however may or may not at discre-

He then vanished from my sight, and I saw no more of him.—O Lord protect us from him!

OF THE PREPOSITION.

Annotation.

The author of the على Zoo, (a well known Commentary on the مصياح Miseae) believes that the particle إلى, as used in forms of adjuring or obtesting, is exclusively appropriated to the word سال, and the language of the text seems to favor this opinion; but the author of the Moognee, whose authority on all grammatical questions may be considered decisive, admits of no such restriction in its application, and says it may be prefixed not only to the word الله but also to the various epithets or attributes of God, as رَالرَّهَا لَهُ رَبُّ الرَّهَا لَهُ رُبُّ الرَّهَا لَهُ رُبُّ الرَّهَا لَهُ اللهُ but also to the various epithets or attributes of God, as رَبُّ الرَّهَا لَهُ اللهُ عَلَيْهُ اللهُ الل

The Arabian Grammarians consider و الله على مع the substitute of الله على مع as the substitute of الله على مع again as the substitute of الله على مع again as the substitute of و الله على مع مع الله على الله

The particles of swearing are און, כולי, כולי, כולי, און, and של, but the three first are of most frequent occurrence. און, like ווא, is said to be the substitute of and is never found prefixed to any word but שנים is almost invapiably prefixed to cy, 'my Lord,' as שנים by my Lord, but is occasionally though very rarely found also with

By Gon Zued most certainly stood. وَاللَّهُ لَاَفَعَلَنَّ كُذَا By Gon I will certainly do so.

5. If the sentence be negative, (منغيّنة) and the verb in the past time, it will be preceded by the particle لي

EXAMPLE.

The Grammarian Seebuwere, is of opinion that of or is an original particle of swearing synonymous with is, but others imagine that is an abbreviation, or contraction of an oath; and that is immediately derived from is, the plural of others, from happiness, felicity.

The word رايع occurs under seven various forms, viz. وربياً وربيًا وربيًا وربياً وربياً وربيًا وربيًا وربيًا وربيًا وربيًا وربيًا وربيًا وربيًا وربيًا وربي

Besides the above particles there are some nouns, such as the life, age, &c. [ii, duration, continuation; the book, i. e. Qooran; the temple; an oath; and happiness, or the pl. of an oath, which are used in solemn forms of swearing.

OF THE PREPOSITIONS.

عَدَا and اخْدَ ، حَاشًا

1. The prepositions, اَ عَمَا and اللهِ and اللهِ , are used in the sense of exclusion or exception, (استثناء).

EXAMPLE.

جَاءَنِي الْغَوْمُ حَاشَازَيْدِ The tribe came to me (all) except Zued. و خَلَا زَيْدٍ و عَدَا زَيْدٍ

Annotation.

The prepositions () A and () considered either as words or particles, are every where used to denote the same idea, namely exclusion, or exception. As prepositions they govern the noun in the aorist, and as verbs in the accusative or objective case. See buwer indeed with most of the Busruh Grammarians deny the verbal character of (), and contend that it is invariably an exceptive particle, while the grammarians Huruber, and contend that it is invariably an exceptive particle, while the grammarians if I Huruber, and objective particle, while the grammarians if Furral, about I have Sheet and others, concede the point, but consider it as indeclinable. This however is contradicted by the author of the Mooghnee, who proves it to be regularly inflected like other verbs, as follow.

Suerse:

I perceive none among the people,

Nor do I distinguish any in the tribe equal to him in action.

It is difficult to assign any determinate signification to the word 325 in the above verse, though there can be little doubt that some specific sense is intended. It may perhaps be worth

remarking that it occurs once in the Quoran in a sense apparently equally absolute, which the expositors have thought necessary to comment on.—The passage is as follows:

Which Sale has translated thus,—" one of them spoke and said, slay not Joseph, but throw him to the bottom of the well, and some travellers will take him up if you do this." In which he appears to have followed Manacci, as indeed he very frequently does, who renders the phrase where it is fueritis hoc facientes," The Commentators on the Quoran, aware of the general sense of the term, have accordingly proposed various interpretations, the most approved of which seems to be that of which seems to be that of which seems Kashuper—who says the word be in the above passage must be rendered, acting with prudence and deliberation, the sense will then be—"Do not slay Joseph, for by that you will draw upon yourselves disgrace and reproach; but if you act with prudence and deliberation, cast him into a pit by the road side, where he may be discovered and taken out by travellers."

Annotation.

In the first sense it occurs in the following passage in the Qooran, I which Maracer renders,—" Proh deum, non est hic homo!" And Sale copying, or rather translating the Latin,—" O God, this is not a mortal!" The phrase means properly "God avert," Avertar Deus, hence the common expression of a will absit a te, in some respects resembling the Latin salutation Salvus sis. In its second or exceptive signification it is Synopymous with said and and exception, I excepted, or rejected him.—In this two-fold capacity of salutation and exception it resembles the English save, in the equivoque of Chauser's Sompaour against the Friar.

"God save you all, save this cursed FRERE."

The author of the Mooghnee however on the authority of ابن مسعود Isno Muscon, (one of the seven readers of the Qooran) reads the sentence خاشالله, with the tunneen, and asserts that الله is here a noun in the objective case, the verb خَاشَيْت being understood, as خَاشَيْت وَرُونُ مَنْ لَا مُعَالِّمُ وَمِنْ الله وَاللّهِ وَاللّهُ وَالّهُ وَاللّهُ وَالل

The Arabic word quimees a tunic, xiture, is found with little variation in several languages; thus in French, chemise; Italian, camiscia; Spanish and Portuguese, camisa; Hindes kumeez, and Bengalee kumiz. Like its Synonymes in English and Latin, namely shift, and pratexta, it seems to have an equivocal meaning, and was a dress peculiar to Arabian devotees.

[I made religious admonition a net.] This will remind the reader of a similar metaphorical expression in the new Testament (See Math. Chap. 4. v. 19. and Mark Chap. 1. and v. 17.). καὶ ποιήσω ὑμᾶς ἀλιεῖ; ἀνθεώπων, and I will make you fishers of men.

judicious selection of the objects of enjoyment, that he may lead a life of unmixed pleasure.

CONCLUDING REMARKS ON THE PREPOSITIONS.

The preceding view of the Arabic prepositions, will be found to contain almost every thing essentially useful. The Annotations are intended to convey a more precise and accurate notion of their extensive force, and the Stories and Extracts will illustrate their practical application to the purposes of speech. Mignite discussions on their orgin and grammatical character, I have purposely omitted, not that I consider such discussions, as either useless or uninteresting, but that I am disposed to believe they are unsuitable to the nature of the present work. Theoretical disquisitions are good in their proper place, but they are not in their proper place in an elementary treatise, which should aim rather at the illustration of specific rules, than the discovery or examination of abstract principles.

CLASS SECOND.

1. The second class contains six words, termed or particles resembling verbs, which precede in construction both terms of a proposition, governing the Subject in the accusative or objective case, and the PREDICATE in the NOMINATIVE, viz.

. لَعَتَّى , لَيْتَ , لَكِنَّ , كَأَنَّ , أَنَّ ، إِنَّ

Annotation.

The particle governs generally the subject of a proposition in the accusative or objective case, I say generally, for examples are produced in which it is supposed to govern both terms in the accusative. The following examples may be sufficient to illustrate this.

Approach at night when darkness spreads her sable wings, But let your steps be silent and cautious, for our centinels are truly Lions.

In which the words and and and contains the subject and predicate, are both rendered Munsoof

And in the following example from the in or traditionary records of the Prophet.

" Verily the depth of Hell is equal to a seventy years Journey."

MILTON in like manner measures space by time.

A Nine times the space that measures day and night To mortal men."

It is worth remarking that the three great Poets, Homen, Virgil and Milton, have all exerted themselves in extending the idea of the depth of hell. Homen makes it as far beneath the deepest pit of earth, as the beaven is above the earth. If. viil. 16. Virgil twice as far, Æn. vi. 578, and Milton thrice as far; their efforts are commendable no doubt, but not to be compared with the more magnanimous flights of a modern Bard.

2. Of these, the two first, namely [] and [], are used, to verify, or corre-

It must be remembered that instances of the above government are by no means numerous, and that grammarians have accounted for the anomaly on other principles, which however I do not deem of sufficient importance to repeat.

The word governed by [, is sometimes a pronoun understood.

The Arabian Grammarians will not allow the pronoun in the above verse, to be the word governed by the particle, but a understood, viz. of for in the above verse, to be the word governed by the particle, but a understood, viz. of for in the above verse, to be the word governed by the particle, but a understood, viz.

such instances it must be translated negatively, example "" Zued is not but going." But this it may be presumed is a distinction, without a difference, for, " Zued is not but going," and " Zued is certainly going," convey in fact the same meaning.

OF THE PLACE OF US IN COMPOSITION.

Grammarians have assigned the following five places to e in composition.

- 1. It commences a sentence, as الْنَا وَالْمُوا مَا اللَّهُ Zued is certainly standing."
- 2. It follows the various tenses derived from كَوْ الْ اللهُ عَلَيْهِ لَا إِنْ زَيْدًا قَالِم عَلَيْهِ عَلَيْهِ اللهُ عَلَيْهِ عَل
- 3. It occurs after the relative pronoun, as مَاءَ الْذَي لِي الْمَالِي الْمُعْلِي اللَّهِ عَلَيْهِ عَلَيْهِ اللَّهِ عَلَيْهِ عَلَّهِ عَلَيْهِ عَلَيْه
 - 4. It is found in that sentence the predicate of which is preceded by the y of corroboration.

5. It precedes the جُوا مِهُ التَّسَع as already explained.

EXAMPLE.

"By God Zued is certainly standing." وَاللَّهُ إِنَّ يُعْدُاقًا كُمْ

OF THE DERIVATION OF ...

The Arabian Grammarians have amused themselves in tracing the origin of this word, but have produced nothing satisfactory. Their principles of derivation, if indeed they can be said to have any such principles, are so whimsical and extravagant, that it may be doubted, whether they can be matched by those of our most fanciful European Etymologists. They seem to pay little regard to the original sense of the term, from which a word may be derived, and make no scruple to refer it to any word, or indeed to any phrase, provided

4. The fourth is in the grammatical sense of inthe first branch of a compound to explain some uncertainty supposed to exist in the first branch of a compound proposition, it can therefore only occur between two sentences, distinguished from, and construsted with each other, by reason of some opposition contained in them, or denied by one of them.

they are able to point out by the laws of permutation, the causes by which such a change may be legitimately effected:—for instance they derive the word [1], (but,) from the sentence [1], (but,) from the sentence [2], (but,) from the sentence [2], (but,) from the sentence [2], i. e.—"whatever may happen,"—or,—" in whatever state things may be," by rejecting the last three words and subjecting the remaining one, ([4]) to all the evolutions of grammatical change. By some grammarians [1] is supposed to be compounded of the negative particle [1] and the first personal pronoun [1], as the Arabs are known occasionally to mke use of the expression, [1], equivalent to [1], "I am not standing."

is also a verb and its derivation is accounted for in seven different ways.

- 1. It may be the 8d pers. plur. fem. of existing, weariness, as in the example will, i. e. The women were fulgued," the original form of the word will having undergone the necessary changes established by the laws of permutation.
 - 2. It may be referred to of originally of vicinity.
- 3. Or the 3d pers. mas. pret. pass. from gif complaining: being originally in the pass.

^{*} This is perhaps as happy an Etymology as King Parin, from the Greek δοπες. Thus, δοπες ήπες -- όπες -- Diaper -Napkin-Nipkin-Pippin-King-King Parin. See Div. Purley. Vol. 1, p. 130.

5. The fifth is رَيْبَ , and is used to denote supplication, or wishing, (دُنْبَدُنْ).

EXAMPLE:

Annotation.

- 4. Or the 2d pers. imp. act. voice, from the same verb. 2 being originally 3:11.
- 5. The 3d. pers. plur. fem. imp. act. voice derived from وَرَبِ Synonymous with وَرُبِ بَالِيَ عَالَمُ اللَّهِ عَلَى اللَّهِ عَلَى اللَّهِ عَلَى اللَّهِ عَلَى اللَّهِ عَلَى اللَّهِ عَلَى اللَّهُ عَلَى اللّ
- 7. And lastly it may be 3d pers. sing. imp. fem. with the Noon of corroboration, from the root of promising, stipulating, &c.

Annotation.

You had better give her something to drink continued Zoosuer—I am not come to you exclaimed the other (in a passion), to solicit medical advice, but to ask for assistance.—The curse of Gon on the camel that brought me to you! OF THE WORD & S.

The true origin of this word seems little understood, though I believe it is generally considered by the Arabian Grammarians as compounded of the particle of or Kaf of similitude, and the particle of;—the original construction therefore of such a sentence as of or kaf of similitude, if the original construction therefore of such a sentence as of or kaf of similitude, and the particle of;—the original construction therefore of such a sentence as of or kaf of similitude, and the particle of the above theory, or kaf of similitude, and the particle of the above theory, or kaf of similitude, and the particle of the above theory, or kaf of similitude, and the particle of the above theory, or kaf of similitude, and the particle of the above theory or kaf of similitude, the chief object in the mind of the speaker on all such occasions being similitude or comparison, he would naturally commence the sentence with a word expressive of such similitude, thus of the word and hence with the slight change of Kusruh into Futhu, would eventually be produced the word the author of the Mooghnee however rejects this theory and considers it, as an original macompounded particle.

OF THE WORD

FURNAN is of opinion that we is compounded of will (with the Noon quiescent,) and the particle is;—viz. with the Hanza being removed, suphonize gratia, and the Noon rejected in consequence of the junction of two homogeneous letters under the sign Idgham. This however is contrary to the doctrine of the schools of Basruh, who consider it an uncompounded primitive. On the other hand the grammaritue of Koofuh, maintain that it is a compound of the negative X, and will, the intervening Kaf, being an expletive;—thus,—will, the Kusruh, of Humzu, is transferred to Kaf, after rejecting the vowel point of the Humzu, and the pleonastic letter being omitted leaves with will, so that in the sentence would be synonymous with will, but Ruzzz rejects the etymology on the plea that by this change, the sense of the sentence would be entirely altered, converting a discretive or adversative proposition into a conjunctive, both members of the compound being thereby rendered negative.

The word is also written with a single Noon, quiescent thus but grammarians seem divided in opinion, whether it should be considered werely as a different form of independent primitive; it is frequently accompanied by the conjunctive particle, the insertion or omission of which is guided by sundry conditions which I omit recording, as unprofitably minute.

OF THE WORD أَيْتُ

There is little to be remarked of the word Live. It is used to express desire or volition, and seems to correspond with utinam or O si!* in Latin, and wish, or would, in its optative and imprecative acceptation, in English. The Grammarian Furran contrary to the general opinion, says it governs both the subject and predicate of a proposition in the objective case, and quotes the following as an Example.

It occurs in the following beautiful verse of SHUERR SU, UDER in the 19th Story, and 6th Chapter of his Goolistan.

VERSE.

From these dear scenes that round my mistress sise, Sad strains of sorrow wake a lovers fighs;
Could they but learn, the Doves would feel my woe,
And soothing notes of sympathy bestow:

And idly jests at unexperienced pains,
Be this your answer—Oh, may heaven impart
To thee, acquaintance, with a lover's heart-

and occur together in composition, after the manner of O si in Latin, in the phrase, "OsH O sil Otiosi. Wishers and woulders are never good house-holders."

Sir William Jones, has quoted these lines in his history of the Persian language, in a manner that destroys the versification, and embarrasses the sense, by the introduction of the conjunction , in the second, and of in the commencement of the fourth line; as the measure terminates on the penultima of the word in the final syllable of which, (i. c. i. 5), by the figure Dialysis,* must in reading be made to commence the following line, thus:

He has also mistaken the sense of the two first lines, taking the relative of a negative particle, and the word for a turtle-dove. The word with the first letter Mukroor and the second Muftook, signifies properly a meadow, the recort of fames, and is hence transferred to denote the abeds of beautiful damsels, (with the first letter Mukroor and in the second line, with the first Muftooku and Mean Mukrooru, is a contraction of fame, (and not as Golive says, of the plural fames) the generic term for pigeon, of which is the first line plural of fig., like fames of fames of fames are to have been copied from Grantius, who has himself overlooked the true sense of the lines, translating in the first line delicium, and in the second campestrie, thus:

45 Illud quod de mentione delicii ad auras meas pervenit, Si turtur quoque campestris, audiret, mihi congemeret."

expressed in the first line. In some copies of the Goolistan على is found instead of in the first line. In some copies of the Goolistan على is found instead of in the first line. In some copies of the Goolistan على is found instead of in the first line. " Say to the intelligent &c." With this reading, the particle would be required in the next line to complete the measure. It may be observed in the above example,

المر شور مل word thus divided is said in the property of the Arabe to be مر شور ما litterally pledged

that is a common ellipsis in poetry, a noun or pronoun being understood. Some copies read instead of which has nothing to recommend it. The author of the Mooghnee quotes the following example in which is followed by a verb, zelustication which would to God you would banish from me grief, even for a moment." In which the second personal pronoun is understood.

CONCLUSION.

He restored, amended or repaired, as in the phrase fraise it makes to but in English by Horne Tooke,—namely to boot, superadd, &c. The latter sense namely reparation, or restoration, appears most suitable to the grammatical term fraise it were, of some doubt or uncertainty originating in the first branch of a compound proposition which meaning may be illustrated by the ingenious remark of the Abbè Sicard. Ainsi, après l'énonciation d'une première proposition, trouwant un obstacle, ou un empêchement à l'exécution de ce qu'on vient de dire, on semble avertir l'auditeur on le lecteur qu'il faut s'argêter; on lui diroit, en Latin, sede (sed) arrêtez: il ya ici une restriction, un changement

The application of the various words in the second Class, will be found illustrated in the two following Stories.

3 T O' R Y.

A scholar whose understanding was none of the brightest, asked his master one day regarding the Service Letters. The master replied, Saaltoomooneeha, (i. e. you asked me that before). The scholar not comprehending the drift of

MAIS he derives from the Latin Magis, and says it is an old adverb Synosymous with Plus, as in the phoses " He n'en year MAIS, for Jen'en peux Plus, and in the following verse:

[&]quot;Pourquoi de vos chagrins, sans cesse, à moi vous prendre?

[&]quot; En puis-je Mais de soins qu'on ne va pas vous rendre?"

the reply, (which infact included the whole of the Servile letters), said, I attend you regularly every day but never remember asking you any such question. The Shuekh replied, Alyuom tunsao, (i. e. to day you forget). No, said, the student, I do not forget. O blockhead! exclaimed the master, what, you are still in the dark! I heartily wish you were changed into an ass, for I have told you them twice. The scholar on hearing this was ashamed of his want of comprehension, and returned home, repeating, as he went along. Would that the Almighty, had granted me capacity.

حكاية

A certain King of Persia had grown so excessively fat, that though naturally of a graceful form, he resembled in size more an elephant than a man. His Physicians in consequence tried various expedients to reduce his enormous size, but their efforts had no other effect than to encrease it: in this state, a certain eminent Physician waited upon him, and said, I will undertake to prescribe for your Majesty, provided you allow me three days to consult your horoscope, and determine on some medicines suitable to your case; perhaps through the aid of the Almighty I may effect your recovery. At the expiration of the time required, the Physician waited upon the King, and said, I have consulted the aspect of the stars, and observe that you have but four days more to live: when I saw this your approaching destiny, I was much troubled, would to God I had not seen it. If you doubt my words, let me be confined close to you and treated agreeably to the event of my prediction. Then the King gave orders for his confinement, and began to prepare for death, discarded all his former amusements, excluded himself from the eyes of mankind, and

resigned himself wholly to sorrow and affliction; and his grief increased daily. And when the appointed day arrived, the King called the Physician before him, and spoke to him on the subject. The Physician replied, I made use of this stratagem, in order to reduce your corpulency, for I knew that until this occurred, no medicines would be of any avail, but now I may prescribe to you with effect. Then the King ordered him a dress of honor, and gave him a suitable reward.

CLASS THIRD.

The third class, contains two particles, which resemble the imperfect verb , possessing like it a negative signification. They precede both TERMS

Annotation.

OF THE GOVERNMENT OF

of Hujaz, Nujd and Tehama however, whose authority as inhabitants of Arabia proper, may be reckoned decisive, consider it in almost every respect as Synonymous with the imperfect verb بريسيّ First as it denote like present negation; and secondly as it may precede indifferently a definite, or indefinite noun, and admit the predicate in the sentence in which it is employed to be accompanied by the particle بريسيّ the subject in the similarity of sense originated its similarity of regimen, governing like بريسيّ the subject in the mominative, and the predicate of a proposition in the objective case; with these functions it is employed in the Qooran, and as the Qooran was immediately revealed to the inhabitants of Hujaz, it has acquired among grammarians in consequence the general appelation of ما العبيان By the tribe of Tunzem it was considered a simple negative particle, without any government, and as such was contradistinguished from the other by the term

As a grammatical agent, it precedes both a definite and indefinite noun, but most frequently the former, guided however by sundry conditions, the non-observance of which entirely destroys-its government.

of a proposition, and govern the noun or subject in the nominative, and the predicate in the objective case.

Annotation.

CONDITIONS ATTENDING THE GOVERNMENT OF L.

1. In the sentence in which it is employed, the PREDICATE must not precede the suspect in the order of construction, otherwise its government is cancelled.

EXAMPLE.

The subject must not be preceded by the particle of, as an expletive.

EXAMPLE.

3. The word or sentence immediately connected with the predicate, must not precede the moun of (i, i), in the order of construction.

EXAMPLE.

If however the Jose be a Zurf, or a noun in regimine, the government will be preserved.

EXAMPLES.

Zued is not standing near you. مَا عِنْدِكُ زُيْدُ مَعْيَهَا You are not my assistant.

^{*} To preserve the government, the natural order would be stupid, and I suspect faulty.

Of these is used indifferently with a DEFINITE or INDEFINITE noun, is with an indefinite only.

EXAMPLES.

"Zued is not standing." مَا زَيْدٌ قَارِّياً "No man is ingenious."

Annotation.

4. The particle 31 must not precede the PHEDICATE, otherwise the government is destroyed.

EXAMPLE.

The word La as a relative, indicative, prohibitive, and interrogative particle, has a great variety of senses, attended with numerous grammatical distinctions, which cannot well be detailed here.

OF THE PARTICLE &.

The resemblance subsisting between Y and the defective verb , is considered by Ibnook Hajib, in his Commutary on the Kapera, as inferior to that of as it is not formed like it peculiarly to denote present negation; is seldom found with a definite noun; and cannot be used in a sentence the predicate of which is preceded by , as an expletive: for these reasons it possesses a much more limited government than , and some grammarians go so far as to deny it any government but in postry. As an Agent however it is guided in its application, by the same conditions already recorded of , with the exception of that relating to , as a redundant particle preceding the predicate, in which form of construction it can never be employed,

א preceding an indefinite noun has the force of a Universal negative, as in the example "المرجل في الدار "No man is in the house," and this I presume is what the Arabs understand by the term نَفُولُ الْعَالِينُ when applicable to this particle.

As grammarians however have observed a nice distinction between y in the character of and y when synonymous with the verb is and y when synonymous with the verb I shall endeavour to state in as few words as possible, the grounds upon which they suppose this distinction is founded.

The term المنافق signifies literally negation of the genus, and as applicable to the particle y in such a phrase as المركز أول المالية (conveys a total denial of every individual comprised in the general term المركز أول أول المالية (conveys a total denial of every individual comprised in the general term in i. e. "no man is in the house;" and is therefore properly distinguished from y when resembling the imperfect verb المركز المركز والمركز والمركز

It must be observed in the above example, that the noun of Y in the character of the conditions already specified) is assumes over its final letter the indeclinable mark fulhu, whereas in its verbal capacity, it governs (under the conditions already specified) the subject in the nominative, and the predicate in the objective case: this the Arabian Grammarians account for in the first instance, by supposing an Ellipsis of the preposition or the comprehensive Min, in such a sentence as the following, termed ومن المعادلة والمعادلة و

The particle as a Universal Negative has the same government as in provided, first that the following noun, or noun affected by the negation, is connected with another word in the acrist case, i. e. in regimine, or has any connexion of a similar nature to a noun in regimine.*

EXAMPLE.

In regimine. لاَ صَاحِبَ جَوْدٍ مُوجُودٌ No man of liberality is now existing,

Resembling a noun الأخير امنى في الله نيا (There is none better than me in the world.

is the common responsive negative and is directly opposed to as in the following elegant

At I saw a fawn upon a hillock, whose beauty eclipsed the full moon; I said, what is thy name? she answered Deer. What, my Dear? said I, but she replied, No, No!"

It is impossible to preserve in a translation the delicate play on the words . XX.

The first means literally a pearl, the second a repetition of mine, or for me, and the last a reduplication of the negative no. This species of paronymous composition is very common in the writings of the Persians and Arabs, and seems to have been practiced occasionally by the ancients: Vossius in his rhetoric has given numerous examples of the paronomasia from the Greek and Latin poets, others will be found in Aulus Gellius, Plautus and Ennius, &c. which the reader if inclined may consult with pleasure. In the mean time I shall content myself with offering a quibble of rather a different description, the effect depending entirely on the ambiguity of homonymous words.

مضارع للهضاف or شبعة الهضاف Any word connected with another so as to render the sense complete is termed,

Α΄νής τὲ καὶ οὐκ ἀνής, ὅςνιθα κῶκ ὅςνιθα ὅ ὅμως, ἐπὶ ξύλε κε ξύλε καθημενην, λίθο τὲ κε λίθο βαλῶν διώλεσεν.

Vir non vir, avem nee avem tamen, in arbore non Arbore sedentem, lapide non lapide feriens interemit;

That is—A man not a man, casting a stone not a stone, Killed a bird not a bird, sitting on a tree not a tree.

By the first (in the order of the original), is meant a cunuch or hermaphrodite, the second a bat :*

the third the sambucus or elder-tree, + and the latter the pumice stone, about the nature
and origin of which naturalists are not agreed.

OF THE PARTICLE SX

One peculiarity attending it is, that in the sentence in which it is employed, either the subject, or predicate must be understood; the common practice of the language seems to authorise the rejection of the subject, as

This is not the time for flight." In which with it is understood, but on the other hand several grammarians contend, that it must be the predicate. The point is not worth discussing, and therefore we shall let it rest.

by some is derived from the infinitive گُتُ loss, damage, Synonymous with بَعُنَى and is regularly declinable as يَلْيَتُ لاَتَ. This derivation is plausible enough and is attributed to مَا مُرْدُ مُنْ مَا اللهُ الل

^{*} Locks says it was long seriously disputed whether a bat was a bird or not-

⁺ This is the interpretation given by Suidas, and may perhaps be disputed.

Others again refer it to in the past tense, the Fa being changed into Utif, and into into these letters being considered proximate representatives of the same sound.

ביים על פיים על וואס Oburduh, and של אונים Ibno Tuniwum, imagine it to be compounded of y and the letter ביים redundant in some other word, as in the following example from the Quoran, it belongs to the verb ביים, it belongs to the verb ביים, and must have been joined to the word שביים by the carelessness of some transcriber. It is written thus erroneously in Maraccí. The author of the Mooghnee has entered into minute details regarding its government and the conditions attending its government, but they do not appear to me of sufficient importance to transcribe.

mentary, indeed it is to be feared I have already explained more than is necessary, I shall therefore close this annotation, with one or two miscellameous remarks.

The intensive or corroborative negative which in Greck is effected by two or more negatives is provided for in Arabic, by a peculiar form of conjugation i. e. by the adjection of the prohibitive x and Noon Sukeela subjoined, as with the first that the certainly not strike." But this it must be remembered is applicable only to prohibitive forms of expression. It is curious to observe the concourse of negatives in the following passage from Demosthenes, Οὐδέποτε οὐδὲν οὐ μιὰ γένηται τῶν δεόντων. 'Nothing that is necessary will ever (or never) be done,' which however is not more remarkable than the following attributed to a cockney who had lost his hat—"Did mobody see nothing of never a hat no where?"

The particle in almost all its various, and even opposite relations, bears a striking resemblance to the Greek Min, as x and idea to où; to illustrate the latter remark, I shall offer the following little extract from Plutarch as quoted by the Messieurs De Port Royal, not indeed so much for the purpose of clucidating a point of comparatively no importance, as to introduce to the reader two very successful and spirited versions of the original into Anabic, by Shuzza Unxed, a learned native of Yemen, at present attached to the College of

Fort William. The first is in prose, and will be found literal and elegant; the other is in verse, and in verse of a very sweet and harmonious texture, which aided by the solumn recitative of Arabian enunciation, has a confess on my ear, a very melodious effect.

He who is on land, is not afraid of the sea;
He who does not go to was, is not afraid of battle;
He who stays at home, fears no bighway man;
He that has nothing to lose, is not afraid of informers;
He that is in a private station, apprehends no envy;
He that is in Galatia, dreads no earthquake and
He that is in Æthiopia fears neither thunder nor lightning:

But he that dreads Gon, as his enemy, startles at every thing; the land, the sea, the air, the heavens, darkness, light, noise, silence, and his very dreams, are all dreadful to him.

STORY.

A certain Chieftain of the tribe of Bunee Ajil, had two sons, one of whom was rich, the other poor. To the rich one he was kind and partial, to the other indifferent. He was asked,-why do you slight and neglect your son, a son on whom the Almighty has placed a crown of excellence and accomplishments? Wealth you know is transitory, it comes to-day, and leaves us to-morrow. The old man replied. He can be of no service to me-if he possess accomplishments they will be of service to him: as for my other son, I am partial to him from necessity, and he has no occasion for any thing of mine, as the poet has justly said.

DISTICH

Lhave observed that men incline towards those who are rich, But decline all connexion with those who have nothing.

CLASS FOURTH.

The fourth class, contains seven particles, which govern the noun in the OBJECTIVE Case, viz.

Li The Particle of synonymous with

EXAMPLE.

The water was equal with the wood.

Annotation.

The Particle , , as synonymous with is like other Particles a subject of controversy with Grammarians, some contending for its government, and others denying it, and both parties producing says the government usually assigned to j', is properly owing to some preceding verb, either expressed or understood in the sentence, as in the example "أسرت وزيدا 'I travelled with Zued.'

It always in the above sense, denotes society or companionship, and is found to occur three different ways in a sentence.

1. It is preceded by a verb, as سرت وزيدا I travelled with Zued? Or by a word resembling a verb in sense, as, مَالَكَ وَزَيْداً i. e. مَالَكَ وَزَيْداً What are you doing with Zued?

2. استثناء or exception, in two ways. The first is termed متصل or homogeneous, and signifies in its grammatical sense, that the or word following the Particle of exception, is of the same species, or homogeneous with the مستثناء or word preceding the Particle.

EXAMPLE

The tribe came to me, except Zued.

The second is termed منقطع and signifies that the منتثنى and signifies that the منتثنى and signifies that the منتفطع must be heterogeneous or dissimilar in their nature.

EXAMPLE.

The tribe came to me except the Ass.

Annotation.

- 2. By a Participle active, as, [i] I descended, or went down with the Nile.
- 3. By a Passive Participle, as, اَلْنَاقَةُ مُدَّرُوكَةُ وَفَصِيلُهَا The Camel is let loose with her young one.

The Particle & is used in the sense of is considered synonymous with the following words:

Of the above synonyma أَوْ سُوا is written in three other different ways, namely يَرُو أَنْ اللهُ الل

The word is a Passive Participle, and means literally excepted or excluded.

The following words, viz. اَلَهُ رَقَ الْفَدُو الْفَدُو أَلُو الْفَدُا عَلَى الْفَارِةُ الْفَدَا are called or vocative particles, and are used in the following manner:

Whether the object addressed is distant or near.

When the object is distant.

when the object is near.

The above five Particles, when they precede a noun in regimine, govern the or Governing Noun, in the accusative or objective case.

EXAMPLES ..

يَا عَبْلَ اللَّهِ O slave of God, (or as a proper name)
O Abdoolsh!

Annotation.

That from which the exception is made. may be translated homogeneous: heterogeneous; the Grammatical distinction between these terms is obvious and useless, and requires no further explanation.

The men came to me all but Zued; or a mount of multitude singular, as أَنِي الْقُومُ الْا زَيْدَا:

'The tribe came to me all but Zued,'

The is rendered Nusub, or governed in the objective case, after the following order:

1. When found in an assertive sentence, viz. in a sentence neither prohibitive, negative, nor faterrogative.

EXAMPLE

The tribe came except Zued? جَا رَنِي الْقُومِ الْآزُيدُ ا

2. When the firm precedes the pricedes the

O Boy of Zued!

O Boy of Zued!

O thou who art noble in thy tribe!

O most excellent of the tribe!

O slave of God, or (O Abdoolah!)

But when the noun following them, is not in regimine, it receives the vowel; mark رُنُع without the Tunween.

EXAMPLES.

O Zued! يَازَيْدُ O man! كَارَجُلُ

Annotation.

EXAMPLE.

وَمَا لِيَ الْآ آلَ اَحْهَدُ شَيَّةً .ومَالِيَ الْآ مَشْعَبُ الْحَقِّ مَشْعَبُ

* I acknowledge no other tribe, than that of the Prophety.
And follow no faith, but the true one.*

- 3. When the ginn follows either Nich or Jack
- لاَ يَكُونِ or لَيْسَ follows either لَا يَكُونِ or لَيْسَ

There are a variety of other minute rules regarding is and its government, which I pass orem

OF THE VOCATIVE PARTICLES.

The author of the Moognee, says the Particle of may be used without any respect to the proximity or distance of the object addressed;—Is of more general application than the other

Annotation.

Particles, and is occasionally understood in a sentence, as يوسف أعرض عن هذا O Joseph let this alone, or refrain from this! It is alone applied to the word مَرْتُهُا and to الله and to الله and to الله and to الله and feminine.

The Particle أيًّا is supposed to be originally إيًّا the Humza being changed into أيًّا

The Person or thing addressed is called the منادي which is considered a species of the بمنادي which is considered a species of the بمنادي and is always invoked, by one of the vocative Particles in the sense of the verb رُدُعُو ' I call or invoke.'

The various Particles in the fourth class are illustrated in the following Arabian Tale.

A man of learning went one day to the house of a Grammarian, who happened at the time to have a boy before him reading Syntax. The learned man stopped at at the door to hear the boy read, and heard him say to his master. 'O Sir, when I say," " all the people went out but Zued." and am asked—why did not Zued go out also? What answer should I give? Say, replied the master, that he was busy beating Amn. Very well, said the boy: but when I say,—" the tribe rose up all but the Ass," and am asked—why did not the Ass rise up too? What should I answer? Answer, said the pedant, that he was busy eating grass. Good, said the boy—and when I say—' the General came along with the army,' and am asked what brought the General along with the army? What should I say? Say, said the schoolmaster, they are come by order of this gentleman (at the door,) to flog me.— On hearing which the boy uttered a shriek—exclaiming—protect me, O followers of Mohummed! O father! O brother! O people! hasten, hasten, to my assistance, for this man at the door, is certainly mad, and has given orders to have me beaten, and out he ran. The man laughed heartily at both of them, and went about his business.

CLASS FIFTH.

The fifth class contains four particles, which render the final letter of the Aorist Tense viz.

اِكُنْ كَيْ لَنْ أَنْ

1. The Particle of prefixed to the Aorist, restricts it to future time.

EXAMPLE.

I hope you will rise.

Annotation.

OF THE PARTICLE

The Particle with the Humzo Muftosh, and Noon Quiescent, as explained in the Text, occurs both as a Noun, and a Particle.

As a noun it is supposed by the author of the Mooghnez and other Grammarians, to be equivalent to lif the first personal pronoun, as is if I did,' and in other cases to the second personal pronoun, in the words is if I is if I is where the termination is merely indicative of gender or number.

As a Particle it is used in four ways.

from the circum-stance of its being prefixed either to the AORIST, or PAST Tense, and sometimes even to the IMPERATIVE, as المُعَمَّرُ الْمَا الْمَالْمَا الْمَا الْمَا الْمَا ا

Its pronour, is generally rejected in composition, but sometimes expressed, as وَالْوَازِبُ وَالْمُ الْمُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُوارِدُونَا الْمُورِدُونِ الْمُورِدُونِ الْمُورِدُونِ الْمُورِدُونِ الْمُوارِدُونِ الْمُورِدُونِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهُ اللّهُ اللّ

It is occasionally met with as an Explanatory Particle, synonymous with مُنْ as in the following Example from the Qooran: نَا الْفَلَاكُ 'That is, make the Ark.'

But if prefixed to the Preterite it causes no alteration in the time, and is then called اَن اَلْصُلُ رِيَّة or the infinitive نَا الْصُلُ رِيَّة

2. The Particle restricts the verb to future time, in a confirmed negative sense.

EXAMPLE.

You will certainly not see me,

Annotation,

As a pleonastic particle it occurs as follows:

- 1. After التوقيتية or the temporal lumma, التوقيتية When Zued came.
- 2. Between the Particle أَعُمَمُ and a نَعُلُولُكُسَمُ i. e. a verb of swearing: as لُولُونَ أَنْسَمُ بِاللهِ
- 3. Between the Preposition ___ and its governed word; as مُرَدُكُ وَاللَّهُ لَهُ لَا كُولُولُولُولُهُ لَهُ اللَّهُ لَا اللَّهُ عَلَيْهُ اللَّهُ اللّلَّةُ اللَّهُ اللللَّا اللَّهُ الللَّا اللَّهُ اللَّهُ اللَّا اللَّهُ اللَّهُ الل

OF THE PARTICLE ...

is a negative Particle restricting the verb to FUTURE time. The Grammarian says it was originally y, the Alif of which is changed into Noon; but this Etymology is rejected by the author of the Mooghnee who confirms the account given in the Commentary, in which opinion he is supported by

This Particle, agreeably to the authority of the Grammarian Khuleel is compounded of 2 and 1. The Humza is rejected, for the sake of euphony, leaving 2, the Alif of which is also thrown out, because two quiescent letters occurring together cannot be pronounced, and thus we have 1.

3. The Particle is used in the sense of and arrive, indicating that that which precedes it, is the cause of that which follows it.

EXAMPLE.

آ سَدُتُ كَي اَ دُخُلُ الْجَنَةُ [I embraced the Moosulman faith, that I might enter into Heaven.

Annotation.

OF THE PARTICLE

The author of the Mooghnee says, that is a neur abbreviated from in the following verse:

How can you incline to peace, Your slaughtered friends being yet unrevenged, And the flame of war still raging?

It occurs as a PARTICLE in the sense of المُعْلَمُ عَلَيْهُ عَلَيْهُ عَلَيْهُمُ اللَّهُ عَلَيْهُمُ اللَّهُ عَلَيْهُ اللَّهُ اللَّهُ عَلَيْهُمُ اللَّهُ عَلَيْهُمُ اللَّهُ عَلَيْهُ اللَّهُ ال

Tt precedes also the مَا لَاصَدَ رِيَّةً ' A man may expect ' A man may expect to receive the good or evil he does.'

"That you be not sorrowful." ولاَنْ لَا تَا سُوا for الكَيْلاَ تَا سُوا for لكَيْلاً تَا سُوا إِلَا الْمَامُ رِيعً

^{*} As a proof of this it may be observed that the is retained in is retained in which would have been rejected had been bere a governing Particle.

4. The Particle is used in the sense of and answer, and consequence, and restricts the verb to Future time.

EXAMPLE

اَنَ تَدُخُلُ ٱلْجَنَّةُ Then you will enter into heaven,' in answer to him who said الْمَا الْجَنَّةُ 'I embraced the Mohummudan faith.'

Some Grammarians maintain that it is a Particle.

As a Particle some derive it from if and others again allow it no Etymology, but consider it a simple uncompounded Particle.

The Grammarian شار بينى, says it is always used in the sense of عراب and المرابعي as explained in the Text; but فارسي merely admits its general application in this sense, and gives the following example, to prove that it is sometimes met with as the عراب alone;—as in answer to the assertion, المرابع المرابع

STORY.

I called one day, said a learned man, upon a friend of mine, who was an excellent Singer, and said to him, I am come to you, that you may enliven me with a song, for I have been annoyed this morning, and know no remedy so effectual in dispelling care. I beg therefore that you will oblige me with a couple of good verses. He answered, with great pleasure, and sung the following.

Thy flight the knots of patience hath unwound,*

Yet in my soul thy form is firmly bound:

What were thy wrong, love's bitter to allay,

With sweets from me withheld; on others cast away.

I was delighted, says the narrator, with his harmony, and found myself relieved from the affliction that weighed upon my heart, and asked him, do you think any other person in this city can be found a match for you in singing. No said he, I do not think there is, nor will you ever find in it any such. I then took my leave of him, saying;—I will call upon you tomorrow, please God, between the

noon and evening prayers.—Then, said he, I will sing you something that will please you. One of my friends called upon me in the evening, and informed me that the King had ordered the Songster to be put to death.—On what account I asked? Because replied he, the King's Daughter heard him singing to-day and was so enchanted with his voice, that she was nearly throwing herself down from the top of the palace in cestasy;—the King ran and drew her in from the window, and having locked the door, ordered the Musician to be put to death. On hearing this said the learned man, I made my escape, as soon as the people left me, fearing I might experience the same fate myself, I being in fact the cause of his singing.

CLASS SIXTH.

The sixth class contains five particles which being prefixed to the agrist, render the final letter or Quiescent, viz.

1. The Particle 🥳 converts the Aorist into a NEGATIVE PRETERITE.

EXAMPLE.

He did not strike. مَاضَوْبُ In the sense of لَمْ يَضُوبُ

Annotation.

OF THE PARTICLE ...

The Particle is synonymous with . Its effect upon the Aerist is to change into , into , wendering the final letter quiescent, and seems in this respect to correspond with the Apocope of European Grammarians. In conversation however this rule is not always observed by the Arabs, who use it like and without causing any difference of inflexion in the verb; the same license is sometimes indulged in Poetry, and what is still more extraordinary the Grammarian sometimes anys, it occasionally renders the Aerist in and in this way he reads the first sentence of the 94th Chapter of the Qooran:

"Have we not opened thy breast." ٱلْمُ نَشْرَحَ لَكَ صَدْرَكَ

2. The Particle is used like but is peculiarly applied in the sense of to denote universality of past time, and indicates, that the action conveyed by the verb was never performed at any past period.

EXAMPLE.

اَ يَضْرِبُ زَيْكُ الْمَا يَضَرِبُ زَيْكُ الْمَاضَرَبُ زَيْكُ الْمَاضَمَ الْأَزْمِنَةُ الْمَاضِيّة لَا يَضْرَبُ زَيْكُ الْمَاضِيّة الْمَاضِيّة لَا يُصْرَبُ زَيْدُ الْمَاضِيّة لَا يَضْرَبُ زَيْدُ الْمَاضِيّة لَا يَصْرَبُ الْأَزْمِنَةُ الْمَاضِيّة لَيْكُ اللّهُ عَلَيْكُ مِنْ الْأَزْمِنَةُ الْمَاضِيّة لَيْكُ عَلَيْكُ مِنْ الْأَزْمِنَةُ الْمَاضِيّة لَيْكُ عَلَيْكُ مِنْ الْأَزْمِنَةُ الْمَاضِيّة لِيَّالِي مِنْ الْأَزْمِنَةُ الْمَاضِيّة لِيَّالِي مِنْ الْأَزْمِنَةُ الْمَاضِيّة لِيَّالِي اللّهُ الْمُؤْمِنِينَ اللّهُ مِنْ الْمُؤْمِنِينَ الْمُؤْمِنِينَ الْمُؤْمِنِينَ الْمُؤْمِنَةُ الْمَاضِيّة لِيَّالِي اللّهُ ال

OF THE PARTICLE U.

The author of the النَّالَةُ makes it a compound of ما and له which is confirmed by رُضي Ruzer, who adds that له is added to it in the same manner as in هُوَلَيْنَا &c. These Grammarians observe another distinction in the use of and the former of which they say may be preceded by a conditional Particle, as الْمَا يَكُنَ مَا الْمَا يَكُنُ عَلَى اللَّهُ الل

differs also from in this, that the verb of the latter may be some times omitted in a Sentence, as قَرَبُتُ الْبُلُدُ عَلَى الْبُلُونُ عَلَى اللَّهِ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللّهُ اللّهُ عَلَى اللّهُ عَلَى اللّهُ اللّهُ عَلَى اللّهُ اللّهُ عَلَى اللّهُ اللّهُ عَلَى اللّهُ اللّهُ اللّهُ عَلَى اللّهُ اللّ

The word U besides its use as a governing Particle, is employed to denote time, and seems in this case to resemble when. As such, it is prefixed to a verb in the past time, in a Proposition consisting of

Annotation.

Say (O Mohummud) to my faithful servants; let them observe the stated hours of prayer.

The Prohibitive Particle \hat{y} is seldom found with the 1st Person, but is equally applicable to the 2d and 3d. Its origin and character are disputed. Some Grammarians derive it from the \hat{y} Lam of command, by adding to it Alif— says it is not a prohibitive but a Negative Particle, and that the government ascribed to it, is to be attributed to the Imperative Lam understood: but both these opinions are overruled by the author of the Mooghnee who confirms the doctrine recorded in the Commentary.

OF THE PARTICLE

There is nothing to be remarked of except that it is used as a Negative as well as a conditional Particle, and that it is frequently found as a mere expletive. Schultens says it is used rhetorically as an animated Aposiopesis in swearing, a use that has not been discovered by any of the Arabian Grammarians, and which I shall not therefore transcribe. The Particles in Class the Sixth are illustrated in the following Story.

STORY

It is related that a woman was troubled with a tingling* in her ear, and went to a Physician for his advice on the subject. The Physician said, if you apply (to your ear) the yolk of an egg, and a little pulverized Love-Apple you will be well. The woman went to an Apothecary, who had a handsome Apprentice, and said, I will thank you to desire your boy to weigh me out two Dirhums worth of Love's-Apple!† The Apothecary not knowing, that she meant the plant of that

^{*} The word wib is derived from which corresponds both in sound and sense with tinkle in English, and tinnio in Latin. It is here used technically for the Tinnitus Aurium of Physicians.

[†] I have endeavoured to imitate the quibble in the original on the words الله الموتاء Huowa-Juwwa, and موتاء Huowur-Juowa. The first is the name of an herb or plant: the second means

name, on the contrary believing she wished for that which no plant or herb can cure, said to his Apprentice, give the lady my boy, what she wishes of you. The woman was enraged at the insinuation, and said, I never thought of the strange idea, which has entered your mind; I merely wished for a little of the medicine called Love's-Apple. The Apothecary felt embarrassed, and said, O my good daughter do not annoy yourself, but say if you please, Love-Apple, He then gave an order to his boy to weigh her out three Drams of it, and not to stint her in the weight,

CLASS SEVENTH.

The seventh class contains nine words, which give or the QUIESCENT mark to the AORIST. They possess a conditional or hypothetical signification like the

literally, the desire or ardour of love. I am aware that the Love-Apple, as a genus of the Money gynia order, is not exactly applicable to the Arabian plant, but it serves to convey some idea of the Pun, and this is all I intended.

† The original means simply, "that which the heart pants after from the bitterness, or violence of love." We may suppose that the Arabian Apothecary from the Lady's mistake imagined her in search of the Agnus Castus, or some other love antidote, but having no idea that so much virtue could be found in an herb:—He mini quod nullis amor est medicabilis herbis! Unwittingly recommended her to his Apprentice.

§ Or two miskals which are supposed equal to three Drams,

Beings, (ذُو الْعَقُول)

EXAMPLE.

المن يكر من الكرمة He who honors me, I will honor him,

آيُ That is,

If Zued honors me, I will honor him, and

If Amr honors me, I will honor him.

2. Relatively, in the sense of يَكُنَّ as اللهُ يَسْجِهُ لَهُ مَنْ فِي السَّهُواتِ وَمَنْ فِي الاَرْضِ اللهُ يَسْجِهُ لَهُ مَنْ فِي السَّهُواتِ وَمَنْ فِي الاَرْضِ

Do not you see, that whatever is in the Heavens, or in the Earth prostrates or humbles itself before Goo?

3. As an Indifinite Noun qualified by an Adjective, as in the following Verse of the celebrated.

Poet Hussan;

*This excellence is all we require to establish our pre-eminence over others, namely the love of the Prophet Mohummud towards us."

She second is and is more generally applicable to THINGS, OF IRRATIONAL (غَيْرُ ذَى الْعُقُولِ) BEINGS, (غَيْرُ ذَى الْعُقُولِ)

EXAMPLE

What you purchase, I will purchase,

آيُ That is,

If you purchase the Horse, I will purchase the Horse, and If you purchase the Cloth, I will purchase it.

3. The third is and is applicable to TIME,

سَتَىٰ تَذْ هَبُ اَنْ هَبُ When you go, I will go,

That is,

اَ نَ تَذَ هَبِ الْيَوْمَ اَلْهُمِ الْيَوْمَ الْيُومَ الْيُومَ الْيُومَ الْيُومَ الْيُعْلِي الْيَوْمَ الْيُعْلِي الْيُومَ الْيُعْلِي الْيُومَ الْيُعْلِي الْيُومَ الْيُعْلِي الْيُومَ الْيُعْلِي الْيُعْلِي الْيُعْلِي الْيُومَ الْيُعْلِي الْعِلِي الْيُعْلِي الْيُعْلِي الْيُعْلِي الْيُعْلِي الْعُلِي الْعُل

Annotation.

This Poet was contemporary with Mohummud, from whom tradition says he received the name of Hussan, in consequence of having delighted the Prophet by some Verses in his praise, and upon hearing which he is said to have called out was Most beautiful!

OFL

The author of the Mooghnee says that L as a governing Noun, is sometimes significant of time, as As long as they preserve their faith to you, do you the same with ' فَهَا اَسْتَقَا مُو الْكُم فَا سَتَقَيْهِ وَالْهِمَ them: and that it is sometimes used without any relation whatever to time, as الله عمل الله عمل الله 6 Gon knows whatever good you do.

4. The fourth is (and as also applicable to TIME.

EXAMPLE.

سَهُا تَذُهُبُ آذُهُبُ Whenever you go, I will go,

آي That is,

آنُ تَذْهُبِ الْيَوْمُ اَنْهُبِ الْيَوْمُ اَنْهُبِ الْيَوْمُ الْيَعْمُ اللّهِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهُ اللّهِ اللّهُ اللّهِ اللّهُ اللّهُل

5. The fifth is applicable to persons or things; in other words to rational or irrational beings, and is always connected with another word in the relation of the Aorist or oblique Case.

EXAMPLE.

اَیْهُمْ یَضْرِبْنِيْ اَضْرِبْهُ Whosoever strikes me, I will strike him,

() That is,

اَنْ يَضُرِبُنِي زَيْلُ اَضْرِبُهُ If Zued strikes me, I will strike him, and آوِ نَ يَضُرِبُنِي عَهْرُوا صَرِبُهُ If Amr strikes me, I will strike him.

The word مَتَى نُصِرالله is also used Interrogatively, as مَتَى نُصِرالله when will God assist us?

It is also Synonymous with عَدَيْ عَلَيْ عَلَيْ اللَّهُ اللّهُ اللَّهُ اللَّالَةُ اللَّهُ الل

6. The sixth is Lil applicable to PLACE.

The Commentator considers merely as a Noun, but the Grammarian makes it also Particle, as in the following Verse in which it is supposed Synonymous with

If a man possess a certain disposition, and is desirous to conceal it from mankind (it will not evail) it will be discovered.

It is also supposed to be used Interrogatively, as in the following Verse.

7. The seventh is also applicable to PLACE.

EXAMPLE.

STORY.

A certain city lounger was standing one day in the street, and happened to see a woman of elegant appearance pass by with a child in her arms. He said to the people about him, 'if any one will bring me that child in order that I may kiss his feet, I will give him ten Dirhums,' but no body answered him. He addressed them again, and said, 'I will give fifteen Dirhums to any one that will bring me the child,' but they continued silent as before. I had better said he to himself leave these blockheads alone, and watch the motions of the woman. and wherever she goes, go there also, and at whatever house she enters, stop there (and wait her coming out,) upon which he began to follow her. The woman (turned round) and said, 'what is your object Sir, in pursuing me thus? I wish replied he for permission to kiss the feet of that child, and if you allow me, I will do whatever you command. Why do you wish this said the woman? because I love you replied he, and you love the child, and the beloved of the beloved, is also beloved. The woman laughed at his answer, and said if you are determined on this, you had better wait for his father, who is about to proceed to the bath,* and when he takes off his shoes you can go and kiss his feet, for my love thim is greater than to this child. The fellow was abashed at her reply and retreated.

^{*} I have omitted a sentence here to avoid repetition.

CLASS EIGHTH.

The eighth Class contains four words which give ثمين to an Indefinite Noun (السرنكرة) or govern it in the Accusative or Objective case, as the آسمن or Noun of Specification.

If the تَعْنَى be a Masculine Noun, the grammatical arrangement of the units and اثنان in construction with عَشَرُ will be as follows, with both members of the compound number in the Masculine Gender:

EXAMPLES.

اَ كَنُ عَشَرَرُجُلًا Eleven men. آخُلُ عَشَرَرُجُلًا Twelve men.

Annotation.

The work contained in the eighth Class are nouns of number either determinate or indeterminate, which generally sive and sometimes to an indefinite noun, or govern it in the Objective, and Aobist or Oblique Cases; and as Numbers in their applicate sense refer to particulars, in opposition to those in the abstract, the word expressive of that particularity is always termed or or particularity is precification or Particularity; or the Specification, and significantly are the noun Numbers. It must however be remembered that the

EXAMPLES.

The other cardinal numbers from three (تَكُونَة) to nine (تَسُعَة) inclusive, in construction with عَشَرُ ten, are applied as below; the first member of the compound being Feminine the second Masculine, and this always happens when the تَعْمَنُونَ is a Masculine Noun:

EXAMPLES

Thirteen men. ثَلَاثَةَ عَشَرَاجِلًا Fourteen men, and so on to اَرْبَعَةَ عَشَرَرَجِلًا Nineteen men.

The word in the text expresses the number ten abstractedly and differs perpaps from أمانة in the same way as مانة in the same way as مانة in the same way as مانة in the Adrist or Oblique Case, in other words its بالمنافقة in the Adrist or Oblique Case, in other words its بالمنافقة in the Adrist or Oblique Case, in other words its بالمنافقة in the anoun plural either in form or meaning as بالمنافقة المنافقة ا

But if the jest be a Feminine Noun, the order is reversed, and the ferst member of the compound will be Masculine, and the second Feminine.

Of the other digits from three to nine inclusive the order will be as follows:—the being a MASCULINE Noun, the first word in the compound will be Feminine:

Twenty three men.

But if the ' be Feminine, the reverse must take place, and the first word of the compound will be Masculine:

EXAMPLE.

Twenty three women تَلْثُ وَعِشْرُونَ ا مُرَءَةً

And so on in the same manner to NINETY-NINE.

Annotation.

When six used interrogatively with a preposition prefixed to it, it renders the شيرة Mujroor, (the preposition being understood,) as يَكُودُهُمُ اشْتَرِيْتُهُمْ الْمُتَرِيْتُهُمْ الْمُتَرِيْتُهُمْ الْمُتَرِيْتُهُمْ اللهُ اللهُ

When عن is used to denote assertion, it is supposed to be Synonymous with بَدْتُ and its it sometimes a Noun in the Plural number, like the تَهْمَا وَ مُعَالَى مَاكُتُ عَمْ مُنْاتُكُ عَلَى مُلَكُ اللهُ ا

2. The second is the word which is used to denote an Independent number, (and as a twofold relation: The first is termed and principles or the Interegodative when used in the sense of interrogation, and governs the in the Objective Case, as

How many men did you strike?

The second is termed or the Indicative, when not used Interrogatively, and governs the in the Objective Case if any word happen to intervene between it and the

There are several men with me.

But if no word intervene it governs the juit in the Aorist or Oblique case, as

ا كَمْ رَجُلاً ضَرَبْنَهُ I struck several men, الشَمْرُبْتُ I purchased several boys or slaves.

The third is كَانُ التَّشَيْمُ or Kaf of similitude, and the pronoun إِنَّ but is used to denote an Indeterminate number, and is never applied Interrogatively, as

يَنُ ارْجُلَاعِنْدي There are so many men with me.

in its etymological sense, and has no governing power, as اَوَكَنَا اللهُ الل

The faurth is compounded of the KAF OF SEMILITUDE and the word but is used to denote an Independent Number, without any relation to the meaning of its component parts, as

آ كَأَيْنَ رَجَالًا لَعَيْتُ I visited some men.

It is also used Interrogatively, as

ظَنْدَكُ How many Dirhums have you?

The word will is also compounded of the will of similitude, and will as mentioned by the Commentator, and is synonymous with its when preceded by is Mujroor, as in the following example from the Quoran,

The words in this class are included in the following story.

The Physician answered, so much, and made a motion with his hand three times towards him, to denote fifteen of them. The man went away and continued eating the Mad-Apple and in the forty first night, he put on his sword and went to the Physician and said—did you not say O stupid and ignorant Doctor, that whoever would eat fifteen of the fruit of the Mad-Apple for forty days successively would lose his senses? And howmany have I eaten beyond that number and yet am not mad? and now I swear by Gop I will put you to death with this sword. The Doctor alarmed ran off and shut the door against him, and said O pardon me my friend!—I repent of my misconduct, and promise you never to prescribe the Mad-Apple to another as long as I live.

CLASS NINTH.

The ninth Class contains nine words termed [or Verball Nouns, because they are considered equivalent in signification to verbs. Of these, six are used as the second person of the Imperative and give ito a Noun, or govern it in the Objective Case as its Object.

STORY.

An old man* complained to a Doctor of bad digestion. O let bad digestion glone said the Doctor, for it is one of the concomitants of old age. He then stated his weakness of sight. Don't meddle with weakness of sight replied the Doctor, for that also is one of the concomitants of old age. He complained to him of a difficulty of hearing. Alas how distant is hearing said the Doctor from old men! difficulty of thearing is a steady concomitant of old age. He complained to him of want of sleep. How widely separated said the Doctor, are sleep and old men, for want of sleep is certainly a concomitant of old age. He complained to him of a decrease of bodily vigour. † This is an evil replied the Doctor that soon hastens on old men, for avant of vigour is a necessary concomitant of old age. The old man (unable to keep his patience any longer) called out to his companions—seize upon the booby, lay hold of the blockhead, drag along the ignorant idiot, that dolt of a Doctor, who understands nothing, and who has nothing to distinguish him from a Parrot, but the human figure, with his 'concomitants of old age,' for sooth! the only words he seems capable of uttering. The Doctor smiled, and said, come on my old boy, get into a passion, for this also is a concomitant of old age.

CLASS TENTH.

The tenth Class contains thirteen Verbs termed I or IMPERFECT VERBS, and are so called because they cannot with an Agent alone, form a complete or perfect Sentence. They precede in construction a Nominal Sentence, or a Sentence consisting of a Subject and Predicate, to the first of which they give in and to the second in the first Term is called the substantive Noun, the second the interpretation in the Attribute or Predicate.

1. Of these the first is & which is used in two senses. 1st Imperfect.

As an Imperfect Verb it is used in two ways. First, as affirming the existence of its Attribute in its Substantive Noun or Subject, in time past, either in a sense capable of cessation, (مُرَنَّ الْمُنَاعُ الْمُرَافِعُ عَلَى الْمُعَلَّمُ) as الْمُنْعُ الْمُنْعُلُقُ 'Zued was standing;' or in a sense incapable of cessation, (مُرْبَنَتُ الْمُنَعُ الْاَنْعُطَاعِ) as الله عَلَيْكَ حَدَيْكَ عَلَيْكَ حَدَيْكَ الْمُعَلِّمُ الله عَلَيْكَ حَدَيْكَ عَلَيْكَ حَدَيْكَ عَلَيْكَ حَدَيْكَ عَلَيْكَ حَدَيْكُ عَلَيْكُ عَلَيْكَ عَلَيْكَ حَدَيْكُ عَلَيْكُ الله عَلَيْكُ عَلِيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلْكُ عَلَيْكُ عَلِيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلِي عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ

Second, in the sense of, in, as,

The poor man became rich.

Annotation.

The Arabian Grammarians consider Verbs as either Perfect or Imperfect, and as their account of them seems to agree in almost every respect with that of the Stoics as given by Harris in his Hermes, I shall present the extract to the reader by way of illustration.

"The Stoics in their logical view of Verbs, as making part in Propositions, consider them under the four following sorts:

When a Verb Co-inciding with the Nominative of some Noun, made without further help a Perfect Assertive Sentence, as Σωμρατης περπατεί Socrates walketh; then as the Verb in such Case implied the power of a Perfect Predicate, they called it for that reason Κατηγόρημα a Predicable;

2d. As a Perfect Verb, forming with its Nominative or Agent alone a complete or perfect Sentence, and consequently does not require to be connected with any other Predicate. In this sense it denotes existence (absolutely), as

2. The second is which is used to denote a change in the Subject of the Proposition either, from one nature or substance into another, as,

Or, from one quality into another, as,

It is sometimes used as a perfect Verb, to denote change from one place to another, and is then applied transitively with the Preposition

Annotation.

or else from its readiness suplánes, to co-incide with its Noun in completing the Scatence, they called it Dúplapa a Co-incider.

When a Verb was able with a Noun to from a Perfect Assertive Sentence, yet could not associate with such Noun, but under some Oblique Case, a Σωκράτει μεταμέλει, Socratem pænitet: such a Verb from its near approach to just Co-incidence and Predication, they called Παρασύμδαμα οτ Παρακατηγόρημα.

When a Verb, though regularly Co-inciding with a Noun in its Nominative, still required to complete the sentiment some other Noun under an Oblique Case, as Πλάτων Φιλεῖ Δίωννα, Plato Loveth Dio (where without Dio or some other, the Verb loveth would rest indefinite:) such a Verb,

3. The third, fourth and fifth, are whole of the whole of which are used to unite or conjoin the sense of the Sentence with their respective times, namely, morning, evening, and noon, as

Annotation,

from this defect they called holos n gunkana, or p narnyognus some thing less than a Co-incider, or less than a Predicable.

Lastly, when a Verb required two Nouns in Oblique Gases, to render the sentiment complete, as when we say Σωκράτει Αλκιδιάδες μέλει, Tædet me vika, or the like, such Verb they called ήτου, οτ έλατίου ν παρασύμδαμα, οτ ή παρακατηγορημα, something less than an Imperfect Co-incider, or an Imperfect Predicable."

Here by the way it may be worth remarking, that almost the whole of the above extract seems copied from Stanley's History of Philosophy, which Harris appears to me to have made frequent use of in his Hermes and Philosophical Arrangements without any sort of acknowledgment. The following may serve as a specimen:—" Whatsoever is Predicated of another is Predicated of the name of the Case, and both these are either Perfect, as that which is predicated, and together with the subject sufficient to make an Axiom. Or they are Defective, and require some addition to make thereof a Perfect Predicate."

The above three Verbs are sometimes used in the sense of , as,

The poor man became rich. اَصْبَ الْفَقَيْرُ غَنِيًا Zued became a writer.

The obscure became bright.

They are sometimes used in the sense of Perfect Verbs, as,

Annotation.

If that which is predicated of a name, make an Axiom, it is a Calegorem, or simple and a Congruity, as walketh, for example, Secretes walketh,

But if it be predicated of the Case (whereby Transitions are made from one person to another, wherein it is necessary that some Oblique Case be likewise pronounced with the right,) they are called Hagavullauda, as an addition to the σύμβαμα (or as Priscian renders it, less than Congruities) as Cicero saved his country.

Again, if that which is predicated of some Noun, require a Case of some other Noun to be added to make up the Axiom, so as the construction be made of two Oblique Cases, they are accuracy

4. The Sixth and Seventh, are غَلَى and بَاتَ which are used to unite the sense of the sentence with their respective times, namely day and night: غَلَى therefore unites the sense of the Sentence with the day, and نَالَ with the night, as,

كَاتِباً أَيْ النَّهَارِ His writing was at that time.

2 كَصَلَ كِتَا بُتُهُ فِي النَّهَارِ كَاتِبَا أَيْ كَاتِباً أَيْ كَاتُبالِ اللَّهَارِ اللَّهُ الللَّهُ اللَّهُ اللللْمُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللللْمُ الللَّهُ اللللْمُ الللْمُ الللْمُ الللْمُ الللْمُ اللْمُ الللْمُ اللَّهُ اللللْمُ اللللْمُ الللْمُ اللللْمُ الللْمُ اللْمُ اللْمُوالِمُ الللْمُ اللَّهُ الللْمُ اللْمُ الللْمُ اللْمُوالِمُ اللْمُوالِمُ اللْمُوالِمُ اللَّهُ

incongruities, or according to Ammonius, less than, ounganess, as it pleases me to come to thee; whether the Nouns only or the words require it. See Stanley's History of Philosophy. Folio Ed. 1701, in the life of Zeno, p. 310.

In answer to certain of the Arabian Grammarians who contend that *Imperfect* Verbs, are merely used to denote *time* without reference to the sense of their Infinitives, the Grammarian Ruzee in his celebrated Commentary upon the Kafeea makes the following reply, which I offer as a short specimen of his style and manner.

وَمَا قَالَ بَعْضُهُمْ مِنْ اَنَهَا سَهِيْتَ نَا قَصَةً لِا نَهَا تَدُ لَّ عَلَى الزَّمَا وَ دُنَ الْمَصْدِرِلَيْسَ بِشَيْعٍ لِاَنْ كَانَ فَيْ نَحُوهِ كَانَ زَيْدُ قَا نُهَا يَدُلُ عَلَى الْحَوْدُ الْمَلْكُ وَخَبَرِ الْمُدَالُ عَلَى الْخُصُومِ الْمَا الْمَلْكُ وَخَبَرِ الْمُلْكُ وَخَبَرِ الْمُلْكُ وَخَبَرِ الْمُنْ الْمُلْكُ وَخَبَرِ اللّهَ الْمُحْصُومِ الْمُعْمِدِ اللّهَ الْمُحْمِدُ الْمُلْكُ وَخَبَرِ اللّهَ الْمُحْمُومِ الْمُحْمُومِ اللّهَ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ الْمُحْمُودُ مَا ثُمْ عَيْنَ بِاللّهُ الْمُحْمُودُ وَهُو اللّهُ الللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ الللّهُ اللّهُ ال

The above two Verbs are sometimes used in the sense of , as,

The boy became adult.

The youth became an old man.

أَذَناً sometimes written مَا فَنَا مَا مَا فَنَا مَا مَا فَنَا مَا مَا مَا فَنَا مَا مَا مَا فَعَا مَا مَا فَعَ the tenth, مَا وَمَا فَا فَعَالَ and eleventh مَا انْفَكَ each of which is used to indicate the uninterrupted duration or permanence of the Attribute in its Substantive Noun, as,

تَا بَرَ خَرَيْكَ عَالِمًا Zued was always wise.

Zued was always standing.

Zued was always excellent.

Zued was always excellent.

Bukr was always intelligent.

Annotation.

"The opinions of those Grammarians who maintain that Imperfect Verbs are so called, because they are merely indicative of time, without reference to the sense of the Infinitive, are nugatory, for the word in the Proposition, is signified being, that is, being abstractedly considered, and its Predicate denotes the mode or manner of that being, which is here being standing, or the existence of that accident. Introducing the Sentence therefore with a word indicative of absolute existence, and afterwards qualifying it by the attribute, is, as if we were to say, a thing existed or was, and afterwards add—it existed standing. The word be therefore denotes the existence of an event absolutely, which is qualified by subjoining its Attribute, and the Attribute is significant of a particular event, as occurring in time absolute, which is restricted to a particular time, by the word by:"

Harris uses almost the same words upon the same subject. "Now all Existence is either Absolute or qualified.—Absolute, as when we say B is; Qualified, as when we say, B is an Animal, B is Black, is Round, &c. With respect to this difference, the Verb (18) can by itself

Mutable or Immutable being.

6. The twelfth is and is used for the purpose of indicating a temporary relation between two events, the time or duration of the first of which it limits or restricts to the duration of the second. It must therefore necessarily be preceded by either a Verbal or a Nominal Sentence, as

Sit while Zued is sitting.

Sit while Zued is sitting.

Zued is standing as long as Amr is standing.

Annotation.

the forms of existence being in number infinite, if the particular form be not expressed, which is intended." He then goes on to remark, "that when (is) only serves some such form, it has little more force than that of a mere assertion," and further on.—"Assertion in general, it is either Mutable, (a like a) or Immutable (a like a); as in the Objects of Sensation; Immutable, as in the Objects of Sensation; Immutable, as in the Objects exist all in Time, and admit the several distinctions of Present, Past, and Fature: But Immutable Objects know no such distinctions, but rather stand opposed to all things temporary.

And hence two different significations of the Substantive Verb (1s), according as it denotes

For example, if we say, this orange is ripe, (18) meaneth, that it existeth so now at this Precant, in Opposition to Past Time, when it was green, and to Future Time when it will be rotten.

But if we say, the Dianeter of the square is commensurable with its side; we do not intend by (18) that it is commensurable now, having been formerly commensurable or being to become so hereafter; on the contrary we intend that perfection of existence, to which time and its distinctions are uttered unknown. It is under the same meaning we employ this Yerb, when we say, TRUTS 18, or God 18. The opposition is not of time present to other times, but of necessary existence to all temporary existence whatever."

Hermes p. 92.

As my object in producing these extracts is merely to explain and illustrate the doctrine of the Arabian Grammarians on the subject of *Imperfect* or *Defective* Verbs, I avoid as usual all discussion on the question of its merits or demerits.

7. The thirteenth is and is used for the purpose of giving a negative signification to the Sentence in present time, though some Grammarians are of opinion that it is applicable to time in general, whether past, present or future, as,

Annotation.

Imperfect Verbs with respect to their government may be divided into two Classes, First, such as govern of themselves without any restriction or limitation, as اَصُبُعُ اَتُ ظُلَّ صَالَ عَالَ اَلَهُ عَالَ اَلَا عَالَ اَلَا عَالَ اَلْكُ عَالَ اللهُ الل

And lastly when they are used in the sense of supplication or prayer, as:

May Gon always continue beneficent to you.

To which must be added the Verb preceded by the Infinitive or the termed Zurfeea, as,

As long as you continue to receive wealth, continue to bestow it.

The Predicates of these Verbs, may precede their Substantive Nouns in the order of construction, without effecting any change in the government, as

Of these Verbs there is nothing particular to be remarked, we may however encrease their number by adding if he arrived at noon,' and if he arrived in the first watch of the night.'

Grammarians extend the privilege to the whole class of Imperfect Verbs, with the exception of قَامُهَا مَا وَالْمَا عَالَى اللَّهُ عَلَى اللَّهُ عَلَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَ

ABOOS SHIMUQMUQ was a humorist, but falling poor his wife was compelled to pass a whole night without any thing to eat. He went out therefore with the hope of procuring for her a little sustenance, but not succeeding he continued traversing the streets till he arrived at the great Mosque, which he entered and concealing himself in one of its angles, continued standing there till the whole congregation had retired, with the exception of the public Crier, who when night came on, began to pray, saying.—' O God at whose mighty will non-existence sprung into life, and by whose merciful kindness the poor and sorrowful are made happy.'-I am here my servant, 'cried Aboos Shimuqmuq,' ask of me what thou requirest!' the astonished Crier believing he had been honored with the holy conference formerly granted to Moses, replied;—'O Gon! thou certainly knowest that this thy servant hath always been obedient to thy will, and hath never ceased to confide to thee his wishes: he hath passed the day in such extreme hunger that his very bowels yearn again for food, bestow upon him then from thy infinite bounty one thousand Dirhums, which will supply his wants and provide sustenance for his family.'-O my servant! cried Aboos Shimuqmuq, petition for something else, for I swear by my mighty power and dignity that my wife hath passed the whole night fasting, and although I searched every where to find a little bit of supper for her, I have not succeeded in procuring a mouthful, nor have I in my possession sufficient to keep her soul and body together!—The poor Crier ashamed of the trick played upon him, left the Mosque to Aboos Shimuqmuq and went off.

CLASS ELEVENTH.

The eleventh Class contains four Verbs, termed Verbs of Propinquiry (اَنْعَالُ الْقَالُ الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَالَ الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلِيْ الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلِيْ الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلَى الْعَلِيْعِلَى الْعَلَى الْعَلِيْعِ لَيْعِلَى الْعَلَى الْعَلِيْعِلَى الْعَلَى الْع

1. The first is which admits of the quiescent if or Ta of the feminine gender, but is not otherwise (regularly) conjugated, neither is any Derivative formed from it. Its government is twofold.

First. It gives رثي or the sign of the Nominative Case to the Noun as its Agent, and or the sign of the Objective Case to the Predicate, which Predicate is a Verb in the Aorist Tense in construction with منافع is always Synonymons with عنسنى.

EXAMPLE.

يَخُرُجُ عَسَىٰ زَيْدُ أَنْ يَخْرِجُ Zued hastened to come out.

Annotation.

To the Verbs of this Class generally termed from their signification, Verbs of Propinquity, Grammarians have added several others, which though nearly synonymous in point of sense, are yet sufficiently distinct in application to warrant their arrangement into the following classes ex divisions.

1. Verbs of Propinquity properly so called, viz.

2. Verbs denoting hope or expectation, or implying confidence in some future event, viz.

3. Verbs denoting the commencement of an action, or Inceptives, viz.

In which example jis put in the Nominative, as the Noun or Agent of and and is substituted for the Accusative or Objective Case, as its Predicate. The sense of the Sentence will therefore be.

Zued accelerated his egress.

The Predicate of agrees with its Noun or Agent in Gender and number.

EXAMPLE.

The two Zueds hastened to stand.

أَنْ يَكُوْمُوْلُ اللّٰهِ النَّرِيْدُوْنَ اَنْ يَغُوْمُوْلُ اللّٰهِ (All) the Zueds, &c. to stand,

Hinda hastened to &c.

The two Hindas hastened to &c.

(All) the Hindas hastened to &c.

Annotation.

By this classification as Iaid down in the Commentary upon the Alfrea, the Verb it appears is excluded from the Verbs of Propinquity, contrary to the doctrine in the Text; the grounds upon which this exclusion is founded are the following:

It is supposed by the Grammarian Aj; Zahid to be a Particle Synonymous with Li. Ruzer thinks its proper signification is hope or expectation, to which Seebuwen adds pity and fear, as in the fear I shall die, or I fear am about to die.

And agreeably to the authority of the Sihah it denotes certainty, as in the following example from the Qooran:

مُتَبَ عَلَيْكُمُ الْقَتَا لُ وَهُو كُولَ لَكُمْ وَعَسَىٰ اَتَى مَدَ عُدَ مَهُ مَ مَعَ وَ مَهُ وَ مَهُ مَ مَا لَكُمْ وَعَسَىٰ اَنَ تَحْبُوا اللهِ عَلَمُ وَعَسَىٰ اَن تَحْبُوا اللهِ عَلَمُ وَعَسَىٰ اَن تَحْبُوا اللهِ عَلَمُ وَانْتُمُ لاَ تَعْلُمُونَ هُ شَياً وَهُو شَرِّلُكُمْ وَاللهِ يَعْلَمُ وَانْتُم لاَ تَعْلُمُونَ هُ Second. The Verb in its second application gives or the sign of the Nominative Case, to a Verb in the Aorist Tense in construction with which is substituted for, or put in the place of the Nominative, as the Noun of and is then Synonymous with .

EXAMPLE

The coming out of Zued was near, or عَسَىٰ أَنْ يَخْرِجَ زَيْدٌ He was on the point of coming out.

Annotation.

Maracci however renders it here fortasse which is copied by Sale. "War is enjoined you against the infidels, but this is hateful unto you: yet perchance you hate a thing which is better for you, and perchance you love a thing which is worse for you, but God knoweth and you know not." Sale.

The Predicate of the is restricted in the Text to a Yerb in the Aorist Tense with the Particle but although this appears to be the general practice of the Language, there are some instances noticed by Grammarians in which the Predicate is a Nonn, as if if it is instances noticed by Grammarians in which the Predicate is a Nonn, as if if it is instances of the Infinitive, which becoming then an abstract term, cannot with propriety be predicated of its Substantive Noun. This doctrine seems conformable to that of Locke, who says that, "all our affirmations are only inconcrete, which is the affirming not one abstract idea to be another, but one abstract idea to be joined to another"—we can say a man is white, but we cannot say a man is whiteness, unless in a figure of speech. But some believe, that when it does occur in this form it is always by an ellipsis of some governing word, such as J or if and other Grammarians account for it by supposing it to be then redundant.

is regularly conjugated in the Past Tense, and its medial radical in the second persons is occasionally marked kusra, as, where the second persons is occasionally marked kusra, as a second person is occasionally marked kusra,

In which case there is no necessity for the introduction of a Predicate, in opposition to its first application where the sense would otherwise remain imperfect.

In its first combination it is therefore termed IMPERFECT, and in its second Perfect.

2. The second is S which governs the Noun or Agent in the Nominative, and the Predicate in the Accusative or Objective Case, which Predicate is generally a Verb in the Agrist Tense without S though it sometimes admits of likewise, inconsequence of its resemblance to

Zued hastened his coming, or advanced it to the last point.

EXAMPLE.

Zued did not hasten his approach.

Grammarians differ considerably among themselves, with regard to the sense of she when preceded by a Negative Particle, some maintaining and with propriety, that it bestows on the Verb a Negative signification, and others asserting that it has no such force, the sense of the Verb remaining unaffected as before; while others believe that the Particle is redundant before she in the Past Tense, but preserves its signification in the Future.

Under the general head of Verbs of Propinquity, (besides those enumerated in the Commentary above,) may be mentioned the following, namely,

حَرَي اِخْلُولَكَ اَوْلَىٰ هَلْهُلَ النَّشَأُ الْقَبْلَ وَرَّبَ هَبَّ عَلَّكَ

3. The third is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is invariably the Aorist Tense of a Verb without (a) as:

4. The fourth is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is a Verb in the Aorist Tense with or without

Some Grammarians make out seven Verbs of Propinquity, adding to the four abovementioned the following three, namely اَخَذَ طَغْفَ جَعَلُ which are altogether Synonymous with رَبُ in sense and application.

Annotation.

The Commentator on the Alfeea makes حَرَى Synonymous with إِنْ أَنْ يَقُومُ in the sense of hope or expectation, but its predicate must always be an Aorist with the Particle عُرَى زَيْداً نَى يَقُومُ عَنْ اللهُ عَلَى اللهُ الله

The above rules are precisely applicable to اِخْلُولَةَتِ السَّهَاءُ الْنَ تَهْطِرَ ، عَهْ إِخْلُولَةَ عَلَى The Heavens were about to descend in rain.

اَوْلَىٰ زَيْدُ اَنْ يَرِيدُ عَلَى ثَلَاث as, وَالَىٰ وَيَدُ عَلَى ثَلَاث as, وَالَىٰ وَيُو الْمَا Is supposed by Ruzer to be Synonymous with وَالَىٰ زَيْدُ اَنْ يَرِيدُ عَلَى ثَلَاث as, وَالَىٰ وَيَدُو الْمَانِيدُ عَلَى ثَلَاث as, وَالْمَانُ as, وَالْمَانُ as, وَالْمَانُ as, وَالْمَانُ وَلَانُ وَالْمَانُ وَلَالُمُ وَالْمَانُ وَالْمَانُ وَالْمَانُ وَالْمَانُ وَالْمَانُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَانُ وَالْمَانُ وَالْمَالِمُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَلِي وَالْمَانُ وَالْمَالُونُ وَالْمَالِمُوالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُولُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمُعُلِّ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُونُ وَالْمَالُولُونُ وَالْمَالُونُ وَالْمَالِمُ وَالْمَالِمُ وَالْمَالُونُ وَالْمَالِمُوالِمُونُ وَالْمُعُلِقُونُ وَالْمُعُلِقُونُ وَالْمَالُونُ وَالْمُعُلِقُونُ وَالْمَالُونُ وَالْمُعُلِقُ وَالْمُعُلِقُ وَالْمُعُلِقُ وَالْمُعُلِقُ وَالْمُعُلِقُ وَالْمُوالُونُ وَالْمُعُلِقُونُ وَالِمُوالِمُ وَالْمُعُولُونُ وَالْمُوالُونُ وَالْمُعُلِقُ

STORY.

A certain religious man was so deeply affected with the love of a King's daughter, that he was brought to the very point of death. His disciple said to him one day, what has the Almighty done with the king of your understanding and patience, for your body seems almost reduced to a mere shadow? Ah my child said the devotee. I subdued my feelings till my very heart was nearly breaking, and practiced patience to the utmost stretch of my power, but when the army of love invaded me, the king of my understanding was put to flight, and I could hold out no longer; he then wept and repeated the following lines:

> The jeerer was keen with his joke. And eager to mock my despair; But he saw my heart almost was broke, And he sought but to soften my care.

Then may heaven my mistress defend,

Though still she my vows should disdain;

Though her cruelty hasten my end,

And my heart break indeed with its pain.*

CLASS TWELFTH.

The twelfth Class contains four Verbs termed اَنْعَالُ الْمَانِ وَالذَّى وَالدَّى وَالذَّى وَالذَّى وَالذَّالِ اللَّهُ وَاللَّهُ وَاللَّهُ وَلَيْعَالُ الْمُعْرَالِينَ وَالذَّى وَاللَّهُ وَاللَّهُ وَاللَّذَى وَاللَّهُ وَاللَّالِي وَاللَّهُ وَاللَّالِقُولُ وَاللَّهُ وَاللَّالِي وَاللَّهُ وَاللَّالِي وَاللَّهُ وَاللَّهُ وَاللَّالِي وَلَّا لَا اللَّالِي وَلَّاللَّالِي وَاللَّالِي وَلَّالِي وَلَّاللَّالِي وَلَّالِي وَلَّالَّالِي وَلَّاللَّالِي وَ

1. Of these the first is is originally with the first letter marked Futha, and the second Kusra: the Futha is changed into Kusra to coincide with

Armotation.

As assume Ta or the mark of the Feminine Gender, they are generally considered as Verbs, but certain Grammarians of the schools of Koofuh will have them Nouns because they are occasionally found in construction with a Preposition, as

The censurers were eager to censure me,

But when my heart from excess of love was ready to break;

My very censurers bestered to console me;

Then preserve O God the life of my beloved!

There is something pretty if not elegant in the original of this verse, but its spirit I fear is too subtle for transfusion into our idiom. In a literal translation the repetition of the word censurers appears harsh and unpleasing, and the strange unconnected wish at the close not very suitable to the complaint expressed in the three first lines, though dilated into a quatrain. As a curious example whoever of the four Verbs under discussion it deserves to be remembered.

^{*} Or literally,

the Vowel mark of the second letter, which is then rendered quiescent to lighten or facilitate the pronunciation leaving which is a VERB of PRAISE.

The Agent (فَاعِلَ) of the Verb نَعْمَ is sometimes a general term (الْاَسْمُ الْجِنْسُ) made definite by the Article

EXAMPLE.

نَعْمَ الرَّجِلُ زَيْثُ Zued was a good man.

The word الرَّجْلُ is here مَرْفُوعُ or in the Nominative Case, as the Agent of رَبُنُ Zued (رَبُثُ is the Noun Particularised by Praise (رَبُثُ) and being the Subject of the Proposition is also in the Nominative Case; and the Predicate, preceding it in the order of construction.

Or ZUED may be in the Nominative Case as the PREDICATE, the SUBJECT of the Proposition being a Pronoun understood; the order will then be.

The Proposition by the first analysis consisting of one, and by the second of two Sentences.

The Agent of is sometimes a Noun connected in the relation of the Aorist Case with another Noun made definite by the Article

EXAMPLE.

تعَمَّصَاحِبُ الْغَرَسِ زَيْدُ Zued the owner of the horse is a good man.

Annotation.

They both occur under the following forms, namely so is and is and is and but the first is the original one. The two first forms are used by the tribe of Bunoo Tumeem, and the second more frequently than the rest when employed to denote praise or censure. This distinction agreeably to the authority of Mooburrud and Seebuweh is observed by the Arabs in general.

And sometimes a Pronoun concealed rendered by an indefinite Noun in the Objective Case.

EXAMPLE.

The concealed Pronoun in such instances refers simply to an object in the mind termed, (مَعْهُونُ دُهُنَى).

The Noun Particularized by Praise () is sometimes omitted in the Sentence if the defect can be supplied by the context.

EXAMPLE.

How good a servant was he, namely Job!

The verse of the Qooran from which the example is taken being in praise of Job.

The Noun Particularized by Praise and the Agent must agree in gender and number

EXAMPLES.

نِعْمَ الرَّجْلُزَيْدُ

Zued was a good man.

The two Zueds were good men.

نَعْمَ الرَّجَالُ زَيْدُونَ

All the Zueds were good men.

Annotation.

The Nouns Particularized by Praise or Censure sometimes though rarely precede their Verbs,

as عَرَّ بِيْسَ الْرَجِلُ ' Zued is a good man.' آهِ فَيْمَ الْرَجِلُ ' Amr is a bad man.' The Agent in

[such cases is rendered definite by the Article]; though sometimes the Pronoun is concealed and made

by an indefinite noun, as in the following example,

Hinda was a good woman.

تُعَبَّ الْمُوْمَ الْمُوْمَ الْمُوْمَ الْمُوْمَ الْمُوْمَ الْمُومَ الْمُومِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهِ اللّهُ اللّ

2. The second is a Vern of Censure; originally like is like (on the third conjugation of triliteral radicals.) The Futha of the first letter is changed into Kusra to coincide with the vowel point of the second, which is afterwards rendered quiescent in order to lighten or facilitate the articulation. The various rules applicable to the Agent of this Verb in construction, as well as to its or Noun Particularized by Censure, are precisely the same as those already recorded of the Agent and

EXAMPLES

يَسُ الرَّجَلُ زَيْنَ Zued was a bad man. گُنُسُ مَا حِبُ الْغَرَسِ زَيْنَ Zued the owner of the horse was a bad man.

Annotation.

. أبو موسل جدد ك نعم جدد ألله . وشيخ الحوي خَالْكَ نِعْمَ خَالاً

ABOO-MOOSA is your grandfather, how excellent a grandfather?

And Shuekh-ool-Hueka your uncle, how excellent an uncle!

These Verbs assume occasionally the Particle (, as an affix, as (ix); which Particle sometimes coalesces with (a) as in the following examples from the Quoran.

آن تَبِدُ وَالصَّدَقَاتَ وَنَعَيَّا هِي If you give your alms openly it is good.

It is a bad thing for which they have sold their Souls.

تُسْسَالِرَّجُلَّانِیْنَ السَّالِیْنَانِ السَانِ السَّالِیْنَانِ السَّالِیْنَانِ السَّالِیْنَانِ السَّالِیْنِیْنَانِ السَّالِیْنَانِ السَانِ السَّالِیْنَانِ السَانِ السَّالِیْنَانِ السَانِ السَّالِیْنَانِ السَانِ السَّالِیْنَانِ السَانِ السَانِ السَّالِیْنَانِ السَانِ السَانِ السَانِ السَانِ السَّالِیْنَانِ السَانِ السَانِ السَانِ السَانِ السَّالِیْنَانِ السَانِ السَانِ السَانِ السَانِ السَانِ السَانِ السَانِ الْسَانِ ال

- 3. The third is in every respect synonymous with
- 4. The fourth is with is affixed, the first letter being marked either Futha or Zumma; originally with the second letter Muzmoom, which being afterwards rendered quiescent the two homogeneous letters coalesce under the sign Idgham. This rule is applicable to with its first letter Muftooh, but if Muzmoom, the Vowel point Zumma is transferred to the second letter, and the two homogeneous letters coalesce as before.

Annotation.

I have nothing particular to offer regarding these words. إِنَّهُ is supposed by some to be derived from originally مَوْدُ the Wao being changed into Alif by a common rule of permutation. It is precisely synonymous with مَعْنُ as observed in the Commentary. المَعْنُ is sometimes preceded by the Vocative Particle أي denoting surprize or admiration, as in the following example from the 3d Muqam of Hureeree in praise of a gold coin.

O how admitable is its metal, how fascinating its splendor! How delightfully it enriches, how potently it assists us! The Verb عَدَ is never separated in practice from إِنَّى and is therefore written الله الله and its Agent is الله followed by its مَدُّسُوسُ بِالْمُنْ or Noun Particularized by Praise.

The Construction (اعراب) of the فخصوص of this Verb is the same as that of in both of the cases already detailed, but its Agent and Noun Particularized by Praise, do not necessarily agree in gender and number.

EXAMPLES.

Sing. mas. O excellent Zued!

ال حَبْدَازَیْدَ الله Dual mas.

Plural mas.

Sing. fem.

Sing. fem.

Dual fem.

Plur. fem.

Annotation.

The concealed Pronoun mentioned in the Text as the Agent of the three first Verbs of Praise and ceasure answers in all such cases to the Pronoun it in English, and is therefore rendered in Arabic by a Noun in the Objective Case. The phrase it therefore resolves itself thus, in the Was good. What was good?—'The man Zued.' As opposed to a Pronoun expressed, it is called concealed or implied, and its reference being to some object presented merely to the intellect for the first time, in opposition to the other Pronouns which verbally refer to an object perceived before, its relation is properly termed by the Arabs which seems to agree with the remark of Apollonius as quoted by Harris, 'That some indications are o ccular, and some are mental.'?

Τὰς μὲν τῆν ὁψεων ἔιναι δέιξεις, τὰς δὲ τᾶ νῦ, De Syntaxi, S. II. c. 3, p. 104. See Hermes, p. 77.

The مُحْمُون or Noun Particularized by Praise, may be either preceded or followed by a Noun agreeing with it in gender and number, and in the Objective Case as the تَبُنيُو or يَالِي مَا لَى .

EXAMPLES.

What an excellent man is Zued! حَبْذَارَجُلَّا زَيْدُ What an excellent horseman is Zued!

Annotation.

The Verbs of this Class are included in the following little Story-

STORY.

The wife of a niggardly attorney happened to be seized with a longing after fish, and expressed her desire one day to her husband. O what execrable food said the attorney is fish, and how vile a thing is fish for food! for its F is fatality; its I insipidity; its S sickness, and its H horror! The good woman however was determined to satisfy her longing, and accordingly having pawned her earring unknown to him, purchased some fish, but in the very act of enjoying it, who pops in upon her but old Pinchpenny, who seeing her eating cried outwhat is that you are eating my dear! Nothing but a little fish replied the wife, which a neighbour woman has sent me! Oh ho! cried Muckworm, then allow me to join your mess immediately, for most excellent food is fish, and fish is truly excellent for food, for its F is fatness; its I impletion; its S salubrity and its H hilarity.* What a vile describer of fish you are said his wife, for yesterday you abused it and now again you are praising it. Nay my dear said the attorney I am an admirable definer of fish, for I divide it into two classes. One that is purchased with money, and this I hold to be the bad class: the other that is got gratuitously and this I consider the good class. His wife laughed at his answer and was surprised at the readiness of his reply.

^{*} Or agreeably to the original word its first letter is poison, its second sickness, and its third affliction; and again, its 1st is fatness, its 2d enjoyment and its 3d competency.

CLASS THIRTEENTII.

The thirteenth class contains seven Verbs termed, is or Verbs of Verbs of the mind, and are so called because they have their source in the mind and come not under the cognizance of the senses. They are also called Verbs of doubt and certainty, some of them denoting doubt and some certainty, and precede a Sentence consisting of a subject and predicate to both of which they give is or govern them in the Objective Case as double Objects.

Annotation.

of the Soul with reference to the understanding, and grammatically Venus denoting the operations of the mind or intellect) may be included a variety of other kindred Verbs besides those recorded in the Commentary; for Action which is here meant spiritual action; being a Genus, necessarily embraces all the various operations of the mind, and as these operations of the mind or modes of thinking, are but different kinds or species of the same genus, the verbs expressive of these actions must partake of one common character as to sease, and might therefore be expected to fall under one common rule of government. This has not escaped the notice of the Arabian Grammarians who, in some of their larger works, have discussed the subject with great ingenuity and have enumerated a variety of Verbs possessing a similar government to those recorded in the text; but as their arguments are very diffuse and scattered through many parts of their works, I shall save myself the trouble of collecting and translating them, and endeavour to supply the defect by presenting the reader with a short extract from the celebrated Essay of Bishop Wilkins towards a real character, and Philosophical Language, which containing a very precise view of the different Actions of the Understanding (انعال القاوب) may not be deemed inapplicable to the Class of Verbs now under discussion.

Action as a Predicament he divides into four kinds.

I. SPIRITUAL. II. CORPOREAL. III. MOTION. IV. OPERATION.

The genus of Spiritual Actions he divides into two Classes, those that belong to God by which are meant only his transient actions which are terminated in the creatures, such as creation,

Three of them denote doubt,

Three certainty,

And One sometimes doubt and sometimes certainty.

The three first or those denoting doubt, are,

خِلْتُ ; ظَنَنْتُ ; حَسْبَتُ

EXAMPLE.

I conceived Zued was standing.

ا خَاسَةُ عَبْرًا فَاضِلًا

I imagined Amr was eminent.

I supposed Bukr was sitting.

ment Practical, and the Actions of the Will, with these also of the sensitive part or the Fancy, which are properly styled Passions, but the whole would require too much space and the above extract may be deemed sufficient to illustrate the nature and division of words significant of the distinct operations of the mind, or of spiritual or intellectual Ideas.

The other three Verbs or those denoting certainty, are

EXAMBLES.

I perceived that Amr was generous.

ا كَرُبُ عَالَمُ الْمِينَا الْمُعِينَا الْمِينَا الْمِينَا الْمِينَا الْمِينَا الْمِينَا

Annotation.

That there are many Verbs of this Class besides those recorded in the Commentary, the following will demonstrate.

1. دَرِيت بِكُرَاصًا حَبِكَ He knew, as, دَرِيت بِكُرَاصًا حَبِكَ I knew that Bukr was your companion.

2. Know for certain, as,

Know that the preservation of the soul, is by subduing تَعَلَّم شَفَارَ النَّفْسِ تَهْرِعُدُ وَهَا the passions.

3. ji He found, as,

المُورِ اللهُ المُورِ اللهُ عَلَيْنَ اللهُ عَلَيْنَ اللهُ عَلَيْنَ اللهُ اللهُ اللهُ اللهُ عَلَيْنَ اللهُ الللهُ اللهُ اللهُ اللهُ اللهُ الللهُ اللهُ اللهُ اللهُ اللهُ

RUZEE however remarks that the Verbs when synonymous with and it the Imperative synonymous with and it the Imperative synonymous with and it is the Imperative synonymous with and it is the Imperative synonymous with as, as,

I knew that you were standing.

آمَا الْغَيْ رَشَدَا Know assuredly that after error comes piety.

4. See He numbered or calculated, 28,

Do not reckon on God as your companion in affluence وَ لَا تَعَدُّ دِ الْمُوْلَىٰ شَرِ يَكُلُّ فَى الْغَنَا but in poverty and distress.

The Verb is sometimes used to denote perception with the eye, as in the following sentence from the Qooran.

The Verbs of this Class do not admit of the retrenchment of one of the two Objects in composition being but as one word, and the sense of both collectively forming as it were the منغول به or Object of a transitive Verb, that is the radical sense of the second Object or its Infinitive, may be considered as connected with the first in the relation of the aorist case, as the sense of the sentence عَلَيْتُ زَبُلُ افَاصَلُ اللهُ اللهُ وَاللهُ اللهُ اللهُ اللهُ وَاللهُ اللهُ اللهُ

These lines are very ingeniously versified by Dr. Carlyle in his Specimens of Arabian Poetrat, for the learned Professor has not only preserved the sense but the very spirit of the Epigram, by lengthening out his version to an extent as disproportionate to the original as little David's beard.

When these Verbs happen to intervene between their Objects, or when they follow them, their government may be optionally omitted.

EXAMPLES.

زَيْلٌ ظَنَنْتُ قَائِمٌ زَيْدًا طَنْنَتُ قَائِمً زَيْلٌ قَائِمٌ طَنَنْتُ زَيْلٌ قَائِمٌ طَنَنْتُ

3.

A man like thee scarce e'er appear'd,

A beard like thine—Where shall we find it?

Sarely thou cherishest thy beard,

The Verb is supposed to be used in the sense of doubt or uncertainty in the following example from the Qooran, as,

They suppose (the day of judgment) is distant.

It is used in a sense termed by the Arabian Grammarians to denote vision in a dream and requires after it two Objects in the Accusative, as in the following Sentence from the Quoran:

It seemed unto me in my dream, that I pressed out wing اذي أرا ني أعصر فحرا (from grapes,)

Their government therefore or non-government is equally proper, though some Grammarians are of opinion that when they intervene between their Objects, their government had better be preserved, but when they follow them, it had better be cancelled.

If to the Verbs and and a Humza be prefixed, they become transitive to three Objects or Accusatives.

EXAMPLES.

I made Zued know that Amr was excellent. وَعَلَيْتَ زَيْدًا عَبْرًا فَاضِلًا اللهُ الْعَالَا الْعَالْعُلَا الْعَالَا الْعَالَا الْعَالَا الْعَالَا الْعَالَا الْعَالُو الْعَالَا الْعَلَا الْعَالَا الْعَلَا الْعَلَا الْعَلَا الْعَلَا الْعَلَا الْعَلَا الْعَالِيَ الْعَلَا الْعَالَةُ الْعَلَا الْعَالِيَا الْعَلَا لَهُ عَلَى الْعَلَا لَا عَلَى الْعَلَا الْعَلَا الْعَلَا الْعَلِيْعِلَا الْعَلَا الْعَلَا لِلْعَلَا الْعَلَا الْعَلَا الْعَلَا الْعَلَا الْعَلَا لَهُ عَلَى الْعَلَا الْعَلَا الْعَلَا الْعَلَى الْعَلَا الْعَلَا لِلْعَلَا الْعَلَا لَهُ عَلَى الْعَلَا لَيْعِلْمُ الْعَلَا لَلْعُلِيْعِلْمُ الْعَلِيْعِلْمُ الْعَلَا لِلْعَلْعُلِيْعِلْمُ الْعَلِيْعِلْمُ الْعَلِيْعِلْمُ الْعَلِيْعِلْمُ الْعِلْمُ لِلْعِلْمُ الْعِلْمُ لِلْعُلِيْعِلْمُ الْعِلْمُ لِلْعُلِيْعِلْمُ الْعِلْمُ لِلْعُلِيْعِلْمُ الْعُلِيْعِلْمُ الْعِلْمُ لِيْعِلْمُ الْعُلِيْعِ لِلْعُلِيْعِلِي الْعُلِيْعِلْمُ الْعُلِمُ لْ

Annotation.

Verbs of sense in Greek generally govern a genitive, but the Verb onlower like in Arabic, requires an Accusative which Mr. Jones has endeavoured to account for philosophically in his Greek Grammar. See p. 275,

The example produced by the Commentator to prove that the Verb is sometimes used to express ocular in opposition to mental vision, appears to me very singularly inapplicable. The entire passage from the Qooran is as follows:

He (Abraham) said, O my dear son, verily I saw in a dream, that I should slay thee as a sacrifice, consider therefore what thou thinkest I should do. He replied, O my Father do what thou art ordered to do.' A word cannot surely be placed in a more unequivocal light than in the above Sentence: perhaps the Commentator intended to quote the preceding example,

Another Object is therefore added to these Verbs by this Humza of increase, which possesses the property termed بَعْبُ (and is that by which the Agent or Nominative to a Verb puts the Object in possession of the sense of the radical.)

The meaning therefore of the first example is المُعْبُ عُبُلُتُ عُبُرُ الْعُلِي الْمُعْبُ الْعُلِي الْمُعْبُ الْعُلِي الْمُعْبِي الْمُعْب

Annotation.

The Grammarian Ruszer, makes مَا عَرَفَ synonymous with عَرَفَ in every respect, and says the phrases عَرَفَتُ لَعَ يَعَلَيْهُ عَلَى اللَّهُ اللَّهُ اللَّهُ عَلَى اللَّهُ اللَّهُ عَلَى اللَّهُ اللَّهُ عَلَى اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ عَلَى اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ عَلَى اللَّهُ الل

The government of these Verbs is suspended but not destroyed, first, by the introduction of the Particle termed المُعْنَدُ عَلَيْهُ لَا يَعْدُ لَا يُعْدُ لِلِا لَا يَعْدُ لِلْكُوا لِلْكُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلِكُ لِلْكُولُ لِلِكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُولُ لِلْكُ

I doubted whether Zued was standing with you or Amr.

This suspension of government being caused by the immediate Agency of some word is termed by the Arabian grammarians but that the government of the Verbs is not altogether destroyed by the construction they alledge the following argument as a proof; namely that if another Sentence follow the one to which the Particle is prefixed, the government will be preserved, as

I thought that Zued was standing and Amr going. ظَنَنْتَ لَزَيْدَ قَالِم وَعَهْرَا مُنْطَلِعًا

The following Verbs namely أَذَبَرُ ; أَجَبُرُ ; أَخَبُرُ and عَرِّنَ are also transitive to three Objects.

Note, that it is not allowable to reject in composition the 1st OBJECT or Accusative, nor either of the last two separately, but they may both be rejected together as already described.

Annotation.

The على على are distinguished from other Verbs by the following peculiarity, namely that the Agent and Object with which they are connected, may be expressed by the conjunctive personal pronouns, and both be the same Individual, as المنافذ I knew myself, على Thou didst know thyself; which form of construction cannot be applied to any other Class of Verbs such as مَرْبَتْنِي for example, but if we wish to express the reflective sense, a distinct Noun must be introduced for the Object, as مَرْبَتْنِي I struck myself. In this particular respect the Greek seems to have an advantage over the Arabic, having a peculiar form of verbs in the middle voice to express this double relation independant of any adscititious Noun or Pronoun, as ¿τυψάμην I struck myself, &c.

The following Story will illustrate the use of the different verbs of this Class.

A Merchant was going through a slave-market one day and happened to see a Broker holding a boy by the ear for sale, and calling out, who will purchase a youth accomplished, sensible, learned, and faithful, for one hundred Dirhums? Why my good Sir said the Merchant, I suspect you must be crazy, for if your boy possess the qualities you mention, he is worth a thousand Dirhums. O said the Broker you see him shining and take him for silver, but if you were acquainted with his failing you would probably find him copper. Pray what is his failing said the Merchant, and what do you think the cause of it? He tells every year said the Merchant a great lie and a little lie, and each of these I consider as a very serious evil. Pooh

pooh! said the Merchant, I look upon this as a mere trifle. He accordingly purchased the boy and took him into his service, and finding him expert and skilful in duty, placed him at the head of all his servants. But it happened sometime after, that the Merchant accompanied by some of his friends went out to his garden, and sent the boy home about sunset to bring him his ass, but the boy as soon as he approached his master's house rent his clothes, and threw dust upon his head, and exclaimed, O alas, alas, my master! the lord of my bounty!—the Merchant's wife concluded from his appearance that some misfortune had happened to him, and said, alas, boy, what is the meaning of this outcry? Ah! replied he, the roof of the house has fallen in upon my master and crushed him to pieces with all the other Merchants. The wives of the Merchants who happened to be invited there by the lady of the house, as soon as they heard the report of the slave beat their faces in despair, and began to run towards the garden, but the boy got before them and entered it tearing his clothes like a frantic person and throwing dust on his head, in the same manner as he had done before The Merchants surprised at his appearance asked the cause of his distress. Ah! I believe he replied, a spark of fire escaped from the hands of one of the maid-servants and has set fire to your house, and I do not think there is a single child that has not been burned to death, nay not one even of the maid-servants nor one of your wives. The Merchants hearing this ran out all distracted, one weeping for his sister and wife, the other for the daughter of his relation, but when they got about half way home, both parties met on the road and every one saw his friend safe, and discovered that the whole was a trick played upon them by the lying valet. What has tempted you said his master to this act? Do you not know replied the boy that I was bound to tell you every year a great lie and a little one? Well said the Merchant and under what class must I place the present? Is this the large lie or the little one? O this is the little lie, replied the boy, the large one you shall have bye and bye! This little lie said the Merchant will answer my purpose.—I now give you your liberty, so set out, and find some other person of more consequence to practice your large lie upon.

OF THE GOVERNMENT TERMED وياسي OR ANALOGOUS.

The Class termed تياسى or Analogous contains seven Governing Powers.

FIRST ANALOGOUS GOVERNOR.

Of the Analogous Governors the first is a Verb Universally, whether neuter or transitive, and in any tense past or aorist; for every Verb governs an Agent in the Nominative, as عَرَبُونَ 'Zued stood.' عَرَبُونَ 'Zued struck;' but if the Verb be transitive it governs an object in the accusative also, as مَرَبُونَ يُعْدَدُونَ وَكُونُ وَالْمُؤْنُ وَكُونُ وَلِهُ وَلِهُ وَلِهُ وَلِهُ وَلِهُ وَلِهُ وَلِهُ وا

The Agent can never precede the Verb in the order of construction but the Object may, as زَارَدُ اَفَرَاتُ ; nor can the Agent be omitted in composition, which is not the case with the Object which may be optionally omitted.

SECOND ANALOGOÚS GOVERNOR.

رور الصدر

The second is the Infinitive (الْمَارُدُرُ) which is defined to be the Name of a Mode, (الشرَحُلُث) and is termed الْمَارُدُ or the Source, being the source from which the Verb is conceived to flow.

Annotation.

The true Grammatical sense of the term as as employed in the Definition of an Arabic Infinitive, is not easily conveyed by any one word in the English Language. Mr. Lumsden who well knew its true nature and force has rendered it event, and to his opinions on every important question of Arabic Science and general Grammar, the profoundest respect is justly due; but the word as

The Grammarians of Busrah call the hand the Branch or Radix, from its absolute signification in itself, without reference to a Verb; and the the Branch or stem, because it is not independent in itself, but has reference to some Noun. On the other hand the Grammarians of Koofuh call the ithe root, and the hand the branch or derivative, because the rules of permutation to which the latter may be subjected, depend entirely on the permutations of the

Annotation.

I shall endeavour to make appear, is a much more comprehensive term than event: it embraces all attributes when considered separately from the beings to which they are attributable; all essential and inward properties as well as outward respects and relations, and reaches to actions themselves as well as manners of actions.* On the contrary the word event means little more strictly speaking, than the end, conclusion or termination of an affair, and this also is the precise Definition of it as given by Cicero; "Eventus est alicujus exitus negotii." May it not therefore be concluded that the word event, even in its most comprehensive acceptation, signifies rather the effect of action, than action itself, and that consequently it cannot be considered as a legitimate representative of in the definition of an Arabic Infinitive?

This however is a question of too much importance to be hastily decided upon. It involves a very minute inquiry into the true nature and definition of the parts of speech, and if fully and satisfactorily conducted, into the general principles of universal Grammar. An analysis of this nature will not indeed be expected in the limited space allotted to a note, but a short view of the subject may be interesting, and this I purpose to submit.

My own opinion is that the most unexceptionable name for an Arabic Infinitive is a mode or manner of being; I mean a mode in its philosophical acceptation as explained by Locke, and since adopted I believe by every writer on ontology. "Modes I call such complex ideas, which, however compounded contain not in them the supposition of subsisting by themselves, but are considered as dependences on, or affections of Substancies; such as are ideas signified by the words triangle, gratitude, murder, &c." But in order to justify the application of this term to an Arabic Infinitive, it may be necessary to enter into some detail.

former when it happens to be a Verb of the Infirm Class (مُعَنَّرُ) and if of the sound or healthy (مُعَنَّرُ) it continues sound also: example, is: the Musdur here قوام being originally قوام the Wao is charged into Ya, because the same letter had before been permuted in the Verb عَادَمُ وَاماً وَامَ وَاماً وَما وَاماً وَم

"We mean by the word as a thing existing in or by some other thing, whether extrinsical as beating and going; or intrinsical as extension and contraction." If the reader will take the trouble to compare this with the definition of a mode as given above by Locke, and of its various divisions as recorded by Watts in his Logic, he will find I think the term and mode in every respect reciprocal.

Let us compare them in a few places. "The very being of a Monz depends on some substance for its subject, in which it is, or to which it belongs; so motion, shape, quantity, weight, are modes of

So far the terms are clearly identified.

Further. "Modes are either essential or accidental. An essential Mode or Attribute, is that which belongs to the very Nature or Essence of the Subject wherein it is; and the Subject can never have the same Nature without it, such as Roundness in a Bowl, Hardness in a Stone, Softness in Water, Vital Motion in an Animal, Solidity in Matter, Thinking in a Spirit:" All these Modes are comprehended in the Definition and are all Arabic Infinitives and the Sources of Derivation."

Again. "An Accidental Mode, or an Accident, is such a Mode, as is not necessary to the being of a thing, for the Subject may be without it, and yet remain of the same Nature that it was before; or it is that Mode, which may be separated or abolished from its Subject: So Smoothness or Rough-

[†] The word Event is merely applicable, agreeably to the authority of Lucretius to accidental modes, or to those accidents which may be absent or present without destroying the subject,

The Infinitive (مصدر) has the same government as its own verb; if therefore the verb be neuter it governs the Agent in the Nominative.

changed, and yet the body remain a Bowl still: Learning, Justice, Folly, Sickness, Health, are the accidents of a Man: Motion, Squareness, or any particular Shape or Size, are the accidents of Body:

—So Hipe, Fear, Wishing, Assenting and Doubting, are accidents of the Mind, though Thinking in general seems to be essential to it." These are all Arabic Infinitives.

"Modes belong either to Body or to Spirit, or to both. Modes of Body belong only to matter, or to corporeal Beings; Modes of Spirit belong only to minds; such as Knowledge, Assent, Dissent, Doubting, Reasoning, &c. Modes which belong to both have been sometimes called mixed Modes or human Modes, for these are only found in human nature, which is compounded both of body and spirit; such are Sensation, Imagination, Passion," &c. See Watts's Logic.

as defined by the Arabian Grammarian corresponds with a logical Mode as above detailed will hardly I think be disputed, and that this precise word is peculiarly applicable to the Musdum or Infinitive we have the Grammarian's own words as authority وَاعْمُ الْمُعْمُ وَمُونَا اللهُ اللهُ

The Infinitive is constructed in five different ways,

- 1. It is connected as the in or Governing word in the relation of the aorist case with an Agent, the Object being at the same time expressed, as in the last example.
- 2. It is connected as the in the relation of the aorist case with an Agent, the Object not being expressed.

The result of this comparison may perhaps convince us that the Arabians have borrowed their general notions of Science from the Greeks, and that their nouns and infinitives, or their names of modes, comprise the two great philosophical divisions of subject and accident, from which the celebrated categories of Aristotle have been formed. This is indeed a fact that will hardly be disputed. Every system of Arabic logic sets out with this twofold arrangement, and although their modern Grammarians have not adverted to this circumstance in their enquiries into the true nature and definition of the parts of speech, I think it is evident that this must have been the original cause of the present grammatical classification. "The multitude of ideas 'says Harris,' treasured up in the human mind and which, bearing reference to things, are expressed by words, may be arranged and circumscribed under the following characters. They all denote either substance or attribute."

This Division of words and things into two general Classes is taken from the Sophista of Plato, and is thus given by Sanctius in his Minerva. "Quicquid enuntiatur, aut est permanens, at Arbor, Durum; aut fluens, at Currit, Dormit. Res permanentes sive constantes vocamus, quaram natura diu

And hence I draw the following conclusions, that all modes in their absolute and Indefinite capacities are general terms or arbitrary names, affixed to certain combinations of simple ideas which have their existence only in the mind. That every mode denotes an attribute, and that every attribute is capable of sundry modifications as to means, object, end, instrument, time, place, and other circumstances, including in fact the nine sub-divisions or Post-Predicaments into which this comprehensive graves has been distributed.

Еeе

Note. The above rules of construction are only applicable to the Infinitive of a transitive Verb: when it happens to be neuter, it is constructed only in one way, namely in the relation of the agrist case with an Agent.

The Agent of the Infinitive can never be concealed, nor can the Infinitive itself be preceded in composition by its or governed word.

Annotation.

This is absolutely capable of demonstration, for if we compare the nine subdivisions of attribute, with the common derivative forms or modifications of an Arabic Musdur; which are produced by the mere change of vowel points, or by the addition or elision of certain letters to and from the mode in its radical form, we shall find them agree in almost every particular. For example, quality abstractedly considered will be represented by the addition or elision of certain letters to and from the mode in its radical form, we shall find them agree in almost every particular. For example, quality abstractedly considered will be represented by the addition of certain properties by the action into which the attribute of mode has been divided by Philosophers, and this I think I have effected. Aristotle has enumerated but four divisions of the Attribute namely, action, Passion, Habit and Position, which he also comprises in the acceptabars, or Ineenitare.

Here then we discover the true origin and sense of the Infinitive mood or mode, a term familiar to every Schoolboy, yet strangely misunderstood by the most learned Grammarians. Sanctius, Scioppius, Perizonius and the Messicurs De Port Royal deny the propriety of the expression altogether, and Scaliger says the Infinitive is not a mood in act but in power, to which Vossius agrees. "Assentior autem Jul. Scaligero, qui actu modum esse negat, contrà quam vulgus non modò semidoctum putat, &c."

THIRD ANALOGOUS GOVERNOR.

The third is an active participle, (الشر الفاعل) which possesses like the Infinitive the same regimen as its verb, that is, if derived from a neuter Verb it governs an agent in the Nominative as "زيك قا تر ابود" The Father of Zued is standing;" and if from a transitive verb it governs both a Nominative and an Accusative.

EXAMPLE.

رَيْنَ صَّارِبُ غَلَامُهُ عَبْراً Zued's servant is beating Amr.

Its government is guided by certain conditions.

The sentence in which the Active Participle is employed must include either present or future time, with one of which it must necessarily be accompanied in order to complete its affinity to the Aorist tense of a Verb; for as it already resembles the Aorist in the number of its letters and vowel points, it acquires by this addition of present or future time a similitude in signification also.

Annotation.

"The Infinitive says Dr. Beattie, if you please may be called a form, but a mood it certainly is not!" Now what is a mode but a form or manner of being abstractedly considered, a term synonymous with quality or accident, the ποιότης of the ancient Philosophers as opposed to αισία or substance, of which the Noun and Infinitive were used as the verbal Representatives? The whole source of the error proceeded from not attending to this original distinction, and by taking the word mode in its relative instead of its absolute signification, and to this perhaps we may trace the partial and consequently erroneous definition of it by Gaza in his Grammar L. IV; which Harris has unwittingly commended—βάλημα, ἐἰὶ ἐν πάθημα ψυχῆς, διὰ Φωνῆς συμαινόμενου.—Α colition or affection of the Soul, signified through some voice, or sound articulate. See Hermes, p. 1-10.

The QUALITY of Verbs says the Roman Grammarian Consentius is either finite, or infinite.

FINITE as denoting a certain person, a certain number, or a certain time, as I read, I write. INFINITE,

COMMENTARY.

It must be connected with a Subject (בווות) preceding it in the order of construction to which it forms the Predicate, as in the examples already given, or with a QUALIFIED NOUN (مَوْصُونُ) to which it will be the ATTRIBUTIVE,

EXAMPLE

I went by a man whose son was beating his مرت برجل ضارب ابنه جا ربته المعادة أله أبنه المعادة المعادة

Or with the Article أَوْصُول as its Antecedent or مَوْصُول to which it forms the Relative (مالة)

in which these are altogether promiscuous, as, to read. "QUALITAS, Verborum aut finita est, aut infinita: finita est, quæ notat certam personam, certum numerum, certum tempus, ut, lego, scribo. Infinita est in qua hæc universa confusa, ut, legere." Vid. p. Consent. De Duabus Orationis part. Nomine et Verbo.

And hence the Verb in this form or mode was called Impersonal, Infinite; and by the Greeks ἀπαρέμφατον or Indefinite.* "Adeo, 'says Macrobius,' autem hic modes absolutum nomen rerum est, ut in significationibus rerum, quas Aristoteles numero decem ματηγορίας vocat, quatuor per ἀπαρέμφατον properantur, κεῖσθαι, ἔχειν, ποιειν, πάσχειν. Græco vocabulo propterea dicitur ἀπαρέ μφατον, quod nullum mentis indicut affectum." Vid. Macrob. De Differ. Græc. Lat. Verbi. p. 325.

This then is the result of our Analysis. An Arabic stripped of the learned language of definition in which it has been cloathed by Eastern Grammarians, turns out to be literally and strictly

the Infinitive Mood of a Verb, that is an indefinite or absolute Mode or manner of being, as opposed to Nouns denoting Substances, and this no doubt being a very important discovery I may perhaps claim the privilege of inserting a Q. E. I!

The Revd. Alexander Crombie, Author of the Etymology and Syntax of the English Language (a work in my opinion of very considerable merit) has adopted without consideration the vulgar error respecting the Infinitive mood, and says—" I concur decidedly with those Grammarians, who are so far from considering the Infinitive as a distinct Mood, that they entirely exclude it from the appellation of verb." Had Mr. Crombie taken the trouble to judge for himself he would have decided differently, for he could not be ignorant that all such words as running, leaping, flying, &c. &c. were Modes, Modes of Action, but indefinite as to time, place, and other circumstances, and consequently Infinitive Modes. This is surely a very plain and simple matter of fact, and yet Horne Tooke himself that Hermes of critical sagacity has misunderstood the term mode and says, "The Infinitive appears plainly to be what the Stoics called it, the very Verb itself, pure and uncompounded with the various accidents of Mood, of number, of gender, of person, &c. &c." and Bishop Wilkins proposes to alter the name. "That which is called the Infinitive Mode should according to the true analogy of speech, be styled a Participle Substantive. There hath been formerly much dispute among some learned men, whither the notion called the Infinitive Mode ought to be reduced according to the Philosophy of speech. Some would have it to be the prime and principal Verb, as

If none of the conditions above described accompany the PARTICIPLE ACTIVE it possesses no government, but is used simply as the it to the Noun immediately following it.

The beater of Zued yesterday was Amr.

If however the ACTIVE PARTICIPLE be made definite by the Article Ji it possesses the government of its Verb in every form of past, present or future time.

signifying more directly the notion of Action: and then the other varieties of the Verb should be but the inflexions of this. Others question whether the infinitive mode be a Verb or no, because in the Greek it receives articles as a Noun. Scaliger concludes it to be a Verb but will not admit it to be a Mode. Vossius adds, that though it be not Modus in Actu, yet it is Modus in Potentia, All which difficulties, (mighty difficulties indeed!) will be most clearly stated by asserting it to be a Substantive Participle.

But in the name of common sense, where lies the difficulty or impropriety of the term? Are not the chief objects of our thoughts things or Substances and their Manners of being? Are not the words walking, flying, learning, dancing, sailing, silting, &c. &c. certain Modes or manners of being, applicable to certain objects? Are not these manners of being, general words representing general ideas, and therefore applicable to many particular things? May we not talk of the walking of a Man; the walking of a Horse, the walking of a Dog, and so on ad infinitum? Is not walking then a mere mode or manner of being, applicable to an indefinite number of objects and consequently particular to none? Is it not therefore indefinite? It expresses no time, no person, no place, in fact nothing but a certain manner of motion; is it not therefore a Mode expressing a general idea, and therefore an Indefinite an Infinitive Mode?

And now having the Mode termed walking for instance, a word expressive of a manner of being, applicable to a great variety of objects, if we wish to limit its general application we apply it to

Note. The Participles Active termed المُعَالِينَة or Participles of the Intensive or Superlative Degree, such as غُلِير ; مَنْرُب ; and مِضْرَاب ; and great beater; مُضْرَاب and عُلَيْر a very wise man; مُعْرَاب 'very cautious or prudent,' have the same government as the simple Participles of the possitive degree, and are guided by the same conditions, and although they lose under this form their resemblance to the Verb in the number of letters, yet their increased signification as Intensive Participles is considered an equivolent for that loss.

Annotation.

becomes limited to a certain individual, but nothing more. If however we find it necessary to define the time in which the agent performed this Mode, this manner of action, we say Barclay walks—did walk, or will walk. Here we have the Mode modified, so as to express time and this we call the Mode indicative. If we desire the performance of the action, we say Walk, which is the Mode interpretative and so on through all the other grammatical Modes or variations which we generally call Derivatives. Now these observations are equally applicable to every such word in the language, and consequently the term Mode is applicable to them also.

And so much for the Infinitive Mood, a term perfectly applicable to an Arabic Musdur. That the word Mode is the best representative of in its technical and Grammatical sense, I have endeavoured to prove, as well from the authority of the Arabian Grammarians themselves, as from the character of language in general, which being conversant about things or the manner of things, in other words about Substances and Modes, (the chief objects of our ideas,) would necessarily have two characteristic verbal Classes to represent them, and these appear to me to be Nouns and Infinitive Modes.

It now only remains to be observed that besides the Infinitive as above described, there is another species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term in such or the Infinitive as above described, there is another species of Noun in some measure resembling it, which the Arabian Grammarians term in such an example as the following:

FOURTH ANALOGOUS GOVERNOR,

The fourth Analogous Governor is a Passive Participle () and has the same regimen as a Verb in the passive voice, governing a Noun in the Nominative as the substitute of the Agent.

The conditions attending its government require that it be used in a sentence, including either present or future time, and be constructed with a subject in the same manner as the Active Participle.

Zued's boy is beaten now, or will be beaten to-morrow.

Annotation.

Me Bacchus ever fair and ever young, Drinking joys did first ordain; Bacchus' blessings are a treasure, Drinking is the soldier's pleasure."

In which lines the word drink might be substituted for drinking without much detriment to the sense, for drinking joys mean the joys of drinking or drink, and the same may be observed of all other words of the same classes as grief, grieving; kiss, kissing; love, loving; &c. How then shall we ascertain the true character of these words? What for instance is love as opposed to the general term loving? It is certain that they are both general terms descriptive of cartain sensations of delight or Modes of pleasure in the mind, and as such may become either the subject or predicate of a Proposition, but this explains nothing, and if we ask the Arabian Grammarians for an explanation they answer us by pointing out a mere distinction in their application. The say say they, has no other government than that of any common Substantive Noun, but this again is controverted by the Grammarians of Koofah and Bagdad, who bestow upon it the very same regimen as that of the

the Infinitive of a Neuter Verb. The essential distinction then, for some essential distinction there certainly is, between the Infinitive and the Infinitive's Noun or Ismo Musdur, is not in my judgment simple abstraction, that is, making the one an abstract Noun in opposition to the other; for as I have observed before they are both general* or abstract terms, but rather in the idea of action or energy conveyed by the Infinitive, which action, Locke observes, however various, and the effects almost infinite, is all included in the two ideas of thinking and motion. These are his words, "For action, being the great business of mankind and the whole matter about which all laws are conversant, it is no wonder, that the several Modes of thinking and motion should be taken notice of, the ideas of them observed, and laid up in the memory and have names assigned to them; without which, laws could be but ill made, or vice and disorder repressed. Nor could any communication be well had amongst men, without such complex ideas, with names to them: and therefore men have settled names and supposed settled ideas in their minds of Modes of Action, distinguished by their causes, means, objects, ends, instruments, time, place and other circumstances, &c."

The real distinction then between the Musdur and Ismo Musdur seems to be this. The Ismo Musdur signifies simply the name of a Mode without any reference to action or energy; the Musdur denotes a more complex idea and indicates indefinitely the action, energy or being of that Mode. Love for example is a name assigned to a certain feeling of delight, but Loving is something

Words are general says Locke, when used for signs of general Ideas, and so are applicable indifferently to many particular sbings, that then which general words signify is a sort of things, and each of them does that by being a sign of an ABSTRACT IDEA in the mind. Locke. B. III. 6. 3.

more, being another name by which we indicate the action or efficacy of that feeling called Love; and hence we perceive the real cause of its possessing an active or transitive government, in contradistinction to the Ismo Musdur, which having no reference to action, has no other regiment than that of any common Substantive Noun.

Action indeed is applicable to every Infinitive, and this the Arabian Grammarians acknowledge by dividing all the verbs in the Language into two general Classes, which they term with and that is, verbs denoting Actions transitively, (the actio transiens of Logicians;) and verbs denoting actions inherent or inseparable, (actio immanens) which we are accustomed to call neuter; and hence we perceive the propriety of the Rule laid down in the Commentary, namely, that the find or Active Farticiple may be derived from either a transitive or intransitive verb, which is saying in other words that every action supposes an agent.

This idea of action is conveyed in other languages by terminations, as beat-ing: verber-ans:

TURT-EN* &c. but in Arabic with a few particular exceptions, there is no distinguishing mark
by which we can discriminate the Infinitive from the Infinitive's Noun, so that we
must trust entirely to the context for the sense of either. Every Participle however in our
language when used as a general term, is the just representative of an Arabic

Not unlike the oon or Tunwen in Arabic,

If none of the conditions above described accompany the Passive Participle, it possesses no government, but is used simply as the it to the Noun immediately following it.

EXAMPLE,

That person came whose boy was beaten now, or will be beaten to-morrow, or was beaten yesterday.

Annotation.

I mean every Active Participle formed by adding the termination ing to the Imperative of a Verb, which seems in this case to possess a similar power to the characteristic to, and therefore it may perhaps be said that we have two Infinitives,* as,

Drink-ing is the soldier's pleasure, or To-drink is the soldier's pleasure,

Formed by annexing ing and prefixing to, + to the Imperative in one sense and the Drink, in the other.

The real office of the Verb is supposed also by Plato to indicate action το μεν επὶ ταῖς πράζεσινον δέλωμα, ρίημά πουλεγομεν, declarationem quâ actiones significantur verbum dicimus,‡ which is nothing but the res fluentes already quoted, but however this may be, it will scarcely I think be denied that action, energy or being is the essential characteristic of every Arabic Infinitive.

This has indeed been remarked before by Mr. Elphinston in his "Principlus of the English Language,"—" The Infinitive Moods are two, the Infinitive Mood, and the Participle." See the work Vol. 1, p. 250.

FIFTH ANALOGOUS GOVERNOR.

ٱلصِغَةُ الْشَبِهَةُ

Annotation.

It must however be remembered that the proper subject of discussion in this work is the Musdura and not the Ismo Musdur. It is this that the Arabian Grammarians include among the Analogous governors, ascribing to it the same regimen as its own Verb, which they say must in every case denote either transitive or intransitive Action. In this contracted sense it must be acknowledged that Mode cannot be considered as a strictly correlative term, for although it may be truly affirmed that every Arabic Musdun is a Mode, yet we cannot add conversely that every Mode is a Musdun; as the word Mode embraces every manner of being without exception, and a Grammatical Muspur. includes only Modes of action, energy or being. These considerations led me to remark at the commencement of this note, that the true grammatical sense of an Arabic Infinitive was not easily conveyed by any one word in our Language, and as my object in this enquiry is truth and nothing but truth, I deem it my duty candidly to state and examine every objection that occurs to me on the subject. But the word Mode, although far more comprehensive in signification than a grammatical Muspur, is yet clearly the term that the Arabian Grammarians had in view in the Definition and as it embraces, also the Ismo Musdur, which is only distinguished from the other by its want of verbal government, (being generally represented by the same word) I conceive it to be upon the whole the least exceptionable, if not the only just representative of an Arabic Infinitive.

But the word Event which is usually explained an incident, the consequence of an action, the conclusion or upshet of any thing, I confess I cannot but consider as inapplicable to any Arabic Instelle

The Attribute or Adjective (الصغة الشبقة) is derived from a neuter Verb, and is formed to denote the uninterrupted or perpetual existence of the sense of the sinfinitive in an Agent or Substantive Noun. POVERTY, &c. are called events, but these are not Nouns of Action, nor have they any verbal government, and cannot therefore be properly considered as Infinitives, in the true sense of the term Infinitive as laid down by the Arabian Grammarians.

Having given a short view of what appears to me to be the frue character of an Arabic as well as an indicate to both to both the term mode is generally applicable, I shall close this Note with a few observations on the delial and indicate two attributive Nouns derived from the Infinitive, which seem to require some explanation.

It has already been shewn that every Arabic Infinitive in the general sense of the term Infinitive, has a twofold signification: one under the character of an by which is simply indicated a mode, the other under that of a properly so called, by which is denoted the energy or being of that mode in a state of action. Now as every Object represented by a Substantive Noun, may be described by its active and passive qualities, i. e. by the actions which it performs, or by the qualities with which it is modified or distinguished, so would language naturally be provided with distinct words to express them, and hence the two Derivative Adjectives, in Arabic termed

and squared of which the former, as its name imports, is properly the Noun of the Agent, but used as a Verb Adjective, for the purpose of describing the Action in which the Agent is employed, as Sued is beating; and the latter a simple Attribute or quality supposed to exist in the Object to which it is imputed, as Sued is beautiful, and to this observance of active and passive qualities as signified by these derivitive words, and to this alone, we are perhaps to trace the distinction drawn by the Arabian Grammarians between them, namely, that the one, meaning the denotes the temporary existence of a Mode in an agent, and the other i. e.the said its permanent or uninterrupted continuance.

This general rule however regarding permanent Attributes is certainly erroneous, for to prove it true, we must prove that every Mode or Quality as expressed by the Attribute or supplies in must be necessarily permanent in the object to which it refers, which if granted would confound accidental and essential Modes altogether, and produce as many strange phenomena in nature as in language. A poor man for instance would necessarily live and die a pauper, and if sick and gouty into the bargain, so much the worse, for no hope could be reasonably entertained of his cure. A Pregnant Woman () might in vain look for an accouchement, for the quality being permanent, she could not consistently with the grammatical canon (or more properly speaking the grammatical Bull) expect the slightest change in her condition! yet seriously, the Arabian Grammarians maintain, that the Adjective or Attribute denotes properly its own perpetual existence in the Substantive Noun to which it is imputed, and the phrase () Anacreon* is beautiful, must accordingly denote that Anacreon*

Moore,

To this mode of objection I can easily conceive the answer of an Arabian Grammarian. He will remark that certain objects are characterized by certain qualities, and consequently that although a female is not always pregnant, yet pregnancy is a quality habitual, or at all times attributable to her, in other words that the power of conception is co-existent with female nature. This is good, but it will not prove the point in question, for pregnancy can neither exist before, nor after certain periods, so that after all it is but a temporary, a transitory, in fact a

mere nine month's quality, and like the attribute supposed to be conveyed by the Active Participle or Jackil can only become permanent by the repetition of the action!

This distinction of permanent and transient qualities is commented upon by the Greek Philosophers. Aristotle has many passages of a similar nature to that under discussion, one of which Harris thus paraphrases in his Arrangements.

"And now with respect to all kinds of QUALITIES, whether corporeal or incorporeal, there is one thing to be observed, that some degree of permanence is always requisite; else they are not so properly Qualities, as incidental affections (Πάθη.) Thus we call not a man passionate because he has occasionally been angered, but because he is prope to frequent anger; nor do we say a man is of a palid or a ruddy complexion, because he is red by immediate exercise, or pale by sudden fear, but when the paleness or redness may he called constitutional."

But first let us consider the true nature and use of an Jalia or Active Participle, which may enable us to judge of the propriety or impropriety of the distinction supposed to exist between it and the simple Adjective.

The Participle Active or Je is used in two ways. First as a Verb Adjective, and secondly as a Substantive Noun. As a Verb Adjective alone it is properly the subject of Grammar, and in this character it describes the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state of action in which any object exists or is employed, as "Zued is standing;" or je with the state of action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is standing;" or je with the state or action in which any object exists or is employed, as "Zued is beating the state or action in which any object exists or is employed, as "Zued is beating the state or action in which any object exists or is employed, as "Zued is beating the state or action in which any object exists or is employed, as "Zued is beating the state or action in which any object exists or is employed, as "Zued is beating the state or action in which are "Zued is beating the state or action in which are "Zued is beating the state or action in which are "Zued is beating the stat

What then may be asked is the difference between the Levis and the zame and the grammatical characters as governing powers? The difference in my judgment is very obvious and very simple, and consists merely in this, that in construction the first or levis and describes the action in which the Agent is employed: the second or zame the levis the quality supposed to exist in, or belong to accidentally, a given object or Substantive Noun. In other words, one denotes Action; the other denotes Quality, as Levis Levis

THE SEVENTH ANALOGOUS GOVERNOR.

اَلْإِسْمُ التَّامُ

The seventh is a Perfect or Integral Noun (that is a Noun rendered perfect in itself, and independent of the relation of the Aorist Case.

Annotation.

The simple ATTRIBUTE or ADJECTIVE as expressing a passive quality, may perhaps have given rise to the idea of permanence, and the Active Participle as expressing an active quality, may also have Led Grammarians to consider it as somewhat transitory, but in point of fact there is no such distinction between them, and the idea of duration whatever it may be, will in every possible case I imagine depend upon the nature of the Yers, as well as our own previous knowledge of the Subject. For instance, the phrase الأرض متنعر كة 'The Earth is moving,' conveys to every one acquainted with our astronomical System, an idea of permanence, as the quality of mobility predicated of the Earth, is known to be continual,* but if we say الكرة متحركة 'The Ballis moving,' we shall then be understood to infer merely that the BADL is IN MOTION temperarily, and will again be at rest. Yet the Active Participle is the same in both examples and cannot be said to convey any idea of duration either temporary or permanent. It simply describes the action in which the Agent is employed with an indefinite relation as to Time. The very same may be observed of the ATTRIBUTE, for if we say, 6 THE IRON is HARD,' we shall be understood to speak of a quality co-existent and essential to the Substance Iron, and therefore permanent, but let us substitute another Adjective, and say the Iron is not, and the permanence of the quality immediately vanishes, for we all know that heat is accidental and not essential to Iron, and from this very idea of its transitory existence arose the common adage, Strike while the Inon is HOT.

With the Active Participles and Attributes, considered as Substantive Nouns, Arabic Syntax has properly no concern. They assume then a different character in composition, and have the same government as common Substantive Nouns. For instance the words as Entined; a Flier or Bird, and in an Asker or Beggar, are all active Participles in the character of Substantive Nouns, though they may be literally translated and used as Verbal Adjectives, for its means Tyrannising; in Keeping watch; in flying and in the character of Substantive Nouns, though they may be literally translated and used as

To the Arabs who believe in the Ptolemaic Hypothesis, the phrase would convey no idea of permanence whatever, on the contrary they would either imagine we were lying, or talking of an Earthquake!

This is effected either by its terminating in Tunween (יוֹבָּבֶּנָי) or in what is considered equivalent to the Tunween, namely the Noon (יוֹפָנִי) of the Dual or Plural Number, or by its being followed by the مُضَافَا الله or governed word.

nsking or begging. But in the character of Agents, they become complex Terms, expressing both qualities and subjects, and are therefore assumed as Subjects in a Proposition, not however with any reference to the transitory nature of those qualities, as the Arabian Grammarians would fain make us believe: on the contrary they denote the habitual posssession of the attributes or Modes referred to, and signify that the objects are acustomed to do so and so; for what is a Tyrant but a man who is known to practice tyranny? Or a Sentinel, but a man whose duty it is to keep watch? Or a Beggar but he who subsists by, or whose trade is begging? In truth the Active Participle as a Substantive Noun invariably denotes in Arabic the habitual Doer of an action, though in its Verbal capacity it may perhaps be considered as temporary, as

I have already remarked that the remarked that the remarked that the remarked capacity of a Substantive Noun, and a simple Attribute, resembling in application an Active Participle, as its name imports. In the first capacity it is used as a concrete or complex Term, to express both a subject and quality conjoined, as a Miser or avaritious man (Miserus) and a foreign Country. (Peregrinus) &c. (where it may be observed the Latin adjectives have precisely the same force as the Arabic;) but these are all strictly speaking, simple Adjective Nouns, which indicate by their prescribed form, that they are meant to be added to other Nouns, "so that both together may answer the purpose of complex terms," and in this character as simple modificatives, they are the proper subject of grammar. Now between an Active Participle and a simple Adjective considered as Verbal and Analagous Governors, we have already pointed out the distinction, (a distinction that comprises the two grand divisions of Modes or manners of being, that is, the modes of action, and the modes of being without action; as the first attributes Action to a subject, and the second Quality, but neither with any adsignification of time,) and it now only remains to cosider in what it is that they differ when used as Complex Terms.

Annotation.

With regard then to the transitory or permanent nature of the attributes expressed by either, there is not in my judgment any distinction whatever. They are both concrete Terms that differ only in the nature of the qualities they express. The Acrive Participle being the abbreviated sign of a complex idea, i. e. of a Subject and an Active Quality, as a Sentinel, or man who keeps watch; and the Adjective Noun, the sign of another complex idea, i. e. of a Subject and a Passive Quality as, a Miser, or man in whom the passion of avarice is supposed to exist. Compare all the Participles and Adjective Nouns in the Arabic Language (as complex Terms) and this distinction and no other I think will be found to characterize them; and indeed the reason appears obvious, for the Participles are derived from Active Verbs, the Adjective Nouns from Neuter, or from those that merely express corporeal or mental qualities in a passive state.

If we have occasion to mention an Object habitually employed in any given action, or whose profession is agency or business of any sort, we use the Active Participle as a Substantive Noun, and say if an Agent; a Story-Teller: a Husbandman: a Servant, &c. and on the contrary, if we intend merely to describe an Object as possessing some particular Quality, we make use of the Adjective Noun, and say if a Virgin, (which is also an Adjective) Virgo Intacta an Old Man, Sener. If a Partner, Consors, &c. without any reference to their active states.

But I repeat again that Arabic Syntax has nothing to do with Active Participles, and Adjective Nouns, as Complex Terms. They are employed in Grammar as Verb adjectives, and simple Attributes or Qualities, and are used descriptiveley, to define either the action in which a given Agent is employed, or the Quality with which a given Object is invested. As such they are necessarily adjected to Nouns, and although their grammatical office is to describe the Active or Passive state of a Substantive, they come afterwards like the Participles and Adjectives of other Languages, to stand for the Substances themselves.

In this manner are Passive Participles employed, for which means literally beloved, is used as a Substantive Noun to denote a Mistress. Worshipped, or God. Worshipped, or God. Written, a Book. Possessed, a Slave or Servant. Joseph sent, a Prophet. Hidden, an Enigma Imprisoned, a Prisoner. &c. &c. upon which principle of Analysis, Horne Tooke has explained above 2,000 abstract terms in the English Language, a process that may be adduced as a very powerful argument in favor of Etymology, as it enables us to trace the true and legitimate character of Words,

between the Active Participle, or le les and the Simple Attribute, or and misconception, and that the source of this error processes from confounding the different offices of these words together, that is, by comparing the Attribute or Adjective when used as a complex term of Substantive Noun, with the Active Participle as a Verb Adjective, which being then considered as equivalent to the Aorist Tense of a Verb, may well enough have given rise to the transitory nature of its attribute, when applied to any given Agent or Object. For instance the word is a simple Attribute or Adjective, signifying properly familiar, but like our own Adjective it is used in the sense of a Complex Terms to denote an intimate or companion, a Familiar. If however we use the Active Participle, and say is equal to the Aorist and the phrase will mean that, Zuen is sitting, which though indefinite as to time, has certainly something transitory in its nature as opposed to the complex Term which does not mean indeed a perpetual sitter,

that would be ridiculous, but merely a companion with whom we are accustomed to sit, and corresponds precisely with the Latin Sodalis, "qu. sedales quod una sederent et essent."

I have extended this Note so far beyond the limits of the Text, that I cannot with propriety persevere in the discussion, yet I relinquish it with reluctance, for I consider it as one of very considerable importance, and one by no means satisfactorily explained by the Arabian Grammarians. The few remarks here offered may however enable the reader to carry on the enquiry himself. I have pointed out what appears to me the source of the error in the distinction drawn between the Active Participle and the simple Attribute, (which should properly be called the Verb Adjective and the Adjective Nound.) This if correct, will be found of importance, but much imformation is still wanting to elucidate the true nature of Arabic Adjectives, and this I may possibly attempt in a future work. I shall therefore close this enquiry with a few promiscuous remarks (extracted from Ruzze and the Wafeer) on the Active Participle and Attribute.

The Participle Active and Simple Attribute or Adjective, agree in denoting a mode or manner of being; they assimilate also in form as to number and gender, and follow the same rule of construction with the single exception alluded to in the Commentary.

There are however some particulars in which they differ. The Adjective for instance, is derived from a Neuter Verb alone; the Participle Active may be derived from either a Neuter or an Active Verb. The Adjective denotes the perpetual, the Participle Active the temporal existence of an attribute in a given Object or Substantive Noun. The Adjective has seldom any resemblance in point of form to the Aorist of a Verb, as

though some examples of this are known to occur as

though some examples of this are contrary the Active Participle is always found conformable to the Aorist.

The word governed in the Objective Case by the Adjective, is never allowed to precede it in construction: that of the Active Participle may. We can therefore say زيد انافاريع 'I am beating Zued,' but we could not say زيد وجهن 'Zued has an ingenious countenance.'

There are other distinctions between them which I omit to record as unimportant.

Witty, Beautiful.

⁺ Evident. Delicate or slender.

The Adjective may or may not be constructed with the definite article $\hat{J}\hat{j}$, and in either case its governed word is to another; or made definite by the Article; or neither one or other: hence we have six peculiarities of construction; but besides these the governed word is itself constructed in three different forms, namely in the Nominative, Adrist, or Objective Cases, which multiplied by six as given above, leave eighteen varieties of construction, as may be seen in the following:

Of the examples however given in the above table, two are rejected by Grammarians as improper, namely the 13th in which the Adjective Noun is made definite by the Article \int_{1}^{∞} and connected in the relation of the Aorist Case with its own $\int_{-\infty}^{90}$ which is itself constructed with a Pronoun in the aorist case; and the 15th in which the Adjective Noun is made definite by the Article, and connected in the aorist case with an Indefinite Noun.

The propriety of the 16th example is also disputed by some and defended by others, but I willingly resign the office of umpire to any other Commentator.

Of the fifteen remaining examples the 1st, 4th, 8th, 9th, 11th, 12th, 14th, 15th and 16th, are termed by the Arabian Grammarians i. e. elegant or perfectly correct. The 7th and 10th or unobjectionable, and the 2d, 3d, 5th and 6th,

I shall close this long grammatical narcotic on Infinitives, Verb Adjectives and Noun Adjectives, (which the generality of readers may probably feel inclined to class among the *Insolubilia de Aliaco*) with a few extracts from Arabic Authors by way of illustration. In the following poetical panegyric on a departed Hero, extracted from the 20th Muqam of the Muqamat-ool-Hureeree will be found a variety of Adjective Nouns, employed both as simple Attributes and complex Terms.

O People I have a surprising story to unfold,

From which the wise and ingenious may derive advantage!

I was acquainted in my youthful days with a potent Hero,

Whose warrior-blade was sharp and piercing,

Who entered the lists of combat in crested pride,

Confident of success and fearless of danger.

^{*} The word the Plural of means both brilliant swords and beautiful women. I have tried to preserve the quibble but I fear not very successfully.

At the vigour of his onset the most impervious holds gave way,

And he made himself an easy passage through the narrowest defiles.

He never encountered an adversary in single combat,

Without returning from the tilt with a blood stain'd spear:

Nor assaulted a fortress however fenc'd and barricado'd,

Without being hailed on the erection of his standard, with the auspicious cry,

Assistance from above and a speedy victory !'*

Thus he lived triumphant:—arrayed every night in the stately garb of youth.

Giving rapture to the young and beautiful and receiving it in return,

Nay caressed by all as an idol of perfection.

But time which continu'd to extract his vigour and diminish his strength,

At length succeeded in effecting his fall,

And reduced him to so mean and shriveled a plight,

That his very friends beheld him with contempt.

The exorcists and cunning men in vain attempted his recovery,

And the most skilful Physicians were baffled in their attempts:

Then indeed he abandoned arms, for arms had abandoned him,

After giving and receiving many a hostile salute.

He is now dejected, drooping and crest fallen,†

And such is the fate of man who is born to misery.

Behold to-day the warrior stranger on his funeral couch,

And who will bestow a trifle to have him decently intered?

The reader will perhaps smile when he hears, that this 'sable warrior,' this Arabian Achilles, so feelingly and pathetically eulogized by Aboo Zued, is no other than the celebrated Bonus Deus or Hellespontiacus of the Ancients! Of this un-

I resided at Busrah,* said a certain Arabian Yorick, as a parson and professor of humanity, and was one day a good deal amused by a strange fellow, squint-eyed, straddle-footed, lame of both legs, with rotten teeth, stammering-tongue, staggering in his gate like a man intoxicated, puffing and blowing like a thirsty dog, and foaming at the mouth like an angry camel, who came up and seated himself before me. Whence come you, said I, O father of gladness? From home please your worship said he. And pray where is your home I rejoined, and what is the cause of your journey? My home he replied, is near the great mosque, adjoining the poor house, and I am come for the purpose of being married, and to beg you will perform the ceremony. The object of my choice is this long-tongued, importunate hump-backed, scarlet-skined, one-eyed, no-nosed, stinking, deaf, wide-mouthed, daughter of my uncle. Do you agree Miss Long-tongue said I, to marry this Mr. Pot-belly? Ay, said the lady (with a great deal of doric brevity!) then accept my friend cried I, this woman for your wife, take her home, cherish and protect her. So he took her by the hand and departed. Now it happened that about

I suspect this Busrah professor of humanity must have had a peep at our old friend Democritus Junr. whose sketch of an accomplished beauty may be considered complete. "Every lover admires his mistries, though she be very deformed of herself, ill-favored, wrinkled, pimpled, pale, red, yellow, tan'd, tallow-faced, have a swoln juglers platter face, or a thin, lean, chitty face, have clouds in her face, be crooked, dry, bald, goggle-sy'd, blear-sy'd or with staring ey's, she looks like a squis'd cat, hold her head stiff awry, heavy, dull, hollow-sy'd, black or yellow about the eys, or squint-sy'd, sparrow-mouthed, Persean hook-nosed, have a sharp fox nose, a red nose, China flat, great nose, nare simo patuloque, a nose like a promentory, gubbertushed, rotten teeth, black uneven, brown teeth, beetle browed, a witches beard, her breath stink all over the room, her nose drop winter and summer, with a Bazarian poke under her chin, a sharp chin, lave eared, with a long cranes neck, which stands awry too, pendulis mammis, her dugs like two double jugs, or else no dugs in the other extream, bloody fain-fingers, she have filthy long unpaired nails, scabbed hands or wrists, a tan'd skin, a rotten carkase, crooked back, she stoops, is lame, splea-footed, as sleader in the middle as a cow in the waste, gowty legs, her ankles hang over

nine months after that they both returned to me, rejoicing and had hardly seated themselves when my old friend Adonis called out.—O your worship we have been blessed with a most sweet and fascinating child, and are come to request you will bless and give him a name, and offer up a prayer for his parents. Now what should I behold, but a little urchin stone-blind, hair-liped, without the use of its hands, splay-footed, bald-headed, ass-eared, bull-necked not possessing one sense out of the five, and altogether frightful and deformed, in short a perfect epitome of all the qualities of his parents. At this sight I said to them, be thankful for this darling boy, and call him Oombsoor,* for truly he has all your perfections combined in himself, and that child is truly admirable who resembles his parents!

STORY.

A certain deaf fisherman was angling one day in the Tigris, and was accosted by another deaf man who had lost his way, with 'peace be to you.'—A poor fisherman, said he.—I belong to the tribe of Bunee Lam* answered the traveller, and have lost my way. Why truly said the fisherman the shoals of fish that

^{*} A villanous tribe of genuine Arab Hottentots with whem I had the misfortune to get acquainted on my way to Bigdad. They inhabit the wilds of Al-Hun about a hundred miles above Koorna on the Tigris, and though nominally subject to the Pasha of Bagdad, lose no opportunity of opposing his power, plundering his subjects, and way-laying every unfortunate traveller that may have occasion to pass through their inhospitable territory.

haunt the Tigris are amazing, and the voraciousness with which they swallow up the bait delights me, I have therefore taken my station here, and expect good sport.—I have lost my way said the traveller, for the path is entirely defaced by the overflowing of the river.—A net rejoined the fisherman, is by no means so good, for its meshes are always getting out of order,—no, no, a hook if you please for my money.—I am going to Bagdad, continued the other, what direction should I take? you must know being an inhabitant of this part of the country; shall I turn to the north, or towards yonder date-trees?—I can supply you with as many fish as you like answered the fisherman, for I have caught a great many to day, both great and small, but I do not part with them for less than 20 foolooses, ready cash!—The man thinking he had directed him towards the north, went away and the fisherman remained where he was.

OF THE GOVERNMENT TERMED معنوى OR ABSOLUTE.

By Absolute Government ((العاصل العنوى) is meant a government perceived by the mind, and in which a word as an agent has no concern. It is distinguished in two ways. First, as governing the Subject and Attribute in the Nominative Case, which is the primary form of a word in construction, or the state of a Noun uninfluenced by any Verbal governor, as

Annotation.

The Government termed as opposed to like the Absolute Case in Greek, it comprehends the Participle or Verbal Adjective with its substantive Noun, or the and and which are termed also the Subject and Predicate, and which seem to correspond with the Quop Loquimur and Dz Quo Loquimur of European Grammarians. This therefore may account for the mark of Case assigned by the Arabs to the Aorist Tense of a Verb, for the Aorist as well as the Participle forms the simple, the Quop Loquimur or Predicate, to the and or thing spoken of, and both terms connected together in discourse by means of this Absolute Government, produce the connexion termed which constitute a perfect or complete Proposition.

Zued is going. Secondly, as governing the Aorist tense of a Verb, which arises from its aptitude to supply the place of a Noun, as تَعْلَمُ Zued knows, in which example the Aorist عَالَى is marked مَرْفُوع or governed in the Nominative Case, being considered the adequate substitute for a Noun, as we may use in its place without any detriment to the sense, and say أَرُيْكُ عَالَى اللهُ ا

Annotation.

The Nominative Absolute in Greek, which may be considered equivalent to the AMIL MANUMEE in Arabic, is accounted for by Grammarians by supposing a verbal ellipsis, as they contend that there can be no Nominative without a Verb either expressed or understood. This doctrine may perhaps be applied to the Case in question, though the ancient* Arabian Grammarians endeavour to account for the construction in a different manner, alledging that the Subject governs the Predicate, while others again pretend that they mutually govern each other.

With regard to the government assumed by the Aorist, it is the opinion of Kissaer that it should be considered Verbal, and not Absolute as laid down in the Commentary, and this Verbal regimen he ascribes to one of the four formative letters of the Aorist, namely عام المنافع عام المنافع which he thinks must give the Tense رُفع . This doctrine is very gravely refuted by other Grammarians, but the reader I imagine will readily dispense with their arguments, and I shall accordingly permit them to rest in peace.

The Nominative Case,‡ or that Case in Arabic which expresses the subject of a proposition without the means of any Verbal Governor, may be illustrated by the following extract from Hermes. "It has been said already in the preceding chapter, that the great Objects of natural union are Substance and Attribute. Now from this Natural Concord arises the Logical Concord

OONDOOLOOSEE records this opinion of Seesuwur, It is also noticed by Boo Alee, Asool Futue, &c.

⁺ KISSARE and FURRA, &c.

² Quand le nom jouoir le premier rôle dans la phrase, et qu'il exprimoit le sujet en action, ou l'objet duquel on affirmoit quelque qualité; comme ce sujet attiroit et fixoit tous les regardes; que l'esprit le nommoit le premier; que la forme de son nom devoit se prêter à cet emploi, et pour cela, être nominative, on disoit que le nom étoit alors à la chute nominative (Casus Nominativus) at nous disons cas nominatif, ou cas qui sert à nommer le sujet.

Eléméns De Grammaire Générale, Par,

M. L'Abbé SICARD. Tom. prem. 169,

The Grammarians of Koofuh in general, ascribe the government of the Aorist, to the simple circumstance of its being unaccompanied with any of those particles which occasion it to terminate in ion of Ibno Malik.*

Annotation.

of Subject and Predicate, and the Grammatical Concord of Substantive and Attributive.† These Concords in Speech produce Propositions and Sentences, as that previous Concord in Nature produces Natural Beings! this being admitted"— "What?—Why that Nouns and Adjectives like natural Beings coalesce and bring forth Sentences!" we proceed by oberving, that when a Sentence is regular and orderly, Nature's Substance, the Logician's Subject, and the Grammarian's Substantive are all denoted by that Case, which we call the Nominative." He then goes on to explain how the Attribute in imitation of its Substantive would appear in the Nominative Case also.—" Every Attributive would as far as possible conform itself to its Substantive, so for this reason, when it has Cases, it imitates its Substantive, and appears as a Nominative also. When it has no Cases, it is forced to content itself with such assimilations as it has!" Surely this is not the language of the 'EPMHΣ ΛΟΓΙΟΣ;—the mighty oracle of winged words and philosophical arrangements! See Hermes, B. the second, p. 280.

FINIS.

^{*} A celebrated Grammarian author of the (Line Alfeeah.

[†] Harris classes Verbs, Participles, and Adjectives under the general head of ATTRIBUTIVES, and for this, the poor man has not estaped the lash of the Wimbleden Aristarchus. "Harris should have called them either Attributes or Attributables; but having terminated the names of his three other Classes (Substantive, Definitive, Connective) in Ive, he judged it more regular to terminate the title of this Class also in Ive: having no notion whatever, that all common terminations have a meaning and probably supposing them to be, (as the Etymologists ignorantly term them) mere protractiones vocum; as if words were wire-drawn, and that it was a mere matter of taste in the writer to use indifferently either one termination or another at his pleasure."
